

Growing Precious Metals Producer in the Great Basin

CORPORATE PRESENTATION – FEBRUARY 2026

TSX-V: ITR | NYSE: ITRG

[INTEGRARESOURCES.COM](https://www.integrareources.com)

CAUTIONARY NOTE & DISCLAIMER

This presentation has been prepared by Integra Resources Corp. ("Integra" or the "Company") solely for the use in connection with the recipient's evaluation of the Company. This document is a presentation of information about the Company's activities as the date of the presentation and should be read in conjunction with all other disclosure documents of the Company. The information in this presentation is not intended to modify, qualify, supplement or amend information disclosed under corporate and securities legislation of any jurisdiction applicable to the Company. It is information in a summary form and does not purport to be complete and does not constitute an offer to sell or the solicitation of an offer to buy any security. It is not intended to be relied upon as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any particular investor. These should be considered, with or without professional advice, when deciding if an investment is appropriate. The information contained in this presentation is derived from estimates made by the Company, information that has been provided to the Company by other parties and otherwise publicly available information concerning the business and affairs of the Company and does not purport to be all-inclusive or to contain all the information that an investor may desire to have in evaluating whether or not to make an investment in the Company. In particular, information derived from third party sources has not been independently verified and is subject to material updating, revision and further amendment. No representation or warranty, express or implied, is made or given by or on behalf of the Company or any of its affiliates, or any of the directors, officers or employees of any such entities as to the accuracy, completeness or fairness of the information or opinions contained in this presentation and no responsibility or liability is accepted by any person for such information or opinions. In furnishing this presentation, the Company does not undertake or agree to any obligation to provide the recipients with access to any additional information or to update this presentation or to correct any inaccuracies in, or omissions from, this presentation that may become apparent. No person has been authorized to give any information or make any representations other than those contained in this presentation and, if given and/or made, such information or representations must not be relied upon as having been so authorized. The information and opinions contained in this presentation are provided as at the date of this presentation. The contents of this presentation are not to be construed as legal, financial or tax advice. Each prospective investor should contact his, her or its own legal adviser, independent financial adviser or tax adviser for legal, financial or tax advice. No securities commission or regulatory authority has reviewed the accuracy or adequacy of the information presented. This presentation is for informational purposes only and does not constitute an offer or a solicitation of an offer to purchase the securities referred to herein.

Certain information set forth in this presentation contains "forward-looking statements" and "forward-looking information" within the meaning of applicable Canadian securities legislation and in applicable United States securities law (referred to herein as forward-looking statements). Forward-looking statements are often identified by the use of words such as "may", "will", "could", "would", "anticipate", "believe", "expect", "intend", "potential", "estimate", "budget", "scheduled", "plans", "planned", "forecasts", "goals" and similar expressions. Except for statements of historical fact, certain information contained herein constitutes forward-looking statements which includes, but is not limited to, statements with respect to: the future financial or operating performance of the Company and its mineral properties; results from work performed to date; the estimation of mineral resources and reserves; the realization of mineral resource and reserve estimates; the development, operational and economic results of the Company's mineral properties and contents are related technical reports, including cash flows, revenue potential, development, expenditures, and timing thereof, extraction rates, life-of-mine projections and cost estimates; timing of completion of a technical report summarizing the results of the DeLamar Project FS; magnitude or quality of mineral deposits; anticipated advancement of the Company's mineral properties; exploration expenditures, costs and timing of the development of new deposits; costs and timing of future exploration; permitting; construction and optimization planning; estimates of metallurgical recovery rates and grades; requirements for additional capital; the future price of metals; government regulation of mining operations; environmental risks; the timing and possible outcome of pending regulatory matters; the realization of the expected economics of the Company's mineral properties; future growth potential of the Company; and future development plans.

Forward-looking statements are based on a number of factors and assumptions made by management and considered reasonable at the time such statement was made. Assumptions and factors include: the Company's ability to complete its planned exploration and development programs; the absence of adverse conditions at the Company's mineral properties; no unforeseen operational delays; no material delays in obtaining necessary permits; results of independent engineer technical reviews; the possibility of cost overruns and unanticipated costs and expenses; the price of gold and other metals remaining at levels that continue to render the Company's mineral properties economic; the Company's ability to continue raising necessary capital to finance operations; and the ability to realize on the mineral resource and reserve estimates. Forward-looking statements necessarily involve known and unknown risks and uncertainties, which may cause actual performance and financial results in future periods to differ materially from any projections of future performance or result expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to: general business, economic and competitive uncertainties; the actual results of current and future exploration activities; conclusions of economic evaluations; meeting various expected cost estimates; benefits of certain technology usage; changes in project parameters and/or economic assessments as plans continue to be refined; future prices of metals; possible variations of mineral grade or recovery rates; the risk that actual costs may exceed estimated costs; geological, mining and exploration technical problems; failure of plant, equipment or processes to operate as anticipated; accidents, labor disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing; risks related to local communities; the speculative nature of mineral exploration and development (including the risks of obtaining necessary licenses, permits and approvals from government authorities); title to properties; and other factors beyond the Company's control and as well as those factors included herein and elsewhere in the Company's public disclosure. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in the forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. Readers are advised to study and consider risk factors disclosed in Integra's Annual Information Form dated March 26, 2025 for the fiscal year ended December 31, 2024, which is available on the SEDAR+ issuer profile for the Company at www.sedarplus.ca and available as Exhibit 99.1 to Integra's Form 40-F, which is available on the EDGAR profile for the Company at www.sec.gov.

Investors are cautioned not to put undue reliance on forward-looking statements. The forward-looking statements contained herein are made as of the date of this presentation and, accordingly, are subject to change after such date. The Company disclaims any intent or obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of assumptions or factors, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws. Investors are urged to read the Company's filings with Canadian securities regulatory agencies, which can be viewed online under the Company's profile on SEDAR+ at www.sedarplus.ca.

Qualified Person

The scientific and technical information contained in this presentation has been reviewed and approved by James Frost, P.Eng., Director, Technical Services of Integra Resources Corp., who is a qualified person as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

Technical Reports & News Releases

Certain scientific and technical information relating to the Company's mineral properties are based on and derived from the below noted technical reports prepared in accordance with NI 43-101 and applicable news releases. The information contained in this presentation related to the applicable mineral properties is subject to all of the assumptions, qualifications and procedures set out in each such report and as disclosed in such applicable news releases. Reference should be made to such reports, which have been filed (or will be filed in the case of the DeLamar Project), and applicable news releases, with the applicable regulatory authorities and are available under the Company's SEDAR+ and EDGAR profile at www.sedarplus.ca and www.sec.gov. The technical reports are meant to be read as a whole and sections should not read or relied upon out of context.

- Florida Canyon: "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA", dated July 11, 2024, with an effective date of June 28, 2024.
- DeLamar: "NI 43-101 Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025.
- Nevada North: "NI 43-101 Technical Report Preliminary Economic Assessment for the Wildcat and Mountain View Projects, Pershing and Washoe Counties, Nevada, United States of America", dated July 30, 2023, with an effective date of June 28, 2023.

Cautionary Note for U.S. Investors Concerning Mineral Resources and Reserves

NI 43-101 is a rule of the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Technical disclosure contained in this presentation has been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum Classification System. These standards differ from the requirements of the U.S. Securities and Exchange Commission ("SEC") and resource and reserve information contained in this presentation may not be comparable to similar information disclosed by domestic United States companies subject to the SEC's reporting and disclosure requirements.

All references to "\$" in this presentation are to U.S. dollars unless otherwise stated.

Florida Canyon Mine: **Nevada**

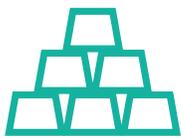

DeLamar Project: **Idaho**

Nevada North Project: **Nevada**

A GROWING PRECIOUS METALS PRODUCER FOCUSED IN THE GREAT BASIN OF THE USA

Focused profitability & operational success at principal operating asset, the Florida Canyon Mine

Value creation through profitable mining operations, rapid project development, prudent capital allocation, and M&A

Rapidly advancing development stage projects: the DeLamar Project and the Nevada North Project

Management with deep experience in mining operations, project development, mineral exploration, and capital markets

Production Today, Growth Tomorrow

| | |
|-----------------------------------|--|
| Production & Cash Flow | Florida Canyon generates cash flow to support the advancement of DeLamar & Nevada North |
| Growth Pipeline | Built-in pipeline of complementary heap leach projects underpin unmatched growth profile |
| Resource Scale | Peer leading resource inventory of 6.9Moz AuEq M&I and 3.1Moz AuEq Inf. ¹ across three assets |
| Jurisdiction | Scarcity of high-quality assets in the Great Basin; opportune time for project advancement |
| Team | Bolstered executive team; support from large institutions, Wheaton, Alamos, and Beedie |
| Attractive Valuation | Unique value proposition driven by blend of production and advanced development projects |

Key People: Proven Track Record

Executive team with extensive experience in operations, project development, exploration and capital markets

George Salamis

President, CEO & Director

- +30 years of experience
- Previously Executive Chair of Integra Gold which was acquired by Eldorado Gold in 2017 for C\$590M

Clifford Lafleur

Chief Operating Officer

- +25 years of experience
- Previously with SilverCrest Metals; played key role in growth leading to US\$1.7B acquisition by Coeur Mining

Andrée St-Germain

Chief Financial Officer

- +20 years of experience
- Previously CFO of Integra Gold which was acquired by Eldorado Gold in 2017 for C\$590M

Sean Deissner

VP, Finance

- +15 years of experience
- Previously with SilverCrest Metals; played key role in growth leading to US\$1.7B acquisition by Coeur Mining

Dale Kerner

VP, Permitting

- +25 years of experience
- Previously with Perpetua Resources; instrumental in Stibnite Project receiving Final Record of Decision

Scott Olsen

VP, Engineering - Processing & Infra.

- +25 years of experience
- Seasoned metallurgical engineer; held senior roles at Bald Mountain Mine for Barrick and Kinross

