Growing Precious Metals Producer in the Great Basin

CORPORATE PRESENTATION – SEPTEMBER 2026

TSX-V: ITR I NYSE: ITRG INTEGRARESOURCES.COM

CAUTIONARY NOTE & DISCLAIMER

This presentation has been prepared by Integra Resources Corp. ("Integra" or the "Company") solely for the use in connection with the recipient's evaluation of the Company. This document is a presentation of information about the Company's activities as the date of the presentation and should be read in conjunction with all other disclosure documents of the Company. The information in this presentation is not intended to modify, qualify, supplement or amend information disclosed under corporate and securities legislation of any jurisdiction applicable to the Company. It is information in a summary form and does not purport to be complete and does not constitute an offer to sell or the solicitation of an offer to buy any security. It is not intended to be relied upon as advice to investors or potential investors and does not take into account the investment objectives, financial situation or needs of any particular investor. These should be considered, with or without professional advice, when deciding if an investment is appropriate. The information contained in this presentation is derived from estimates made by the Company, information that has been provided to the Company by other parties and otherwise publicly available information concerning the business and affairs of the Company and does not purport to be all-inclusive or to contain all the information that an investor may desire to have in evaluating whether or not to make an investment in the Company. In particular, information derived from third party sources has not been independently verified and is subject to material updating, revision and further amendment. No representation or warranty, express or implied, is made or given by or on behalf of the Company or any of its affiliates, or any of the directors, officers or employees of any such entities as to the accuracy, completeness or fairness of the information or opinions contained in this presentation and no responsibility or liability is accepted by any person for such information or opinions. In furnishing this presentation, the Company does not undertake or agree to any obligation to provide the recipients with access to any additional information or to update this presentation or to correct any inaccuracies in, or omissions from, this presentation that may become apparent. No person has been authorized to give any information or make any representations other than those contained in this presentation and, if given and/or made, such information or representations must not be relied upon as having been so authorized. The information and opinions contained in this presentation are provided as at the date of this presentation. The contents of this presentation are not to be construed as legal, financial or tax advice. Each prospective investor should contact his, her or its own legal adviser, independent financial adviser or tax adviser for legal, financial or tax advice. No securities commission or regulatory authority has reviewed the accuracy or adequacy of the information presented. This presentation is for informational purposes only and does not constitute an offer or a solicitation of an offer to purchase the securities referred to herein.

Certain information set forth in this presentation contains "forward-looking statements" and "forward-looking information" within the meaning of applicable Canadian securities legislation and in applicable United States securities law (referred to herein as forward-looking statements). Forward-looking statements are often identified by the use of words such as "may", "will", "could", "would", "anticipate", "believe", "expect", "intend", "potential", "estimate", "budget", "scheduled", "plans", "planned", "forecasts", "goals" and similar expressions. Except for statements of historical fact, certain information contained herein constitutes forward-looking statements which includes, but is not limited to, statements with respect to: the future financial or operating performance of the Company and its mineral properties; results from work performed to date; the estimation of mineral resources and reserves; the realization of mineral resource and reserve estimates; the development, operational and economic results of the Company's mineral properties and contents are related technical reports, including cash flows, revenue potential, development, expenditures, and timing thereof, extraction rates, life-of-mine projections and cost estimates; magnitude or quality of mineral deposits; anticipated advancement of the Company's mineral properties; exploration expenditures, costs and timing of the development of new deposits; costs and timing of future exploration; permitting; construction and optimization planning; estimates of metallurgical recovery rates and grades; requirements for additional capital; the future price of metals; government regulation of mining operations; environmental risks; the timing and possible outcome of pending regulatory matters; the realization of the expected economics of the Company's mineral properties; future growth potential of the Company; and future development plans.