Mark Stockton

VP, External Affairs & Sustainability

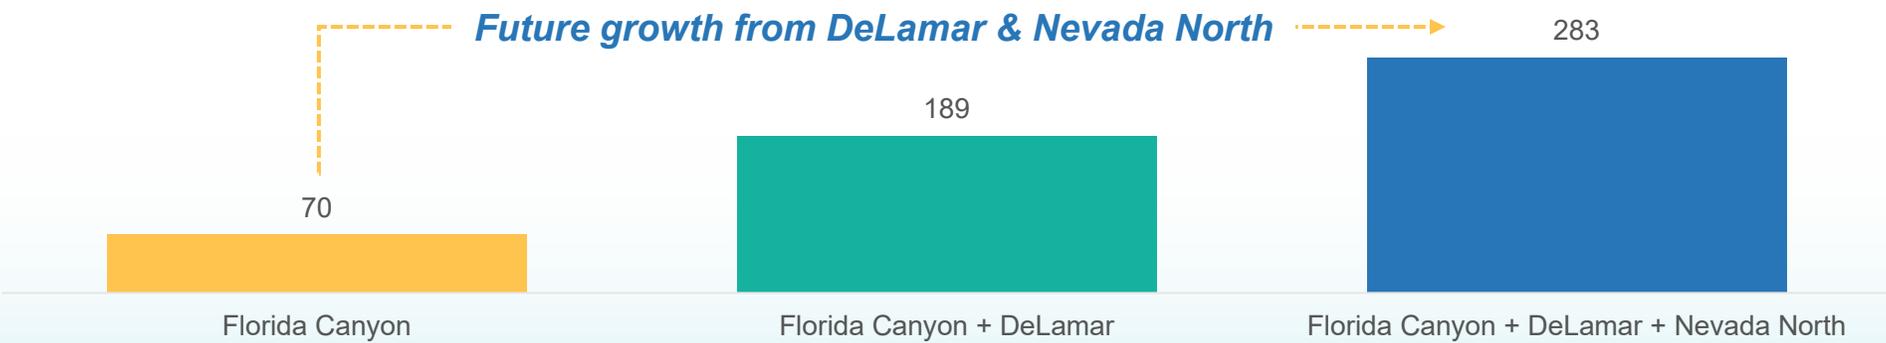

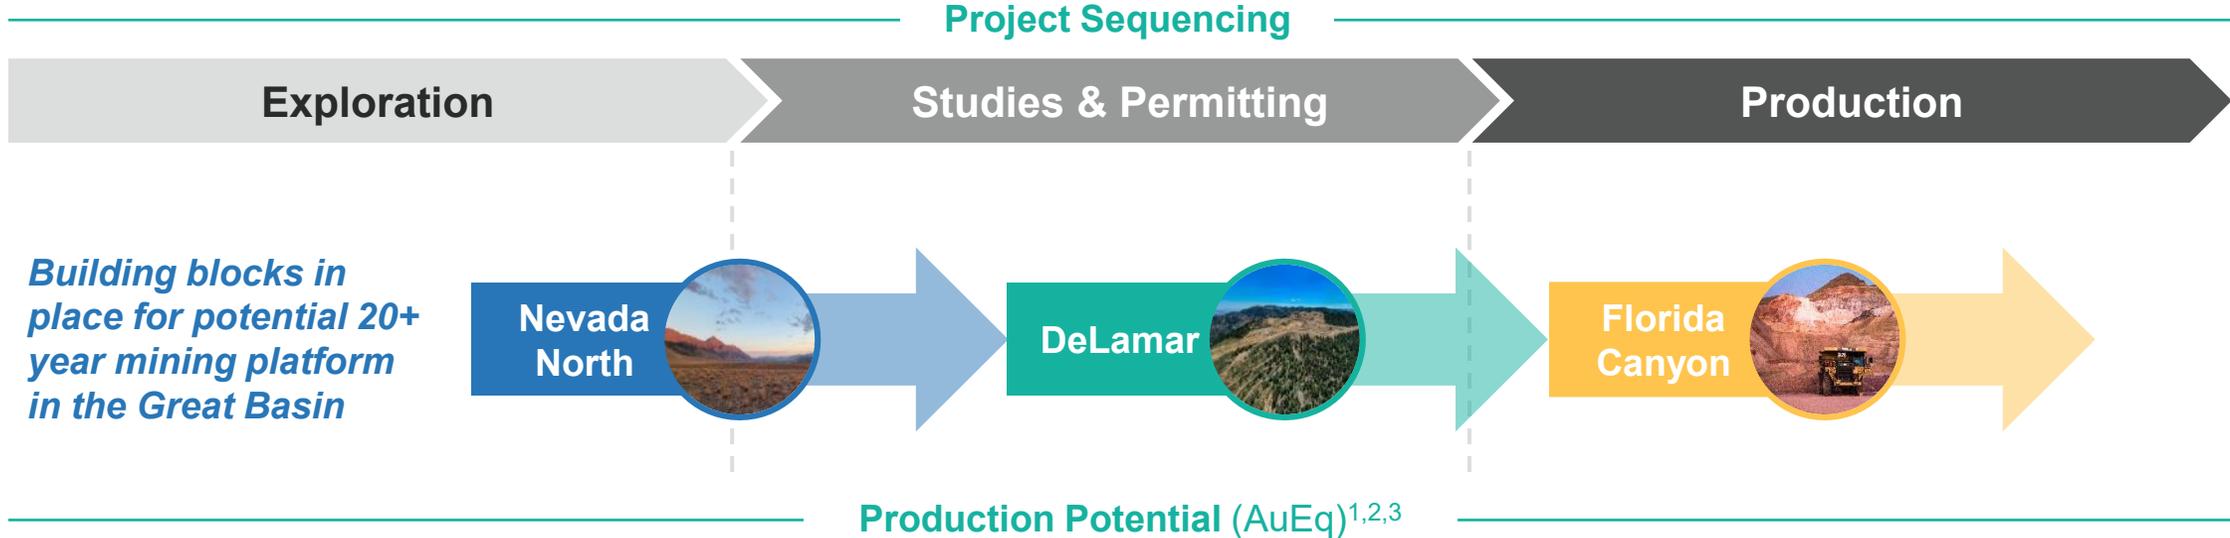

- +10 years of experience
- Previously held several roles with Integra Gold which was acquired by Eldorado Gold in 2017 for C\$590M

Key Assets: Complementary, High-Quality, Great Basin Focused

Florida Canyon Mine

Nevada, USA

Florida Canyon Mine: Overview

Summary

- Heap leach gold operation located approximately 45 miles southwest of Winnemucca, Nevada, adjacent to Interstate Highway 80
- Continuous operation from 1986-2011 and then intermittently until 2015
 - Operated by Rye Patch Gold from 2015-2018; acquired by Alio Gold in 2018 who restarted & ramped up production; Alio was operator until its acquisition by Argonaut Gold in 2020; Integra became operator in 2024
- Conventional open pit operation using loader/truck heap leach techniques and carbon-in-column (CIC) gold recovery process; 6-years of remaining mine life with potential for extension through near mine oxide exploration
- Florida Canyon has achieved record annual production in recent years

Mineral Reserves & Resources¹

| Category | Tonnes (Mt) | Gold Grade (g/t) | Gold Ounces (koz) |

Integra is focused on mine re-investment to drive long-term value

Florida Canyon Outlook

Technical Report including updated mineral reserve estimate and mine plan expected to be announced mid-2026

Guidance Summary

| | | |
|--|------------|-------------------|
| 2026 Gold production | ounces | 70,000 - 75,000 |
| 2027 & 2028 Gold production | ounces | 80,000 - 90,000 |
| Total cash cost ¹ | \$/oz sold | \$1,900 - \$2,100 |
| Mine-site AISC ¹ | \$/oz sold | \$2,750 - \$2,950 |
| Sustaining capital expenditures and leases | \$M | \$62.0 - \$68.0 |
| Growth capital expenditures | \$M | \$7.5 - \$9.5 |

Commentary & Focus Areas

2026 highlighted by significant capital re-investment to support long-term growth and profitability in 2027, 2028 and beyond

- **Mine Optimization:** numerous ongoing optimization studies at Florida Canyon focused on identifying areas for increased efficiency, process improvement, and cost reduction.
- **Sustaining Capital:** catch-up and current capitalized waste stripping to access new mining areas, mobile fleet rebuild and replacement financing, heap leach pad expansion, among other items.
- **Growth Capital:** expansion and growth projects including drill testing oxide growth targets, mobile equipment enhancement, pit wall slope optimization, and increasing run-of-mine material processing

Florida Canyon Mine: Growth Potential

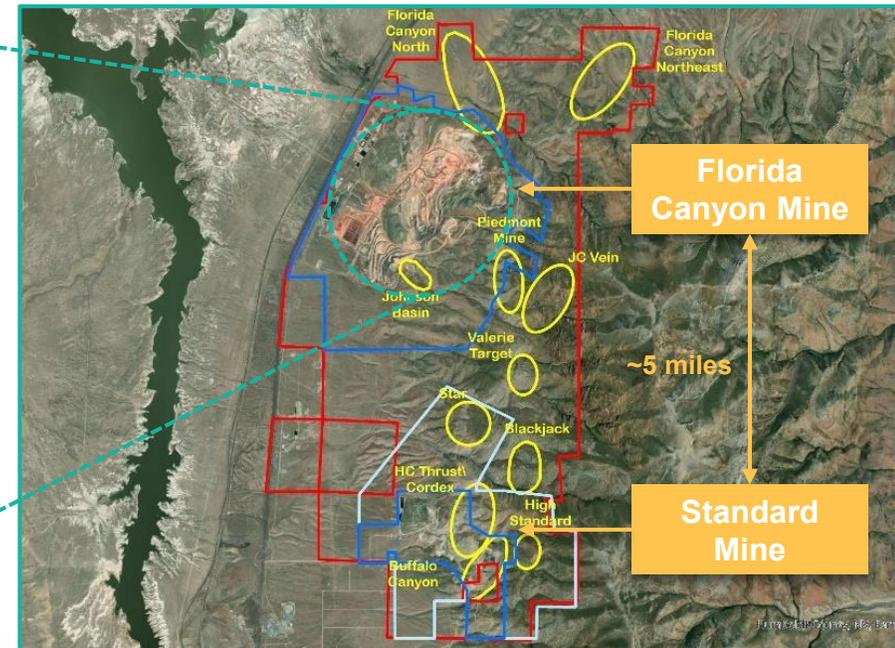

Integra focused on defining additional oxide material to support production growth and mine life extension

Near Mine Growth

Opportunity: Large volumes of historical waste/back fill material; numerous pits, divided by sparsely drilled saddles; Integra to evaluate possibility of processing material previously below cut-off and connecting pits; potential source of oxide material to increase scale and mine life

Regional Growth

Opportunity: Standard Mine (south of Florida Canyon) produced >220kcozs Au between 2004-2015, situated within same productive geological structure; no recent drilling at Standard Mine, limited drilling between Standard Mine and Florida Canyon; drill targets identified

Florida Canyon Mine: Growth Drilling

Drilling designed to support an updated mineral reserve & resource and life-of-mine plan expected in 2026

Drill Program Highlights

Opportunity 1: Near-surface oxide potential from historical dumps

- Targeting large volumes of historical gold-mineralized backfill and low-grade waste material previously estimated to be below the mining cut-off grade in a significantly lower gold price environment; greatest near-term opportunity to increase mineral resources and potentially extend mine life.

Opportunity 2: Expand in-situ resources between existing mine open pits

- Targeting “saddle/ridge” areas located between active and historical pits. Many of these areas sparsely drilled historically and offer meaningful oxide growth potential directly adjacent to current and future mining phases.

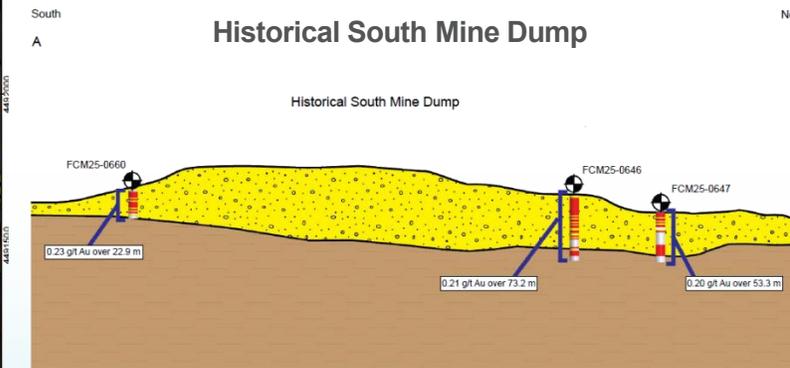

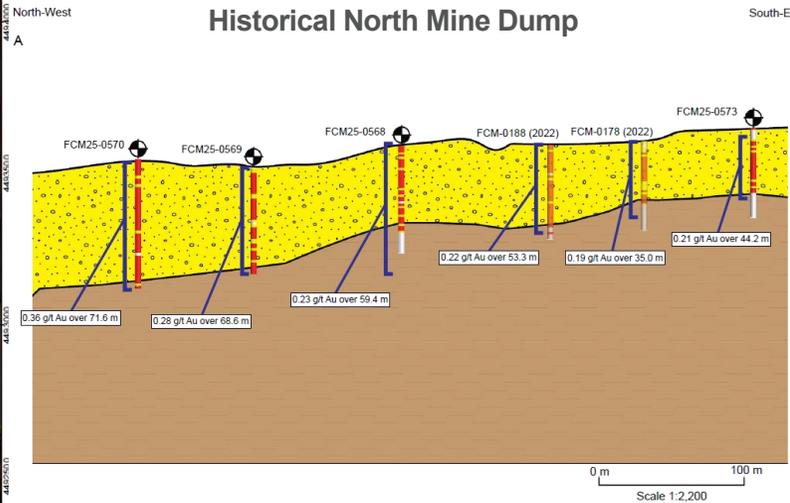

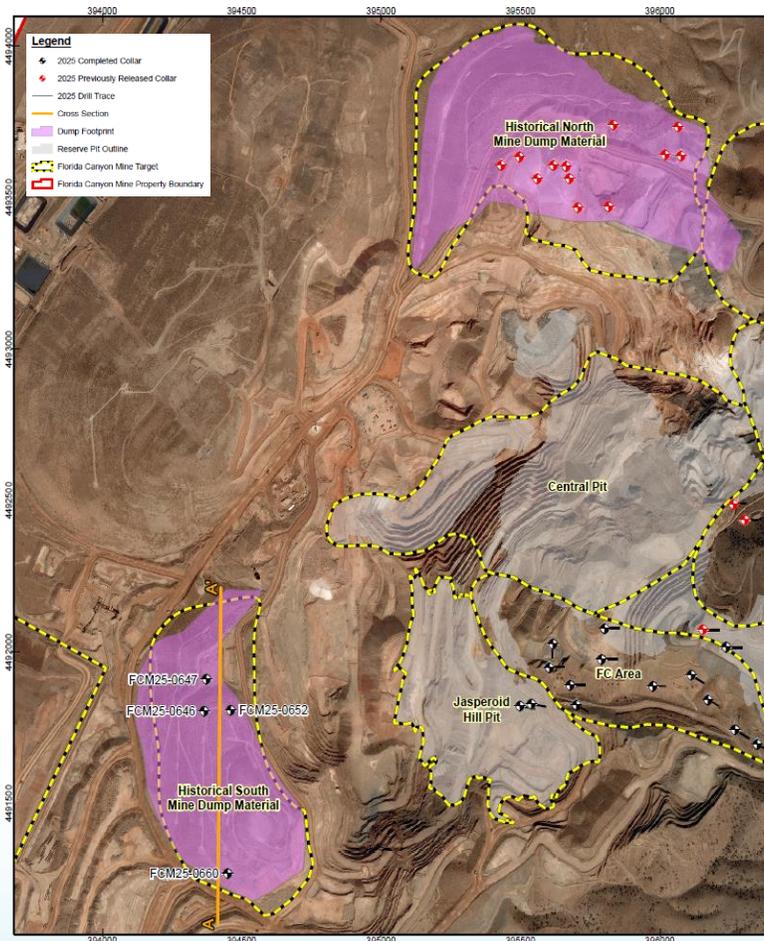

Opportunity 3: Test lateral extensions and in-pit infill

- Targeting lateral extensions of existing pits and infill drilling within areas planned for further pit pushbacks. Potential identified to improve resource classification, optimize mine planning, and increase short-term ore feed.

Florida Canyon Mine: North & South Dump Results

Drilling results and preliminary volume / grade estimates underscore near-term growth potential¹

| Conceptual Estimates ¹ | Volume (Mt) | Grade (g/t Au) |
|-----------------------------------|-----------------|---------------------|
| North Dump | ~19 - 32 | ~0.11 - 0.25 |
| South Dump | ~15 - 24 | ~0.11 - 0.25 |
| Combined | ~34 - 56 | ~0.11 - 0.25 |

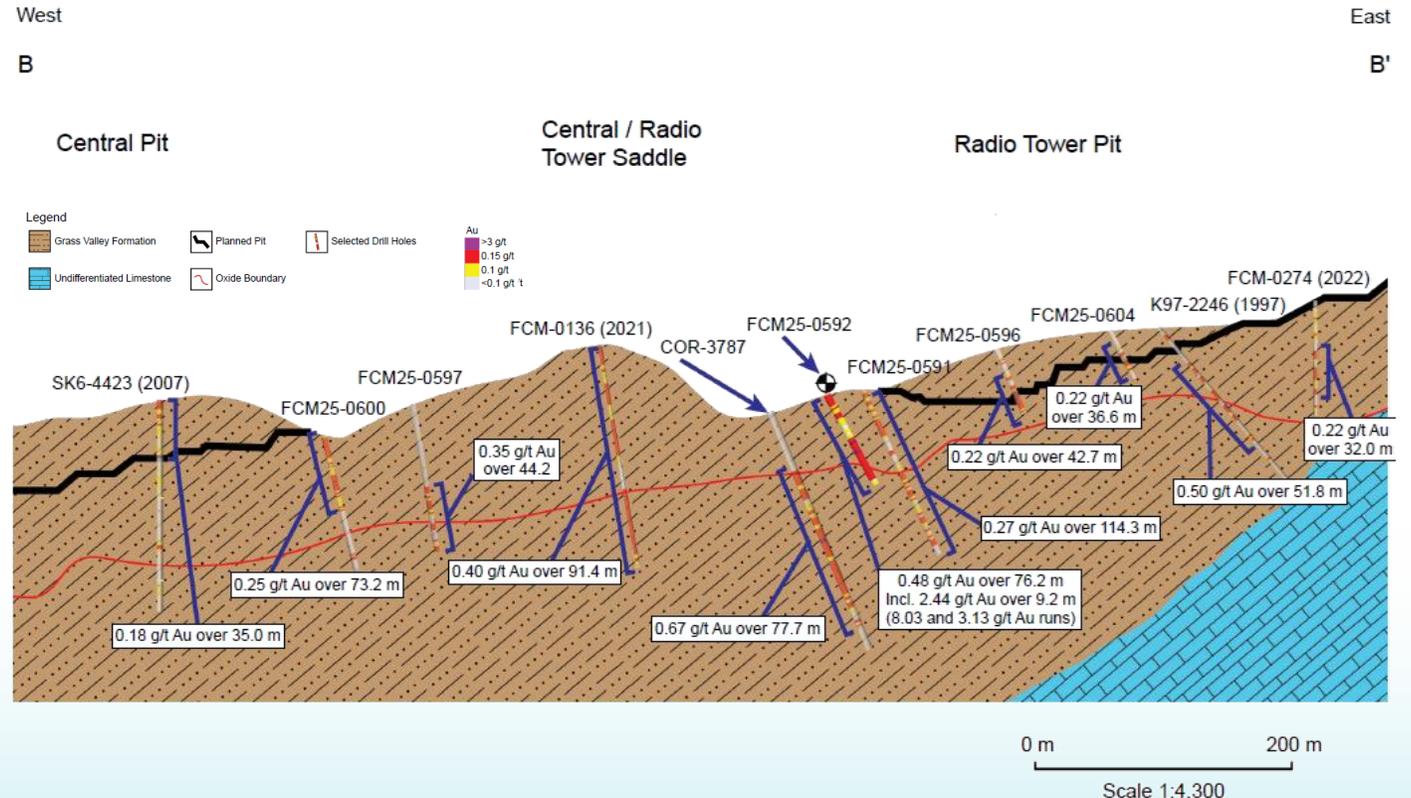

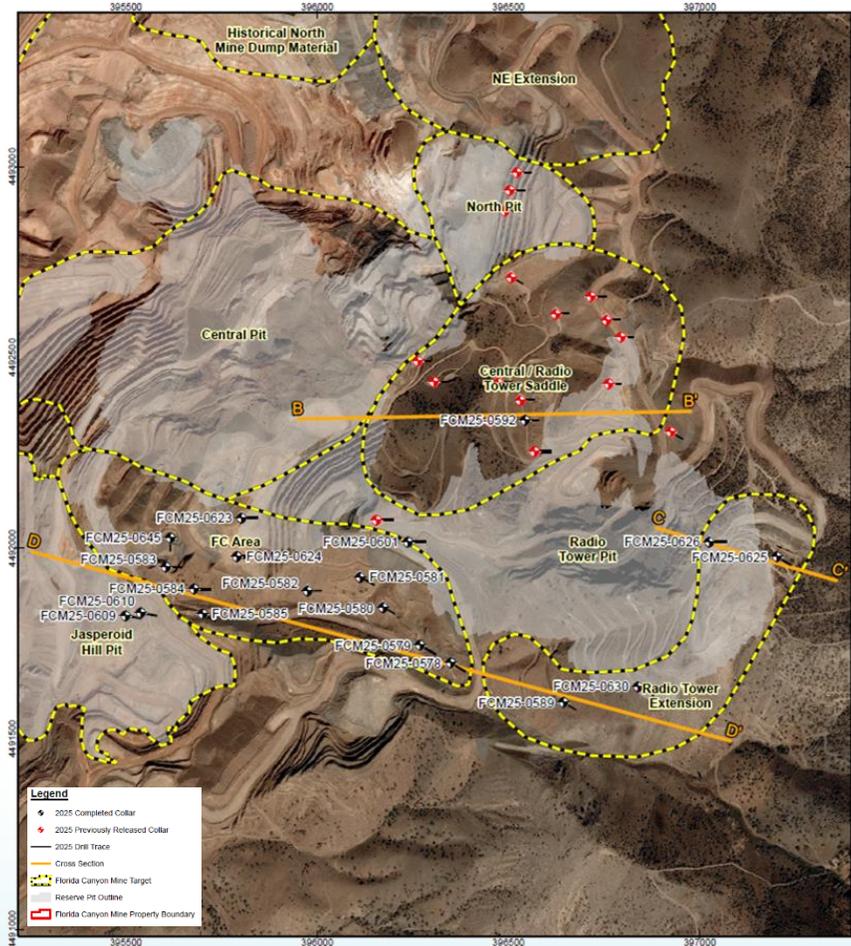

Commentary¹

- Material originally mined from the late-1980s to mid-1990s when gold prices were US\$325 - \$450/oz and cut-off grades were 0.28 - 0.34 g/t Au
- Tonnage ranges derived from an estimated mineable percentage of the total volume calculated from 3D surfaces and an approximation of the volume of material exceeding the current mining cut-off grade

Florida Canyon Mine: Inter-Pit Results

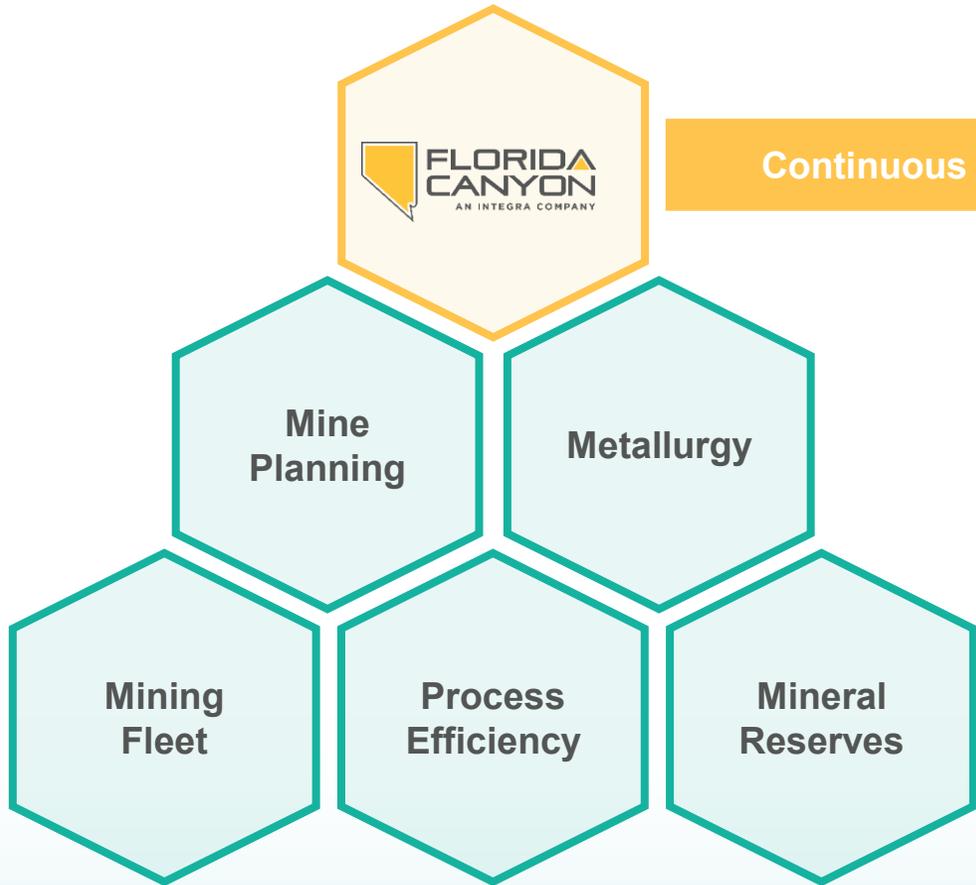

Inter-Pit areas between active and historical pits offer meaningful growth potential adjacent to current mining area

Results confirm broad, near-surface intervals of gold mineralization with consistent gold grades and heap leach potential; Central/Radio Tower Saddle areas show best potential

Florida Canyon Mine: Updated 2026 Technical Report

Ongoing optimization studies, trade-off analysis, and growth drilling to be reflected in an updated NI 43-101 study mid-2026

Continuous improvement and growth initiatives across mining operation

DeLamar Project

Idaho, USA

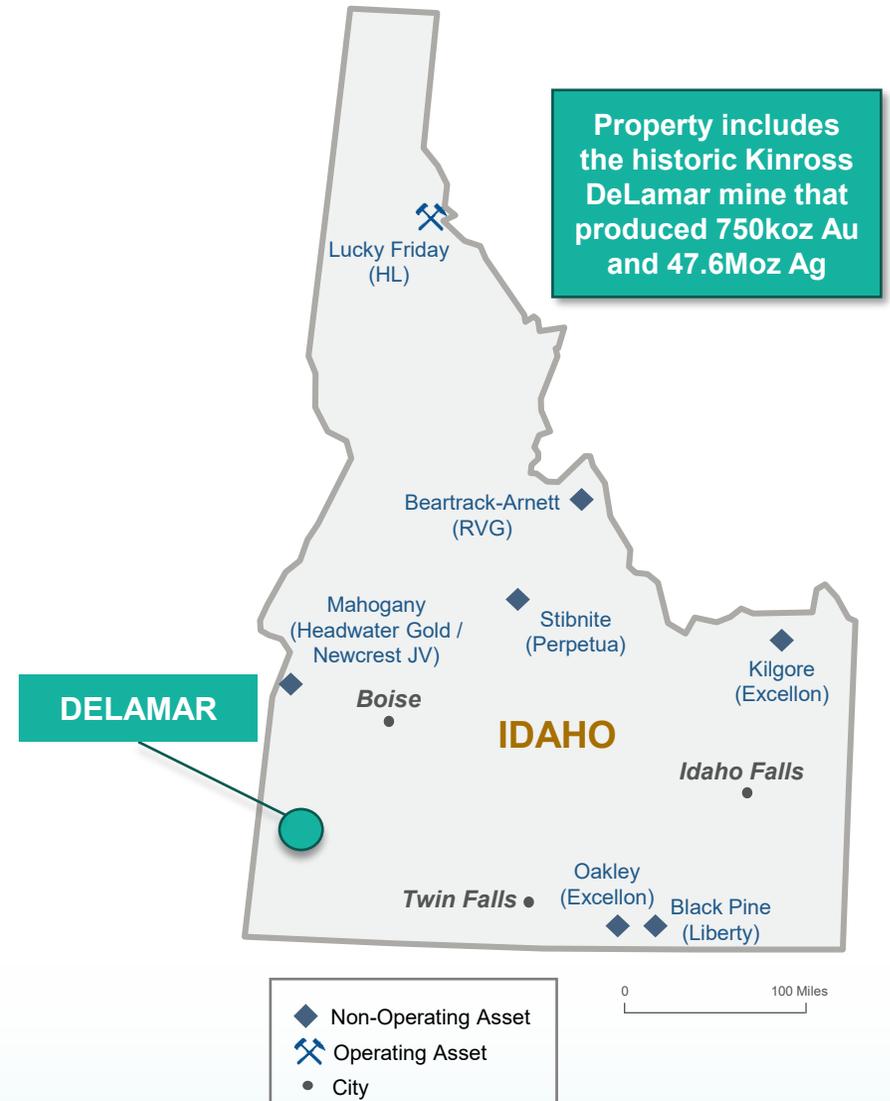

DeLamar Heap Leach Project: Overview

Summary¹

- 100% owned gold-silver project in southwestern Idaho, 80 km southwest of the city of Boise; consists of DeLamar and Florida Mountain deposits
- Project was acquired from Kinross in 2017 (operated in the late 1990s); since acquisition Integra has completed a numerous mineral resource and reserve updates, a PEA in 2019, a PFS in 2022 and a Feasibility Study in 2025
- **Total defined resource of 1.9Mozs AuEq Proven & Probable, 4.6Mozs AuEq Measured & Indicated and 0.6Mozs AuEq Inferred**
- DeLamar is one of the most advanced heap-leach development projects in the United States; federal permitting begins in 2026 with 15-month NEPA process culminating in Record of Decision expected in 2027

Mineral Reserves & Resources¹

| Category | Tonnes (Mt) | Gold Grade (g/t) | Silver Grade (g/t) | Gold Ounces (koz) | Silver Ounces (Moz) |

Cash Flow Profile¹

DeLamar Heap Leach Project: Next Steps

Early works underway to fund procurement, land acquisition, and other low-risk activities to reduce execution risk at DeLamar

Next Steps

- ➔ **Permitting:** Ongoing work with the BLM to determine Federal/NEPA permitting schedule
- ➔ **Pre-production capital investment:** begin pre-production projects including procurement work, early works, and strategic land purchase
- ➔ **Project financing preparation:** kick-off discussions and analysis in 2026
- ➔ **Engineering and optimization:** advancing detailed engineering and execution planning