Forward-looking statements are based on a number of factors and assumptions made by management and considered reasonable at the time such statement was made. Assumptions and factors include: the Company's ability to complete its planned exploration and development programs; the absence of adverse conditions at the Company's mineral properties; no unforeseen operational delays; no material delays in obtaining necessary permits; results of independent engineer technical reviews; the possibility of cost overruns and unanticipated costs and expenses; the price of gold and other metals remaining at levels that continue to render the Company's mineral properties economic; the Company's ability to continue raising necessary capital to finance operations; and the ability to realize on the mineral resource and reserve estimates. Forward-looking statements necessarily involve known and unknown risks and uncertainties, which may cause actual performance and financial results in future periods to differ materially from any projections of future performance or result expressed or implied by such forward-looking statements. These risks and uncertainties include, but are not limited to: general business, economic and competitive uncertainties; the actual results of current and future exploration activities; conclusions of economic evaluations; meeting various expected cost estimates; benefits of certain technology usage; changes in project parameters and/or economic assessments as plans continue to be refined; future prices of metals; possible variations of mineral grade or recovery rates; the risk that actual costs may exceed estimated costs; geological, mining and exploration technical problems; failure of plant, equipment or processes to operate as anticipated; accidents, labor disputes and other risks of the mining industry; delays in obtaining governmental approvals or financing; risks related to local communities; the speculative nature of mineral exploration and development (including the risks of obtaining necessary licenses, permits and approvals from government authorities); title to properties; and other factors beyond the Company's control and as well as those factors included herein and elsewhere in the Company's public disclosure. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in the forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. Readers are advised to study and consider risk factors disclosed in Integra's Annual Information Form dated March 24, 2026 for the fiscal year ended December 31, 2025, which is available on the SEDAR+ issuer profile for the Company at www.sedarplus.ca and available as Exhibit 99.1 to Integra's Form 40-F, which is available on the EDGAR profile for the Company at www.sec.gov.

Investors are cautioned not to put undue reliance on forward-looking statements. The forward-looking statements contained herein are made as of the date of this presentation and, accordingly, are subject to change after such date. The Company disclaims any intent or obligation to update publicly or otherwise revise any forward-looking statements or the foregoing list of assumptions or factors, whether as a result of new information, future events or otherwise, except in accordance with applicable securities laws. Investors are urged to read the Company's filings with Canadian securities regulatory agencies, which can be viewed online under the Company's profile on SEDAR+ at www.sedarplus.ca.

Qualified Person

The scientific and technical information contained in this presentation has been reviewed and approved by James Frost, P.Eng., Director, Technical Services of Integra and Michael J. Murenbeeld AIPG CPG-12233, Integra's Manager Geology and Exploration, each is a qualified person as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects ("NI 43-101").

Technical Reports & News Releases

Certain scientific and technical information relating to the Company's mineral properties are based on and derived from the below noted technical reports prepared in accordance with NI 43-101 and applicable news releases. The information contained in this presentation related to the applicable mineral properties is subject to all of the assumptions, qualifications and procedures set out in each such report and as disclosed in such applicable news releases. Reference should be made to such reports, which have been filed (or will be filed in the case of the DeLamar Project), and applicable news releases, with the applicable regulatory authorities and are available under the Company's SEDAR+ and EDGAR profile at www.sedarplus.ca and www.sec.gov. The technical reports are meant to be read as a whole and sections should not read or relied upon out of context.

- Florida Canyon: "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026.
- DeLamar: "NI 43-101 Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025.
- Nevada North: "NI 43-101 Technical Report Preliminary Economic Assessment for the Wildcat and Mountain View Projects, Pershing and Washoe Counties, Nevada, United States of America", dated July 30, 2023, with an effective date of June 28, 2023.

Cautionary Note for U.S. Investors Concerning Mineral Resources and Reserves

NI 43-101 is a rule of the Canadian Securities Administrators which establishes standards for all public disclosure an issuer makes of scientific and technical information concerning mineral projects. Technical disclosure contained in this presentation has been prepared in accordance with NI 43-101 and the Canadian Institute of Mining, Metallurgy and Petroleum Classification System. These standards differ from the requirements of the U.S. Securities and Exchange Commission ("SEC") and resource and reserve information contained in this presentation may not be comparable to similar information disclosed by domestic United States companies subject to the SEC's reporting and disclosure requirements.

All references to "$" in this presentation are to U.S. dollars unless otherwise stated.