February 2026 Financing Overview

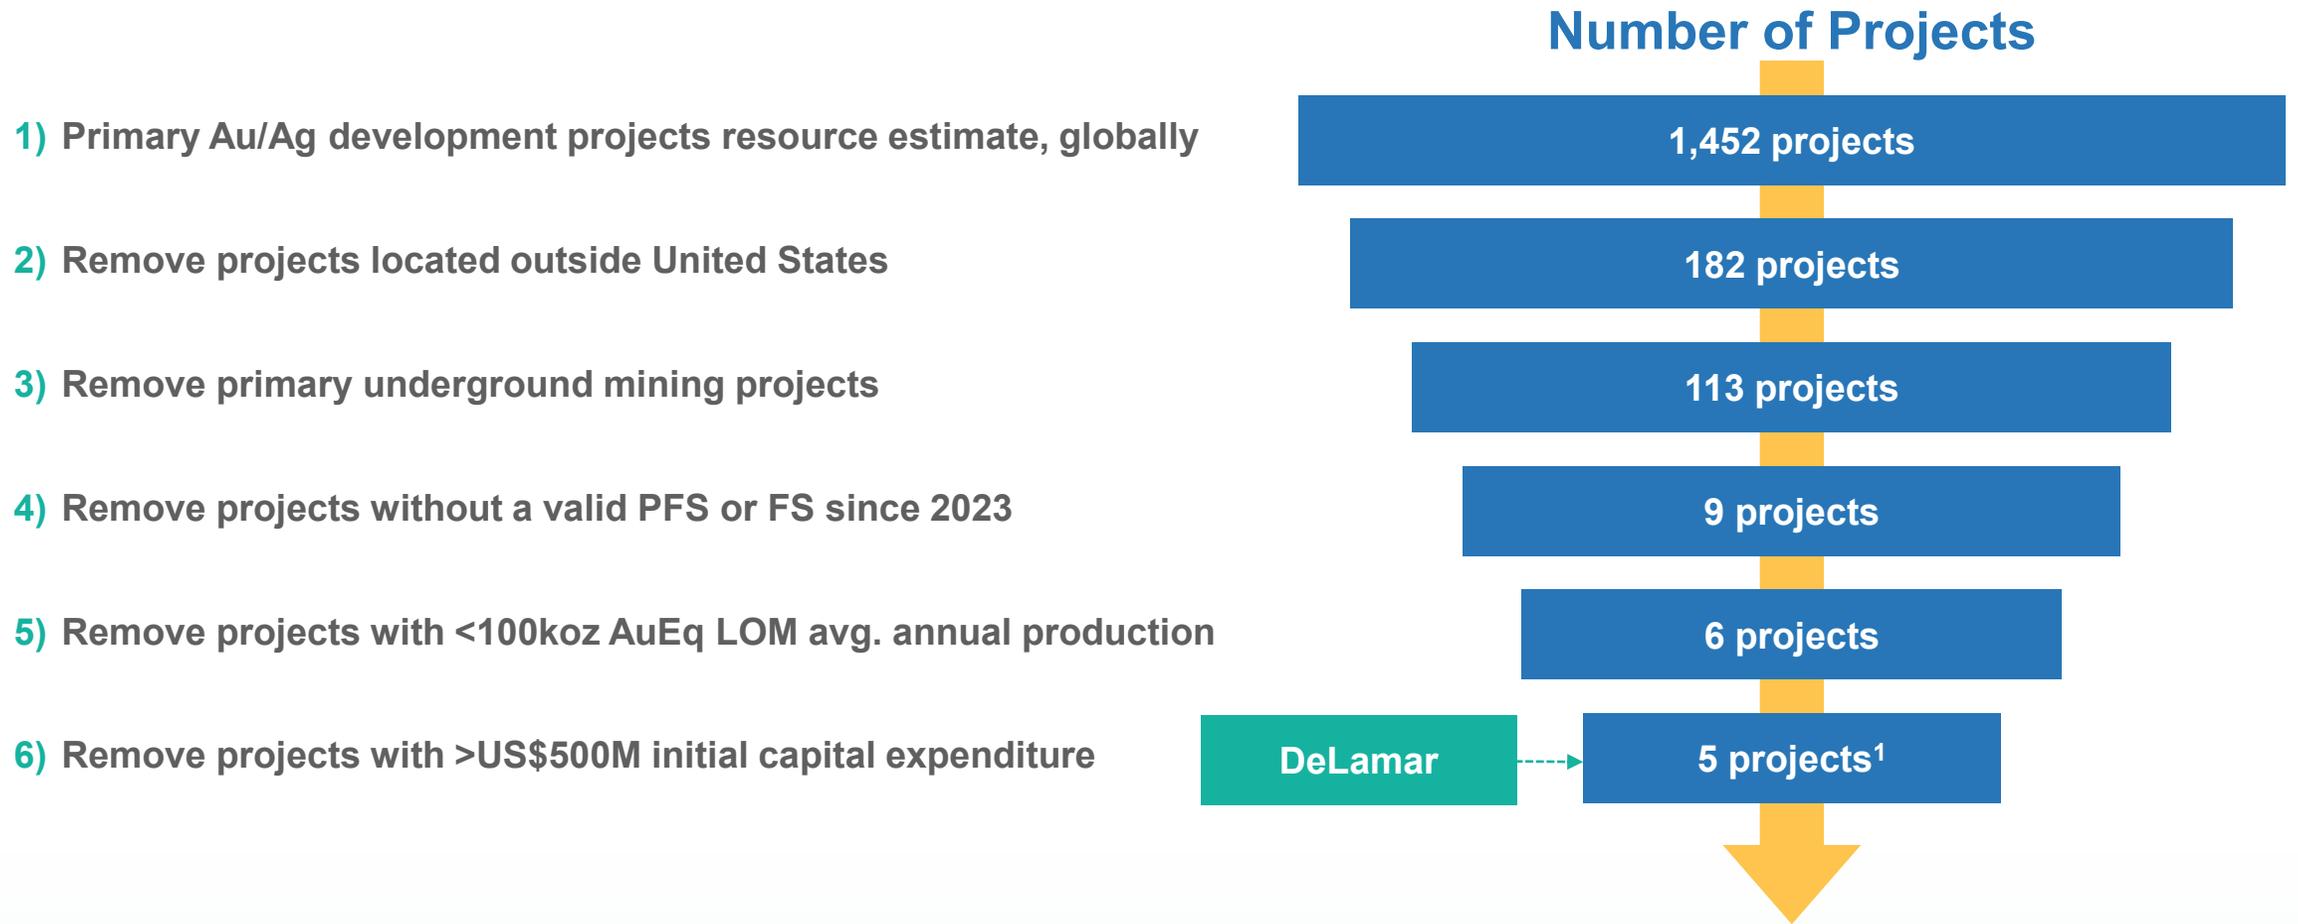

US\$61M Bought Deal Financing – Use of Proceeds Breakdown

| | |
|--------------------------|----------|
| 2026 Early Works Program | ~\$16.0M |
| 2026 Procurement Works | ~\$12.0M |
| Land Acquisition | ~\$12.5M |
| 2027 Early Works Program | ~\$4.5M |
| 2027 Procurement Works | ~\$12.5M |

February 2026 financing enhances project readiness, lowers future financing risk, and supports a more efficient path toward a construction decision

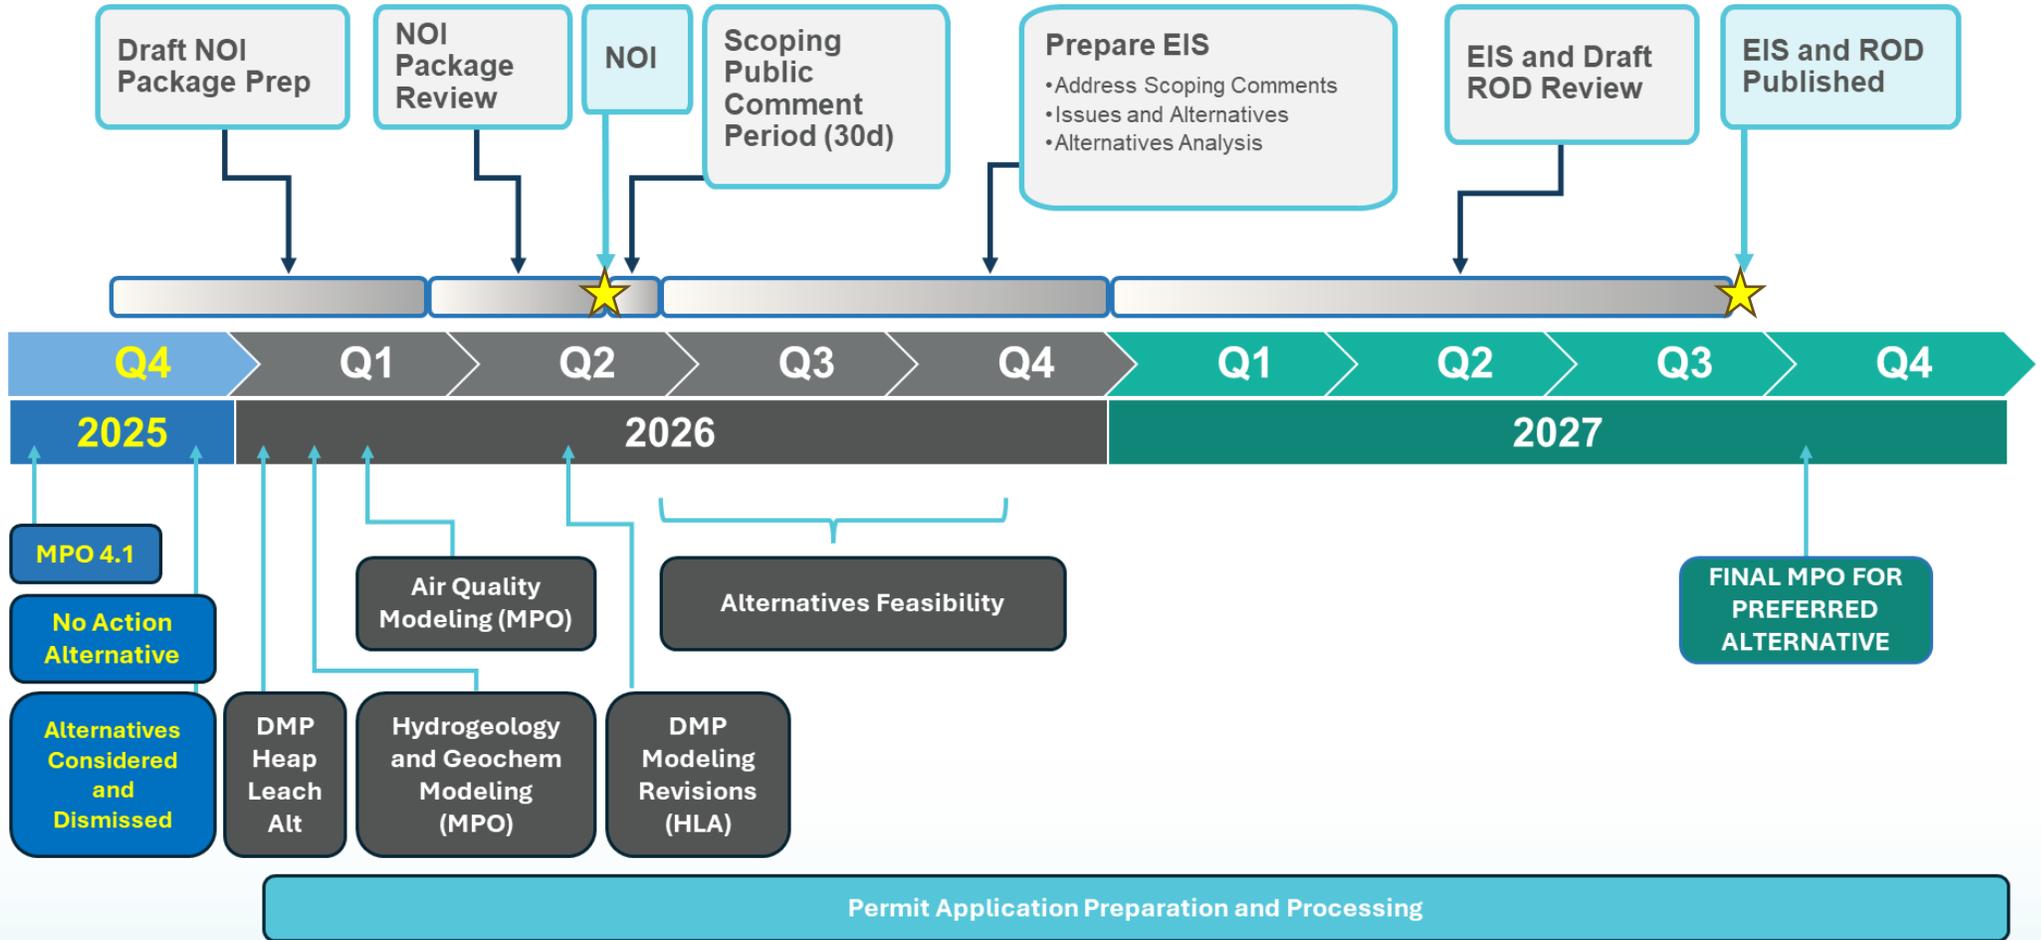

DeLamar Heap Leach Project: Significant Scarcity Value

DeLamar stands among a select group of U.S. gold-silver projects in advanced development and permitting

DeLamar Heap Leach Project: NEPA Permitting Schedule

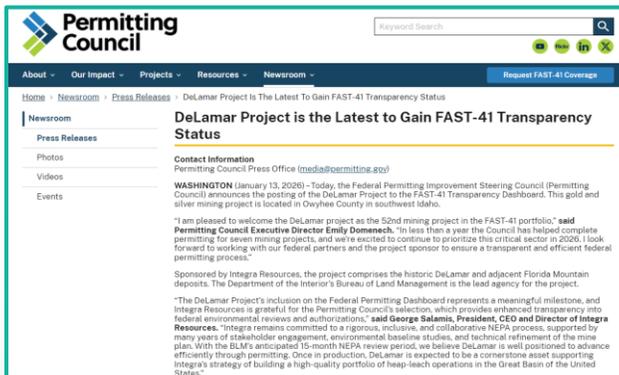

USA Project Advancement: The Right Time

DeLamar selected for FAST-41 Transparency Projects Program in January 2026

Immediate Measures to Increase American Mineral Production Executive Order:

- Executive Order signed by President Donald Trump in March 2025
- Aimed at boosting domestic critical mineral production (including gold), reducing reliance on foreign adversaries, and solidifying pathway toward mineral independence
- Specific initiatives include fast-tracking permits, expanding land access, clarifying the Mining Act, mobilizing capital and strategic stockpiling and procurement for domestic minerals

Fast-41 Transparency Projects Program:

- DeLamar selected for in January 2026 for FAST-41 Transparency Projects Program
- Dashboard is designed to enhance federal permitting transparency, coordination, and accountability through the U.S. Federal Permitting Improvement Steering Council
- Key benefits for DeLamar: accelerated decision making, enhanced process certainty and predictability, and improved federal support and oversight.

Integra & Shoshone-Paiute: DeLamar Relationship Agreement

Relationship Agreement aligns interests of Integra and a federally recognized Tribal Nation to develop DeLamar Project

Agreement Overview

- **Business-driven:** mutually beneficial arrangement to advance DeLamar operating as a partnership.
- **Established framework:** key components: Stewardship, Economic Participation, Governance, Life-of-Mine Commitment.
- **5+ years in the making:** extensive in-person engagement, site visits, consultation on mine design/baseline studies, and community meetings.

Benefits to Integra

- **Enhanced position:** Agreement driven by predictability, efficiency, and partnership for the development of DeLamar.
- **Interest alignment:** incorporates key Tribal cultural, environmental and economic interests into mine plan; increased predictability for DeLamar milestones.
- **Reputation & brand building:** ability to successfully mitigate project risks and foster reputation for respectful business practices benefits current/future operations.

Nevada North Project

Nevada, USA

Nevada North Heap Leach Project: Overview

Summary¹

Wildcat Deposit:

- PEA stage, low-sulphidation epithermal gold-silver deposit located in the Farrell Mining District, Nevada, ~56km from the town of Lovelock; 17,612-acre land package including 916 unpatented and 4 patented claims
- **Total defined resource of 829koz AuEq M&I and 235koz AuEq Inferred**

Mountain View Deposit:

- PEA stage, low-sulphidation epithermal gold-silver project located in the Deephole Mining District, Nevada, ~24km from the town of Gerlach; 5,476-acre land package, consisting of 284 unpatented claims
- **Total defined resource of 622koz AuEq M&I and 63koz AuEq Inferred**

Combined Mineral Resources¹

| Category | Tonnes (Mt) | Gold Grade (g/t) | Silver Grade (g/t) | Gold Ounces (koz) | Silver Ounces (Moz) |

Production Profile

Wildcat Heap Leach Deposit: Exploration Potential

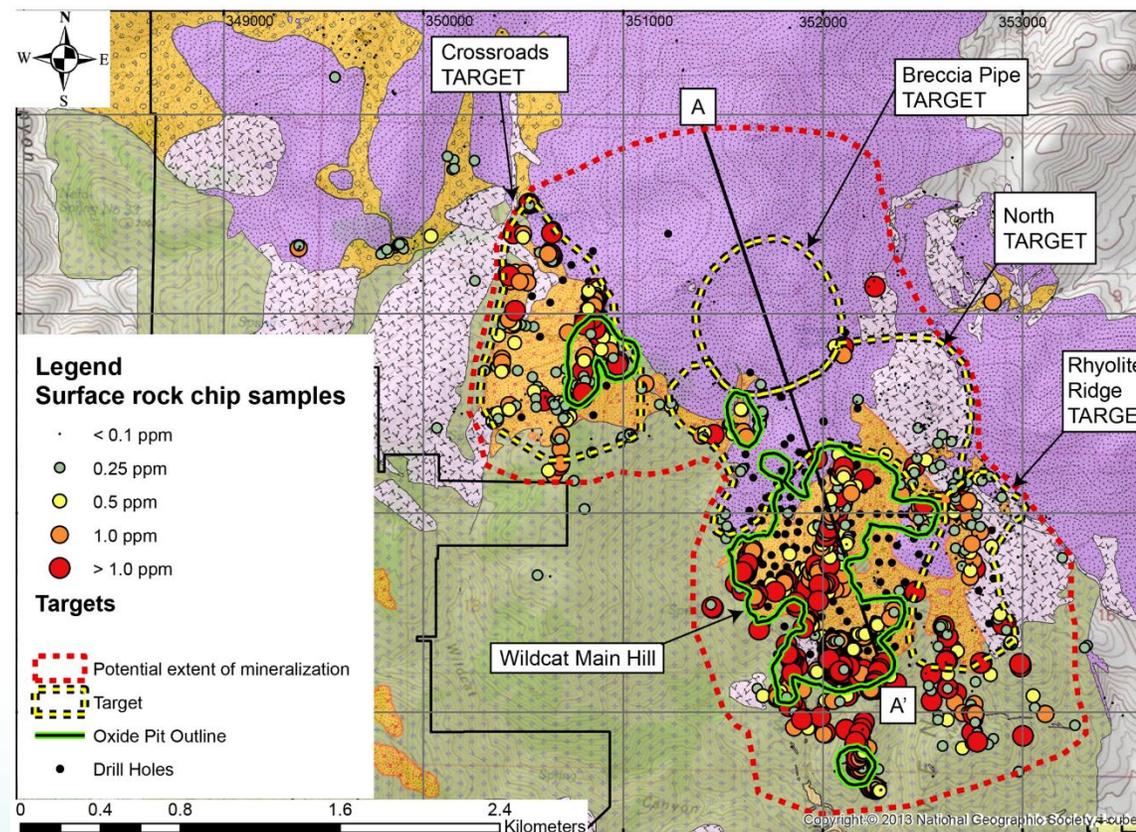

Wildcat is located ~30 miles away from currently operating Florida Canyon mine and demonstrates solid growth potential

Commentary

- Mineralized targets discovered at surface outside the current pit; surface samples collected in 2022 returned grades up to 30 g/t oxide Au
- Mineralized footprint at Wildcat was significantly expanded in 2022 to ~3.0km x 2.0km (previously 1.5km x 1.5km)
- Wildcat has only been drilled on ~5-acres of total +17,000-acre land package
- EPO (submitted to BLM) to allow for 400 acres of surface disturbance vs. 5-acre disturbance limit under current Notice of Operation (NOO)

Mineralized tuff breccia (orange) wraps beneath post-mineral basalts (purple) demonstrating exploration upside to adjacent to 2023 PEA pit