A GROWING PRECIOUS METALS PRODUCER FOCUSED IN THE GREAT BASIN OF THE USA

- Focused profitability & operational success at principal operating asset, the Florida Canyon Mine
- Value creation through profitable mining operations, rapid project development, prudent capital allocation, and M&A
- Rapidly advancing development stage projects: the DeLamar Project and the Nevada North Project
- Management with deep experience in mining operations, project development, mineral exploration, and capital markets

2025: Transition → 2026: Stability and De-Risking → 2027-2028: Growth

Transition 2025

DeLamar Feasibility (NPV5%:$1.9 B[1]), Exec Team Enhancements, Debt Retirement, Benefit Agreement w/ Tribal Nations (DeLamar)

Stability 2026

Delamar Fast-41 BLM 15 month Permitting, DeLamar Pre-permitting Site Upgrades have Started, GDXJ Index Inclusion, Treasury = ~$111 M [2]

Florida Canyon Updated Mine Plan (NPV5%:723M [3]), 74% increase in Reserve, 8-year mine life, 17% increase in annual production and $0.8B in annual after-tax free cash flow[4]

50,000-meter drill program in Nevada and Idaho, NOI from the BLM published May 2026, Florida Canyon Updated Technical Report and Reserve delivered in June 2026, Drill Results

Growth 2027-2028

DeLamar Project Financing (2027), Record of Decision Permit (H2 2027), 17% increase (80-85 Kozs) in gold production at Florida Canyon, Nevada North Technical Report

Construction decision at DeLamar Project, Nevada North advances to final stages of permitting

INTEGRA RESOURCES

1- Source: Refer to NI 43-101 technical report titled “Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA”, dated February 2, 2026, with an effective date of December 8, 2025. Note: 1. Project economics current metal price assumptions of US$4,500/oz Au and US$65/oz Ag. Gold equivalent calculated using base case metal price: $3,000/oz Au and $35/oz Ag 2. Cash balance as of June 30, 2026 (refer to Integra's financial statements and management discussion and analysis for the three months and six months ended June 30, 2026 available under Integra’s SEDAR+ profile at www.sedarplus.ca); 3. Source: Florida Canyon: “NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA,” dated July 28, 2026, with an effective date of May 31, 2026, spot metal price assumptions of US$4,200/oz Au from mid-2026 to 2035. 4. See Non-GAAP Financial Measures slides in appendix.

Production Today, Growth Tomorrow

Production & Cash Flow	Florida Canyon generates cash flow to support the advancement of DeLamar & Nevada North
Growth Pipeline	Built-in pipeline of complementary heap leach projects underpin unmatched growth profile
Resource Scale	Peer leading resource inventory of 7.7Moz AuEq M&I and 4.3Moz AuEq Inf.[1] across three assets
Jurisdiction	Scarcity of high-quality assets in the Great Basin; opportune time for project advancement
Team	Bolstered executive team; support from large institutions, Wheaton, Alamos, and Beedie
Attractive Valuation	Unique value proposition driven by blend of production and advanced development projects

Notes: Map not to scale. Gold equivalent using US$3,000/oz Au and US$35/oz Ag. 1. Refer to detailed mineral reserves & mineral resources tables, notes and applicable effective dates in the appendix of this presentation. Resource inventory reflects mining depletion at Florida Canyon through May 31, 2026. .

Key People: Proven Track Record

Executive team with extensive experience in operations, project development, exploration and capital markets

George Salamis
President, CEO & Director
- +30 years of experience
- Previously Executive Chair of Integra Gold which was acquired by Eldorado Gold in 2017 for C$590M

Clifford Lafleur
Chief Operating Officer
- +25 years of experience
- Previously with SilverCrest Metals; played key role in growth leading to US$1.7B acquisition by Coeur Mining

Andrée St-Germain
Chief Financial Officer
- +15 years of experience
- Previously CFO of Integra Gold which was acquired by Eldorado Gold in 2017 for C$590M

Scott Trebilcock
SVP, Corporate Development
- +30 years of experience
- Most recently, was VP Corporate Development & Investor Relations at Revival Gold; Prior to this role, was the Chief Development Officer of Mandalay Resources

Mark Stockton
VP, External Affairs & Sustainability
- +10 years of experience
- Previously held several roles with Integra Gold which was acquired by Eldorado Gold in 2017 for C$590M