Wildcat Surface Samples

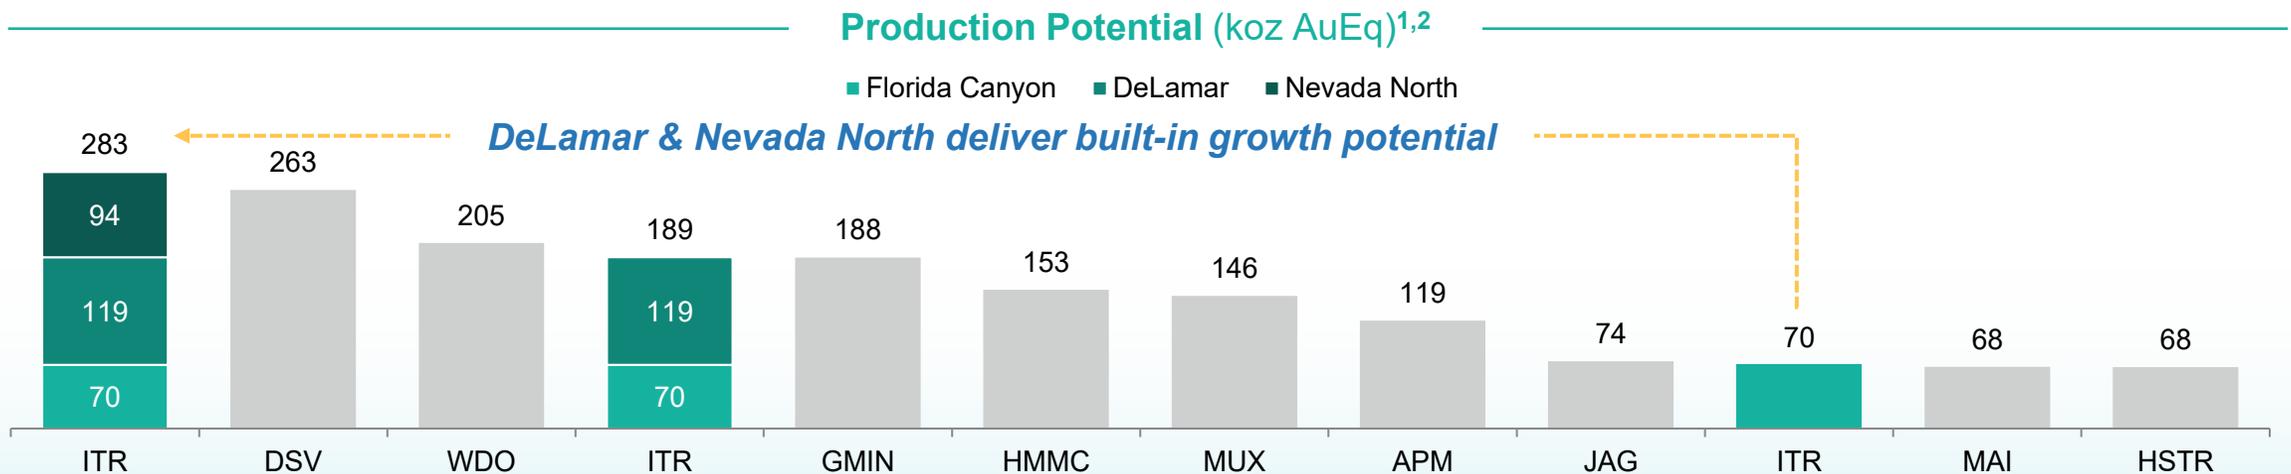

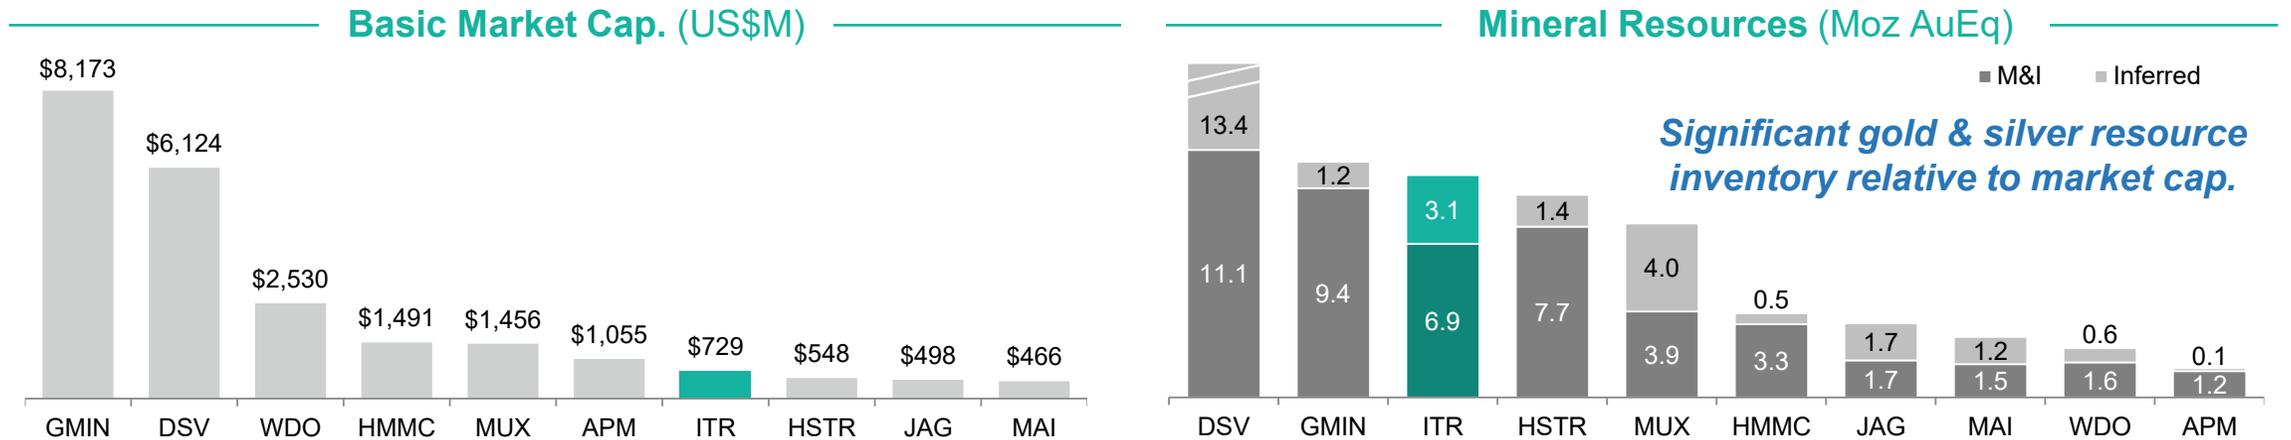

Integra's Value Proposition

Relative Positioning: Cash Flow, Resource Scale & Growth Potential

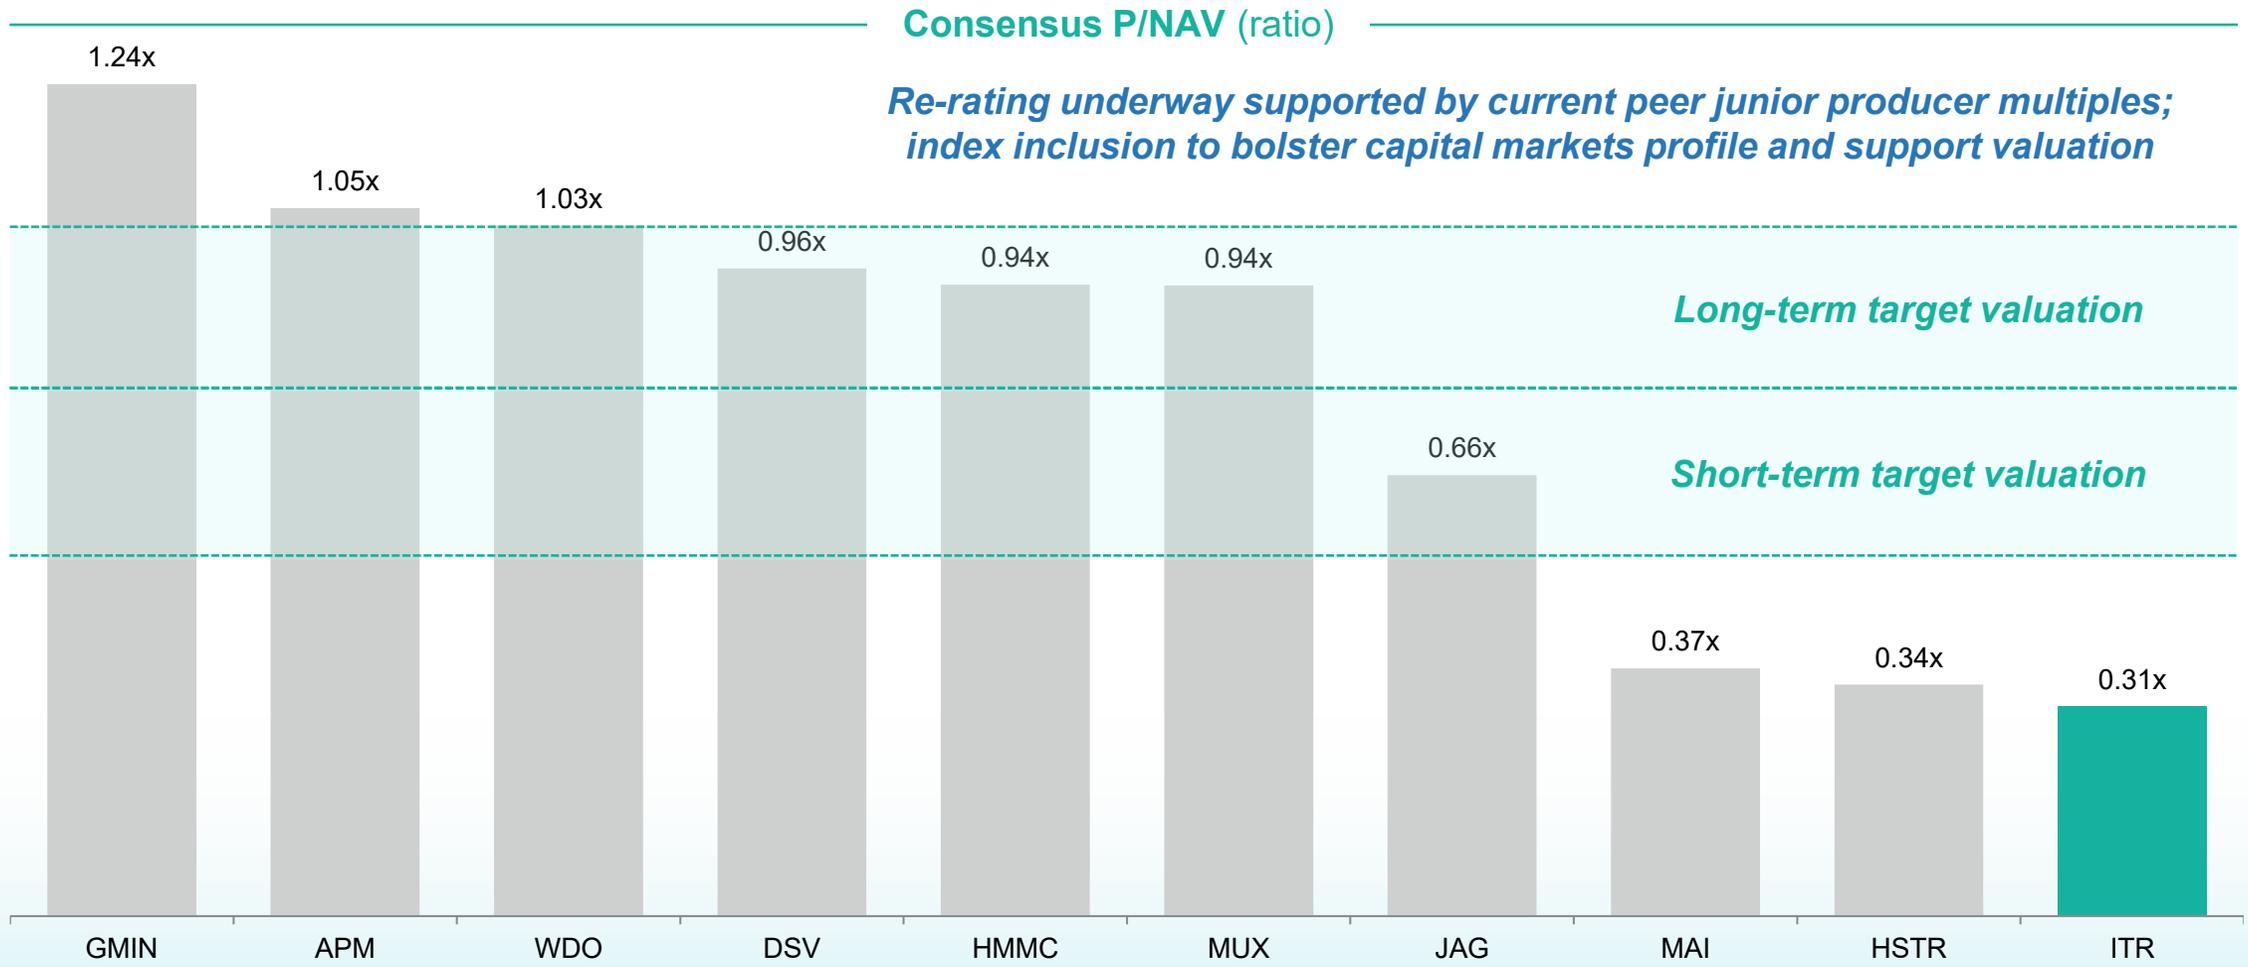

Production and cash flow from Florida Canyon supports built-in growth pipeline: DeLamar and Nevada North

Note: Gold equivalent using US\$3,000/oz Au and US\$35/oz Ag; Refer to NI 43-101 technical report titled "Technical Report Florida Canyon Gold Mine, Pershing County, Nevada, USA", dated July 11, 2024, with an effective date of June 28, 2024, Refer to NI 43-101 technical report titled "Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025, and NI 43-101 technical report titled "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023, all available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at <https://www.sec.gov>; PEA is preliminary in nature; it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA will be realized; 1. Peer estimates based on average 2026E-2027E consensus production estimates; 2. Production potential based on Yr 1-5 average for Florida Canyon, DeLamar, and Nevada North as described in detail within each respective technical report.

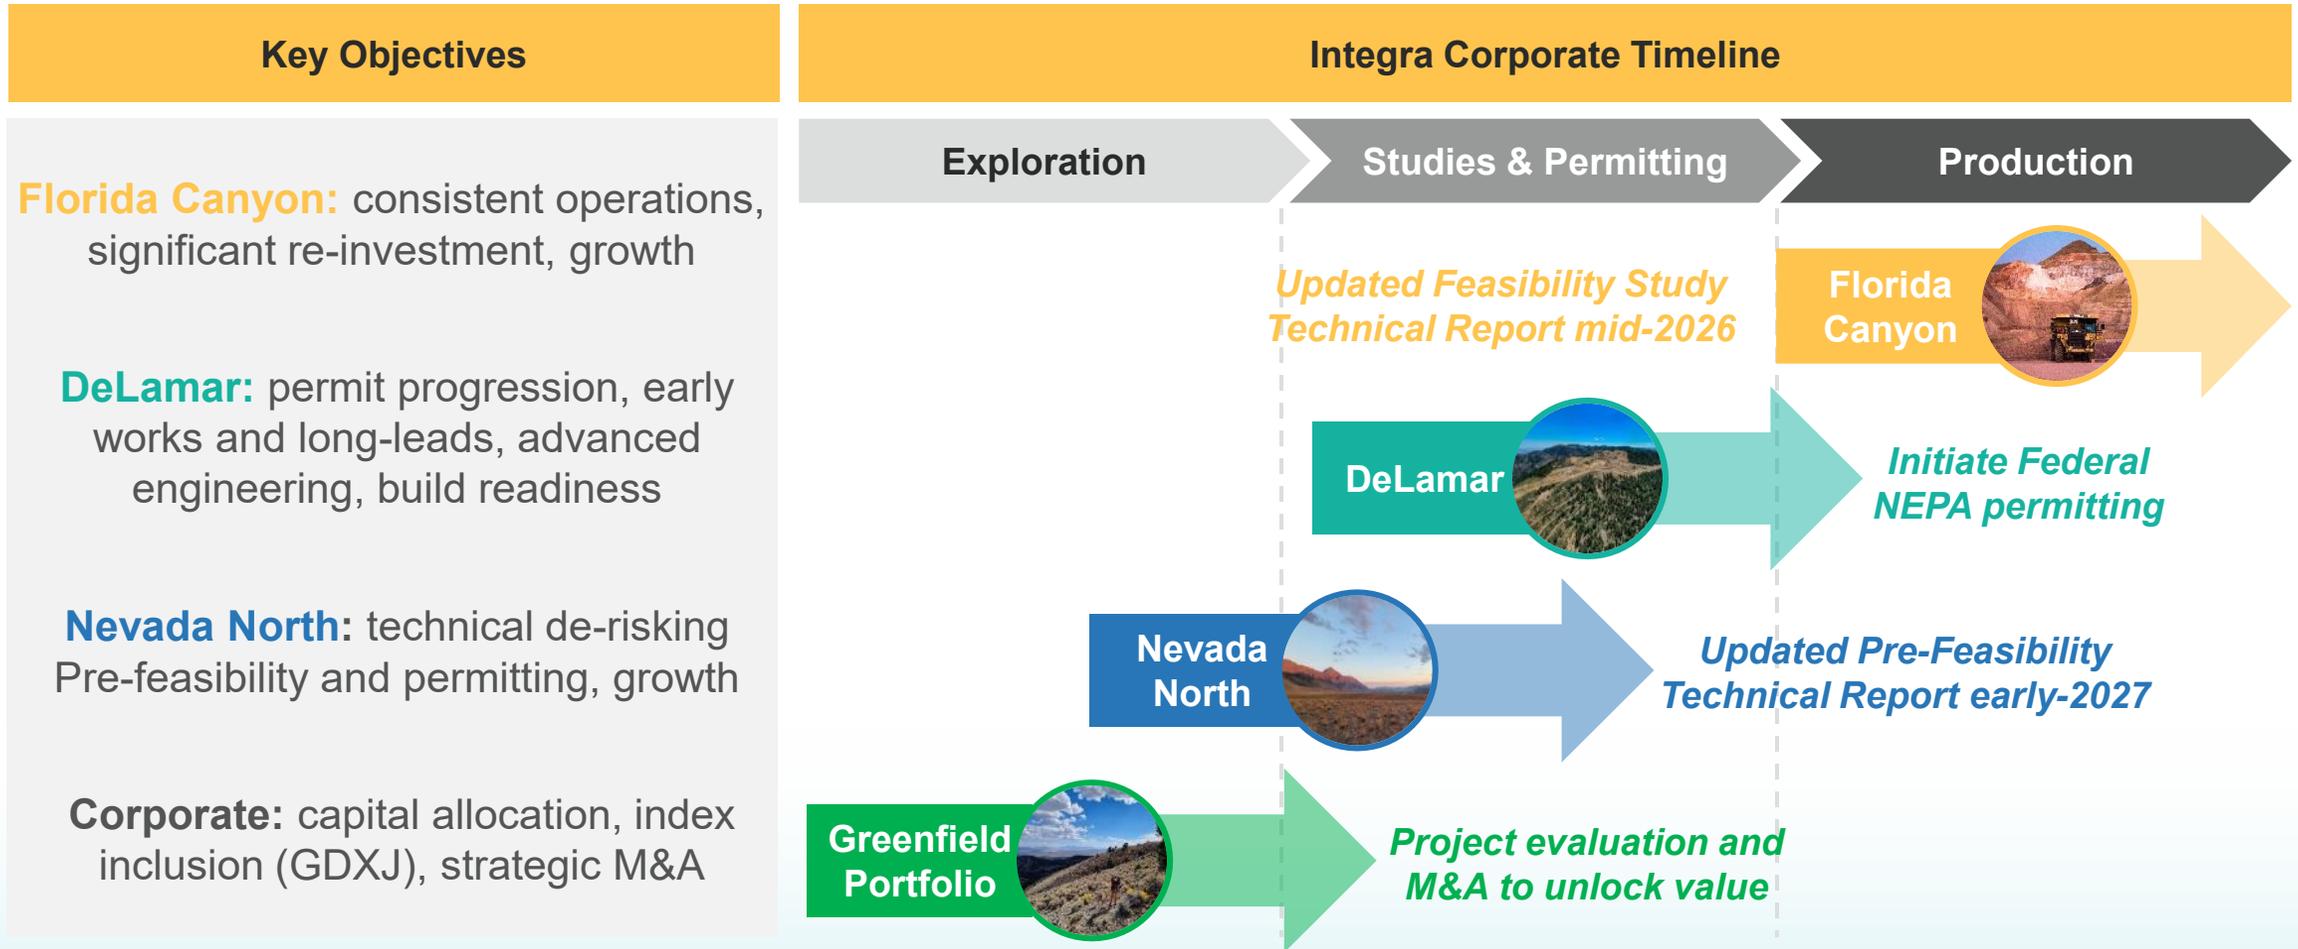

Relative Positioning: Closing the Valuation Gap

Re-rating driven by consistent production and cash flow from Florida Canyon and advancement of development portfolio

Next Steps & Corporate Timeline

Near term success through profitability, rapid project advancement, disciplined capital allocation, and strategic M&A

Building a Mid-tier Precious Metals Producer

| | |
|-----------------------------------|---|
| Production & Cash Flow | Florida Canyon delivers consistent production and cash flow delivering exposure to the strong gold price environment; excellent potential for mine life extension |
| Growth Pipeline | Cash flow from Florida Canyon supports built-in growth pipeline via DeLamar and Nevada North; clear pathway to significantly growing annual production profile |
| Resource Scale | Peer leading resource inventory with 6.9Moz AuEq M&I and 3.1Moz AuEq Inf. ¹ across three high-quality assets, each with untapped exploration potential |
| Jurisdiction | Scarcity of advanced assets in the USA; portfolio creates potential 20+ year mining platform within Great Basin; opportune time to be advancing projects in USA |
| Team | Strengthened leadership well positioned to optimize Florida Canyon and advance DeLamar, Nevada North; support from large institutions and strategic investors |
| Attractive Valuation | Integra trades at a discount to junior producer peers; unique value proposition driven by combination of production and development focused within Great Basin of the USA |

RESOURCES

Board of Directors & Advisors

Board of Directors with deep industry knowledge and strong governance to support the execution of Integra's strategy

Anna Ladd-Kruger

Chair of Board

- +25 years of experience
- Recent board experience with SilverCrest Metals and 1911 Gold; former CFO at McEwen Mining

Ian Atkinson

Director

- +50 years of experience
- Former CEO at Centerra; experience with Hecla, Kinross, Noranda; involved in several major discoveries

Carolyn Clark Loder

Director

- +30 years of experience
- U.S. National Mining Hall of Fame; led mineral rights and tribal relations for Freeport McMoRan

Timo Jauristo

Director

- +35 years of experience
- Former Executive, VP at Goldcorp and Placer Dome; involved in or led numerous notable transactions

C.L. "Butch" Otter

Director

- Served as the 32nd Governor of Idaho from 2007 to 2019
- Pre-politics: 30+ years as a business leader including President of Simplot

Janet Yang

Director

- +20 years of experience
- Current CFO at Reveam; previously with GMT Capital and served on Board of Argonaut Gold

Leonard Kosinski

Advisor

- +30 years of experience
- Retired 3-star U.S. Air Force General; recently worked with Department of Defense and the Pentagon

Corporate Outlook

Focused on optimization and capital investment at Florida Canyon and significant advancement of development projects

Guidance Summary

| | | |
|--|------------|-------------------|
| 2026 Florida Canyon Mine: gold production | ounces | 70,000 - 75,000 |
| 2027 & 2028 Florida Canyon Mine: gold production | ounces | 80,000 - 90,000 |
| 2026 Florida Canyon Mine: total cash cost ¹ | \$/oz sold | \$1,900 - \$2,100 |
| 2026 Florida Canyon Mine: mine-site all in sustaining cost (“AISC”) ¹ | \$/oz sold | \$2,750 - \$2,950 |
| 2026 Florida Canyon Mine: sustaining capital expenditures and leases | \$M | \$62.0 - \$68.0 |
| 2026 Florida Canyon Mine: growth capital expenditures | \$M | \$7.5 - \$9.5 |
| 2026 DeLamar & Nevada North Projects: project advancement | \$M | \$35.0 - \$40.0 |
| 2026 DeLamar: pre-production, early works, land acquisition | \$M | \$38.0 - \$42.0 |
| Corporate: general and administrative expenses ² | \$M | \$8.5 - \$9.0 |

Florida Canyon: 2026 represents a capital-intensive year of the long-term continuous improvement plan. Major investments are underway in key areas including a heap leach pad expansion, increased / catch-up capitalized waste stripping, a revitalized mobile equipment fleet, and growth

DeLamar & Nevada North: Integra remains committed to advancing its flagship development-stage heap leach projects. Efforts at DeLamar are focused on federal permit advancement, early-works capital investment, and construction readiness. Nevada North will see growth and resource conversion drilling and work begin for a Pre-feasibility study expected to be released in early 2027.

Non-GAAP Financial Measures

Cautionary Note Regarding Non-GAAP Financial Measures

The Company has included herein certain performance measures (“**non-GAAP measures**”) which are not specified, defined, or determined under generally accepted accounting principles (in our case, International Financial Reporting Standards, or “**IFRS**”). These are common performance measures in the gold mining industry, but because they do not have any mandated standardized definitions, they may not be comparable to similar measures presented by other issuers. Accordingly, we use such measures to provide additional information and you should not consider them in isolation or as a substitute for measures of performance prepared in accordance with generally accepted accounting principles (“**GAAP**”).

Please see the information under the heading “Non-GAAP Financial Measures” in the Company’s management’s discussion and analysis for the financial period ended September 30, 2025, which section is incorporated by reference in this presentation, for a description of non-GAAP measures related to the Company’s Florida Canyon mine. The Company’s management’s discussion and analysis may be found on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.

Florida Canyon

Cash Cost

Cash costs are a non-GAAP measure that includes production costs, royalties and excise taxes and certain non-cash adjustments for production costs on sale of acquired inventories, less silver revenue. Management uses this measure to monitor the performance of its mining operation and ability to generate positive cash flow on a site basis.

All-In Sustaining Cost (“AISC”)

AISC is a non-GAAP measure that starts with cash costs and includes general and administrative (“**G&A**”) costs, reclamation accretion expense and sustaining capital expenditures. Management uses this measure to monitor the performance of its mining operation and ability to generate positive cash flow on an overall company basis.

DeLamar & Nevada North

Cash Cost

Cash costs include site operating costs (mining, processing, site G&A), refinery costs and royalties, but excludes head office G&A and exploration expenses. While there is no standardized meaning of the measure across the industry, the Company believes that this measure is useful to external users in assessing operating performance.

AISC

Site level AISC includes cash costs and sustaining and expansion capital, but excludes head office G&A and exploration expenses. The Company believes that this measure is useful to external users in assessing operating performance and the Company’s ability to generate free cash flow from potential operations.

Florida Canyon Mine: Notes to Mineral Reserve & Resource Estimate

Notes to Mineral Reserves:

1. Mineral reserve estimate has been converted into metric tonnes from short tons using a factor of 0.9072.
2. Mineral reserves are reported at the point of delivery to the process plant, using the 2014 CIM Definition Standards, with an effective date of December 31, 2024. The qualified person as defined under National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) for the estimate is Ms. Terre Lane, MMSA QP, a Global Resource Engineering, Ltd. employee.
3. Mineral reserves are constrained within an open pit design that uses the following assumptions: gold price of US\$1,800/oz considering only oxide material; gold recoveries varied by deposit and ore type, ranging from 45% to 64%; reference mining cost of \$2.74/t mined in-situ and \$2.08/t mined fill; processing cost of \$4.97/t processed for oxide crushed material and \$2.67/t for oxide run-of-mine (“ROM”) material; G&A costs of \$1.20/t ore processed; treatment and refining costs of \$6.57/oz gold recoverable; royalty costs of \$88.00/oz gold recoverable; and pit slope inter-ramp angles ranged from 38–42° for rock and 30° for alluvium / fill.
4. Mineral reserves are reported at a cut-off grade ranging from 0.13 g/t to 0.20 g/t.
5. Mineral reserves include a stockpile of 1,934 kt at an average grade of 0.19 g/t and total contained gold of 11.57 koz.
6. Mineral reserves include Heap Leach Inventory of 3,548 kt at an average grade of 0.29 g/t and total contained gold of 32.58 koz.
7. Numbers have been rounded and may not sum.

Notes to Mineral Resources:

1. Mineral reserve estimate has been converted into metric tonnes from short tons using a factor of 0.9072.
2. Mineral resources are reported, using the 2014 CIM Definition Standards, with an effective date of December 31, 2024. The qualified person as defined under NI 43-101 for the estimate is Ms. Terre Lane, MMSA QP, a Global Resource Engineering, Ltd. employee.
3. Mineral resources are reported inclusive of those mineral resources converted to mineral reserves. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
4. Mineral resources are constrained within a conceptual open pit shell that uses the following assumptions: gold price of US\$1,800/oz; gold recoveries ranging from 45% to 64% for oxides and 80% for sulfides; reference mining cost of \$2.74/t mined in-situ and \$2.08/t mined fill; processing cost of \$4.97/t processed for oxide crushed material and \$2.67/t processed for oxide ROM material; processing cost of \$23.15/t processed for sulfide material; general and administrative costs of \$1.20/t processed; treatment and refining costs of \$6.57/oz Au recoverable; royalty of \$88.00/oz Au recoverable, and pit slope overall angles ranging from 30–36°.
5. Mineral resources are reported at a cut-off grade ranging from 0.13 g/t to 0.20 g/t for oxides and is 0.56 g/t for sulfides.
6. Mineral resources include a stockpile of 1,934 kt at an average grade of 0.19 g/t and total contained gold of 11.57 koz.
7. Mineral resources include Heap Leach Inventory of 3,548 kt at an average grade of 0.29 g/t and total contained gold of 32.58 koz.
8. Numbers have been rounded and may not sum.

To the best of Integra Resources Corp.'s knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resources or mineral reserves included in the Florida Canyon Report inaccurate or misleading.

DeLamar Project: Notes to Mineral Reserve & Resource Estimate

Notes to Mineral Reserves:

1. All Mineral Resource estimates have been prepared in accordance with NI 43-101 standards.
2. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. Jeffrey Bickel, of RESPEC Company LLC of Reno, Nevada, is a Qualified Person as defined in NI 43-101, and is responsible for reporting Mineral Resources for the DeLamar Project. Mr. Bickel is independent of the Company.
4. "Oxide", as listed above, is an aggregate category inclusive of all material types amenable to heap-leaching, including In-Situ Oxide, Stockpiles, and In-Situ Mixed material.
5. In-Situ Oxide/Mixed and Stockpile Mineral Resources are reported at a 0.17 and 0.1 g/t AuEq cut-off, respectively, in consideration of potential open-pit mining and heap leach processing.
6. Sulphide Mineral Resources are reported at a 0.3 g/t AuEq cut-off at DeLamar and 0.2 g/t AuEq at Florida Mountain in consideration of potential open pit mining and grinding, flotation, ultra-fine regrind of concentrates, and either Albion or agitated cyanide-leaching of the reground concentrates.
7. AuEq was calculated using a price of \$2,650/oz Au and a price of \$30/oz Ag, as well as metallurgical recoveries which were variable based on spatial area and each respective oxidation zone of the deposit.
8. The Mineral Resources are constrained by pit optimizations using a price of \$2,650/oz Au, a price of \$30/oz Ag, mining cost of \$2.50/tonne, variable processing costs ranging from \$3.26-\$5.30/tonne, and metallurgical recoveries ranging from 45%-95% for Au and 15%-92% for Ag. Variable metallurgical recoveries and processing costs correspond to various material types including Oxide, Transition, Sulphide, and Stockpile materials, as well as spatial zones of the deposit with defined metallurgical characteristics. The pit optimizations also used a G&A cost of \$0.65/tonne, pad replacement cost of \$1.00/tonne for heap leach material, and refining costs of \$0.00/oz and \$0.50/oz for Au and Ag, respectively.
9. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
10. The estimate of Mineral Resources may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
11. Mineral Resources reported are inclusive of Mineral Reserves.
12. The Effective Date of the Mineral Resource Estimate is December 8, 2025

Notes to Mineral Resources:

1. All estimates of Mineral Reserves have been prepared in accordance with NI 43-101 standards and are included within the current Measured and Indicated Mineral Resources.
2. Sterling K, Watson, P.Eng., of RESPEC Company LLC of Reno, Nevada, is a Qualified Person as defined in NI 43-101, and is responsible for reporting Mineral Reserves for the DeLamar Project. Mr. Watson is independent of the Company.
3. Mineral Reserves are based on prices of \$2,000/oz Au and \$25/oz Ag. The Mineral Reserves were defined based on pit designs that were created to follow optimized pit shells created in Whittle. Pit designs followed pit slope recommendations provided by RESPEC.
4. Mineral Reserves are reported using block value cutoff grades representing the cost of processing.
5. The Mineral Reserves are constrained by pit optimizations using a price of \$2,000/oz Au, a price of \$25/oz Ag, mining cost of \$2.50/tonne, variable processing costs ranging from \$3.26-\$5.30/tonne, and metallurgical recoveries ranging from 45%-95% for Au and 15%-92% for Ag. The pit optimizations also used a G&A cost of \$0.65/tonne, pad replacement cost of \$1.00/tonne for heap-leach material, and refining costs of \$0.00/oz and \$0.50 for Au and Ag, respectively.
6. Energy prices of US\$3.50 per gallon of diesel.
7. Pit optimizations were run on a range of prices from \$500/oz Au to \$3,000/oz Au.
8. The cut-off grade for Mineral Reserves is based on economics at a "Break-Even Internal" cut-off grade for the deposits.
9. The Mineral Reserves purposes of reference is the point where material is fed into the crusher.
10. All ounces reported herein represent troy ounces, "g/t Au" represents grams per tonne gold and "g/t Ag" represents grams per tonne silver.
11. Mineral Resources reported are inclusive of Mineral Reserves
12. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
13. The estimate of Mineral Reserves may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
14. The Effective Date of the Mineral Reserves Estimate is December 8, 2025.

Nevada North Project: Notes to Mineral Resource Estimate

Notes to Mineral Resources:

1. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
2. William Lewis, P.Geo, and Alan S J San Martin, AusIMM(CP), of Micon International Limited have reviewed and validated the mineral resource estimate for Wildcat & Mountain View, respectively. Both are independent qualified persons as defined in NI 43-101.
3. The Wildcat Deposit estimate is reported for an open-pit mining scenario, based upon reasonable assumptions. The cut-off grade of 0.15 g/t Au was calculated using a gold price of US\$1,800/oz, mining costs of US\$2.4/t, processing cost of US\$3.7/t, G&A costs of US\$0.5/t, and metallurgical gold recoveries varying from 73.0% to 52.0% and silver recoveries of 18%. An average bulk density of 2.6 g/cm³ was assigned to all mineralized rock types. The Inverse Distance cubed interpolation was used with a parent block size of 15.24 m x 15.24 m x 9.144 m.
4. The Mountain View Deposit estimate is reported for an open-pit mining scenario, based upon reasonable assumptions. The cut-off grade of 0.15 g/t Au was calculated using a gold price of US\$1,800/oz, mining costs of US\$1.67/t to US\$2.27/t, processing cost of US\$3.1/t, G&A costs of US\$0.4/t, and metallurgical gold recoveries varying from 30.0% to 86.0% with a silver recovery of 20%. An average bulk density of 2.6 g/cm³ was assigned to all mineralized rock types. Inverse Distance cubed interpolation was used with a parent block size of 7.62 m x 7.62 m x 6.10 m. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
5. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
6. The estimate of mineral resources may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
7. Neither Integra Resources Corp.'s nor Micon's qualified person is aware of any known environmental, permitting, legal, title-related, taxation, socio-political, marketing, or other relevant issue that could materially affect the mineral resource estimate other than any information already disclosed in the Nevada North Report.
8. See NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023 ("Nevada North Report"), available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at <https://www.sec.gov>

DeLamar Project: Untapped Exploration Potential

~28km² of highly prospective exploration ground along strike from current ~4.8Moz AuEq M&I resource; significant non-oxide potential underlying the oxide-mixed resource at DeLamar and Florida Mountain¹

BlackSheep Target

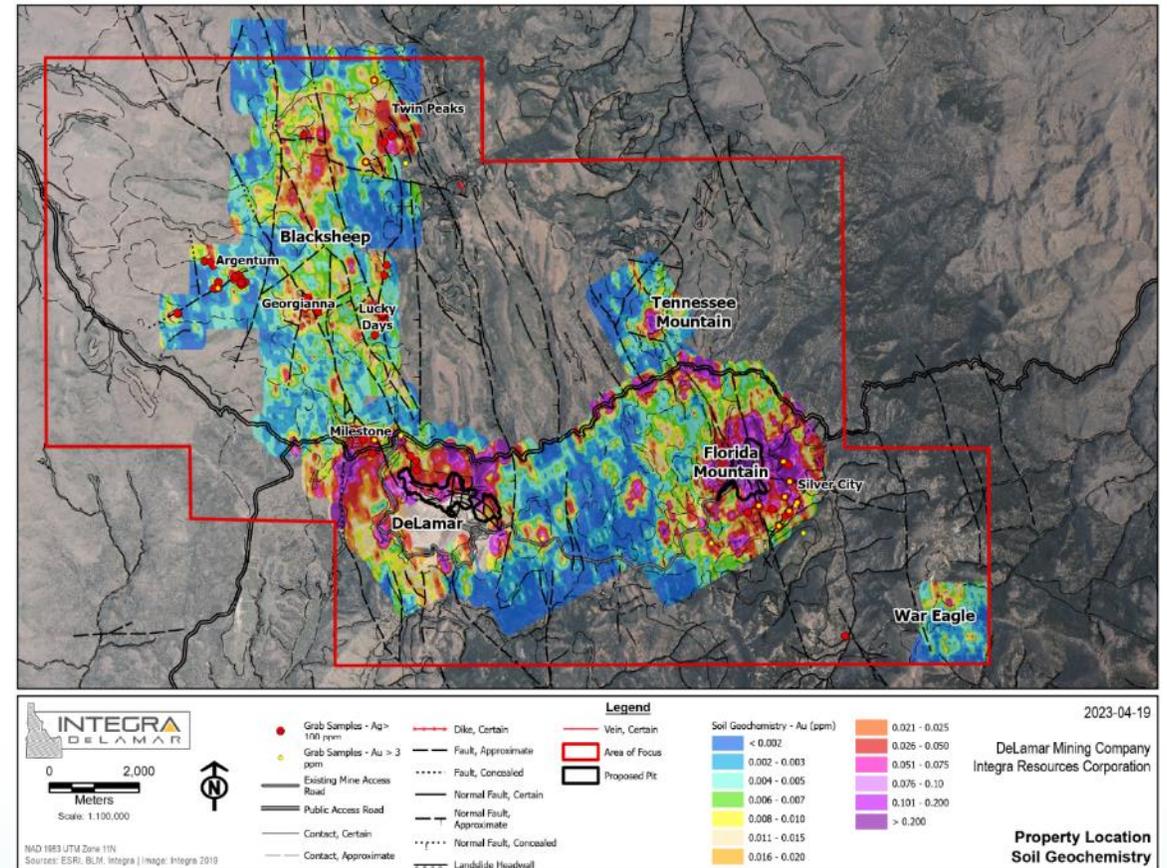

- ~25km² of exploration ground on strike to the northwest of the main DeLamar Deposit
- Past Integra work includes 4,222m of drilling over 13 holes, 50km of geophysics, and ~22km of surface mapping

DeLamar Non-Oxide

- Significant non-oxide AuEq growth potential below the existing heap leachable resource at DeLamar
- Sullivan Gulch non-oxide drill results (IDE-22-228): **0.76 g/t Au** and **69.50 g/t Ag** (1.66 g/t AuEq) over 397m^{3,4}

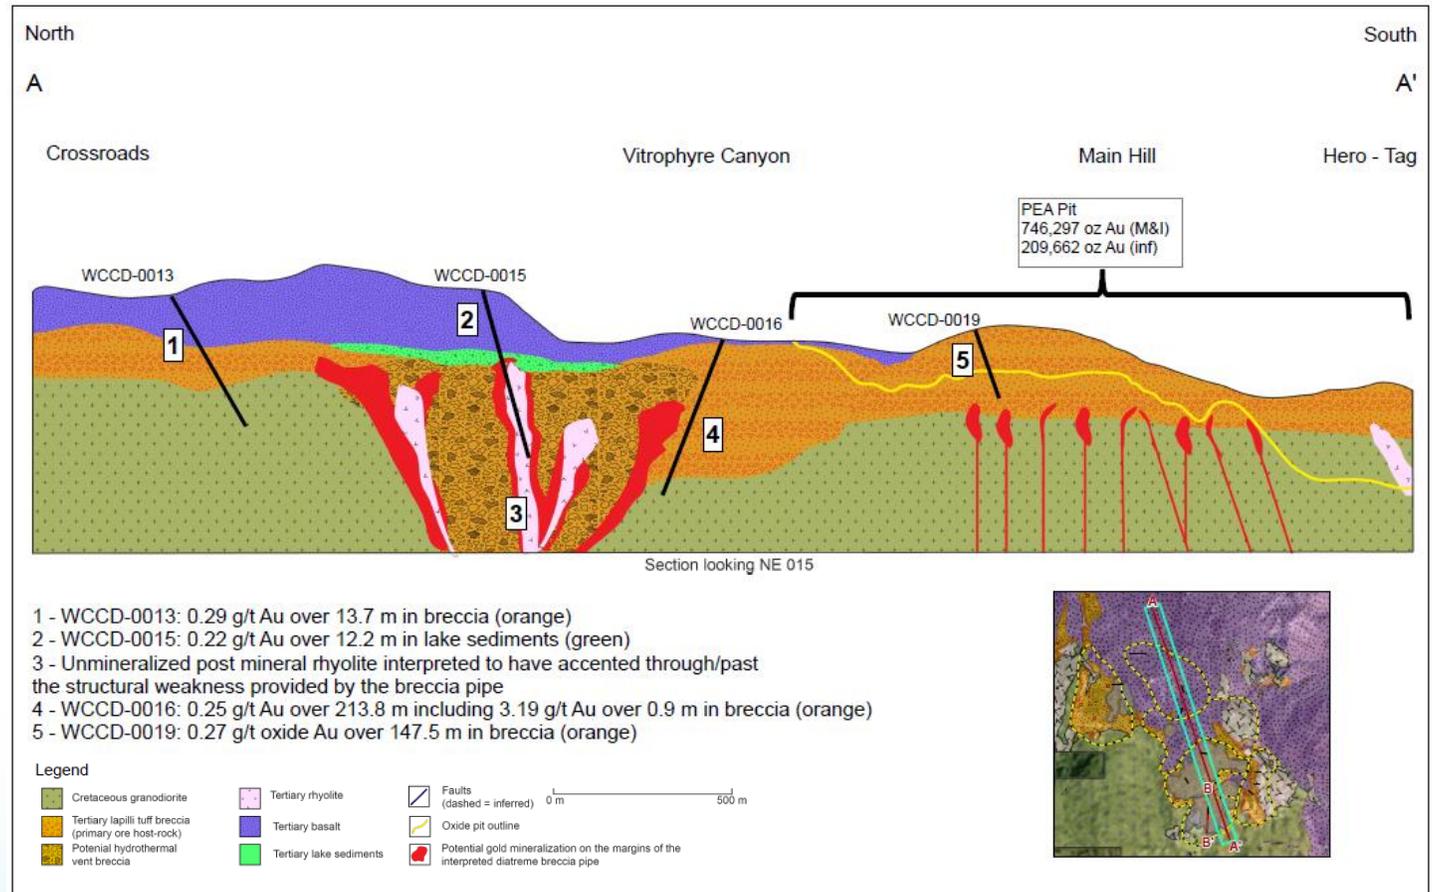

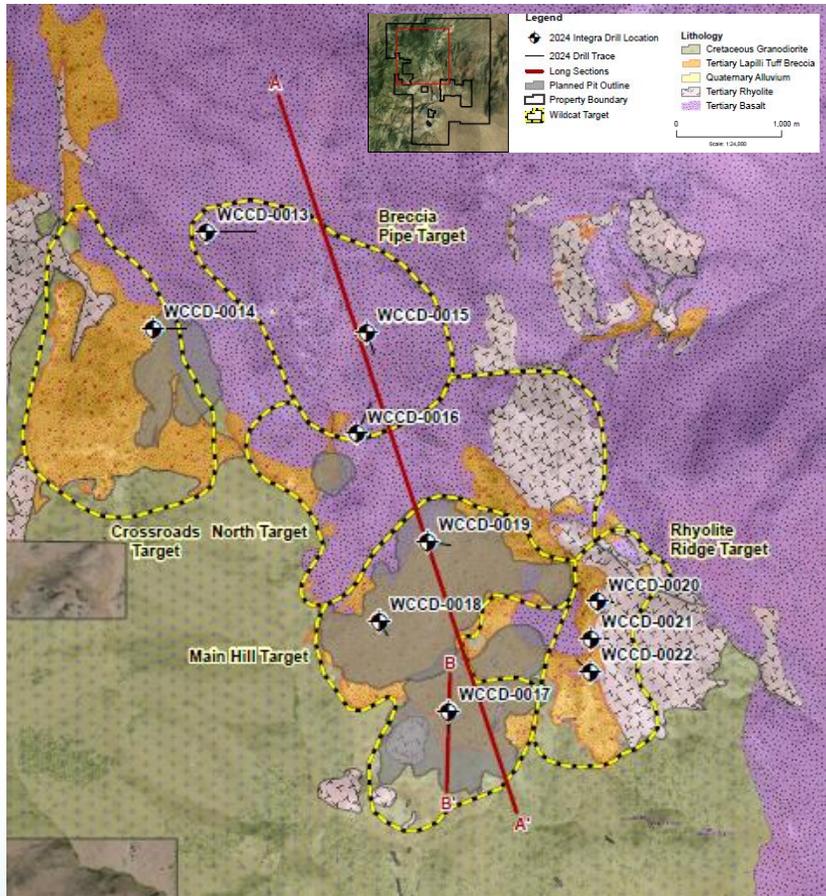

War Eagle Target

- Located ~5km from Florida Mountain; Integra work includes 9,075m of drilling over 25 holes with detailed geophysics plan in place
- Integra drill results (IWE-19-01): **10.88 g/t Au** and **115.31 g/t Ag** (12.37 g/t AuEq) over 34m^{2,3}

Wildcat Heap Leach Deposit: Drilling Overview

Drilling confirmed continuity of mineralization and gathered important technical data; critical markers for working exploration hypothesis remain intact for Breccia Pipe target

The logo for Integra Resources features the word "INTEGRA" in a large, white, sans-serif font. The letter "A" is stylized with a yellow triangle pointing upwards. Below "INTEGRA" is the word "RESOURCES" in a smaller, white, sans-serif font. The background of the slide is a landscape photograph of a mining site with a large tailings pile in the foreground and mountains in the distance under a cloudy sky. A vertical white line separates the logo area from the contact information on the right.