Scott Olsen
VP, Engineering - Processing & Infra.
- +25 years of experience
- Seasoned metallurgical engineer; held senior roles at Bald Mountain Mine for Barrick and Kinross

Sean Deissner
VP, Finance
- +15 years of experience
- Previously with SilverCrest Metals; played key role in growth leading to US$1.7B acquisition by Coeur Mining

Dale Kerner
VP, Permitting
- +25 years of experience
- Previously with Perpetua Resources; instrumental in Stibnite Project receiving Final Record of Decision

Scott Guay
VP, Project Development
- +25 years of experience
- Previously with Kinross; held senior roles overseeing global mining projects and delivery of capital projects

Josh Serfass
VP, Business Development & IR
- Recently Director of Corporate Development at VRIFY Technology Inc.; Prior to VRIFY, served as Vice President of Investor Relations at Integra Resources Corp

Whitney Buhlin
VP, Human Resources
- +20 years of experience
- Most recently was Director, Human Resources at Capstone Copper Corp

INTEGRA RESOURCES

Note: Professional bios for management team and board of directors available on Integra's corporate website: https://integraresources.com/

Key Assets: Complementary, High-Quality, Great Basin Focused

Florida Canyon Mine (Nevada)[1]

Production & Cash Flow

Status: Acquired by Integra in 2024; currently producing heap leach gold mine

Scale: 2026 production guidance of 70-75kozs Au; growth potential identified to 80-85kozs Au from 2027 to 3033

2026: Updated Mine Plan with longer mine life and production, $0.8B in after-tax free cashflow[3]

DeLamar Project (Idaho)[1]

Engineering & Permitting

Status: 2025 Feasibility Study: current after-tax NPV5% of US$1.9B, 97% IRR[4]

Scale: 10-year LOM with avg. production of ~106kozs AuEq (year 1-5 average of ~120kozs) from oxide resource only

2026: NEPA permitting process underway, Record of Decision expected in H2 2027

Nevada North Project (Nevada)[1,2]

De-risking & Growth

Status: 2023 Preliminary Economic Study, recent exploration and technical drilling

Scale: 13-year LOM with avg. production of ~80kozs AuEq; significant growth potential

2026: De-risking activities and exploration drilling in support of updated Technical Report and pre-permitting

Note: Gold equivalent using US$3,000/oz Au and US$35/oz Ag; 1. "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026, "NI 43-101 Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025, and NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023, all available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov 2. PEA is preliminary in nature; it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA will be realized; 3. See Non-GAAP Financial Measures slides in appendix; 4. Using current metal prices of US$4,500/oz Au and US$65/oz Ag

Florida Canyon Mine

Nevada, USA

INTEGRA RESOURCES

Florida Canyon Mine: Overview

Summary

- Heap leach gold operation located approximately 45 miles southwest of Winnemucca, Nevada, adjacent to Interstate Highway 80
- Continuous operation from 1986-2011 and then intermittently until 2015
  - Operated by Rye Patch Gold from 2015-2018; acquired by Alio Gold in 2018 who restarted & ramped up production; Alio was operator until its acquisition by Argonaut Gold in 2020; Integra became operator in 2024
- Conventional open pit operation using loader/truck heap leach techniques and carbon-in-column (CIC) gold recovery process; Mine Life extended to 2033 (plus 2 years of residual leaching)
- Florida Canyon has achieved record annual production in recent years

Mineral Reserves & Resources[1]

Category	Tonnes (Kt)	Gold Grade (g/t)	Gold Ounces (koz)
P&P	118,471	0.31	1,191
M&I	171,842	0.33	1,706
Inferred (incl. Standard Mine)	165,879	0.65	3,446

Note: Map not to scale; 1. Refer to detailed mineral reserves & mineral resources tables and notes in the appendix of this presentation and the "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026.

Florida Canyon Mine: Key Changes 2024 to 2026 Technical Report

Since acquiring Florida Canyon in 2024 for $68 million, Integra has transformed the Project into a larger, longer-life operation with a 17% increase in annual gold production and an 8-year operational mine life.

MINERAL RESERVE[1]

+74%

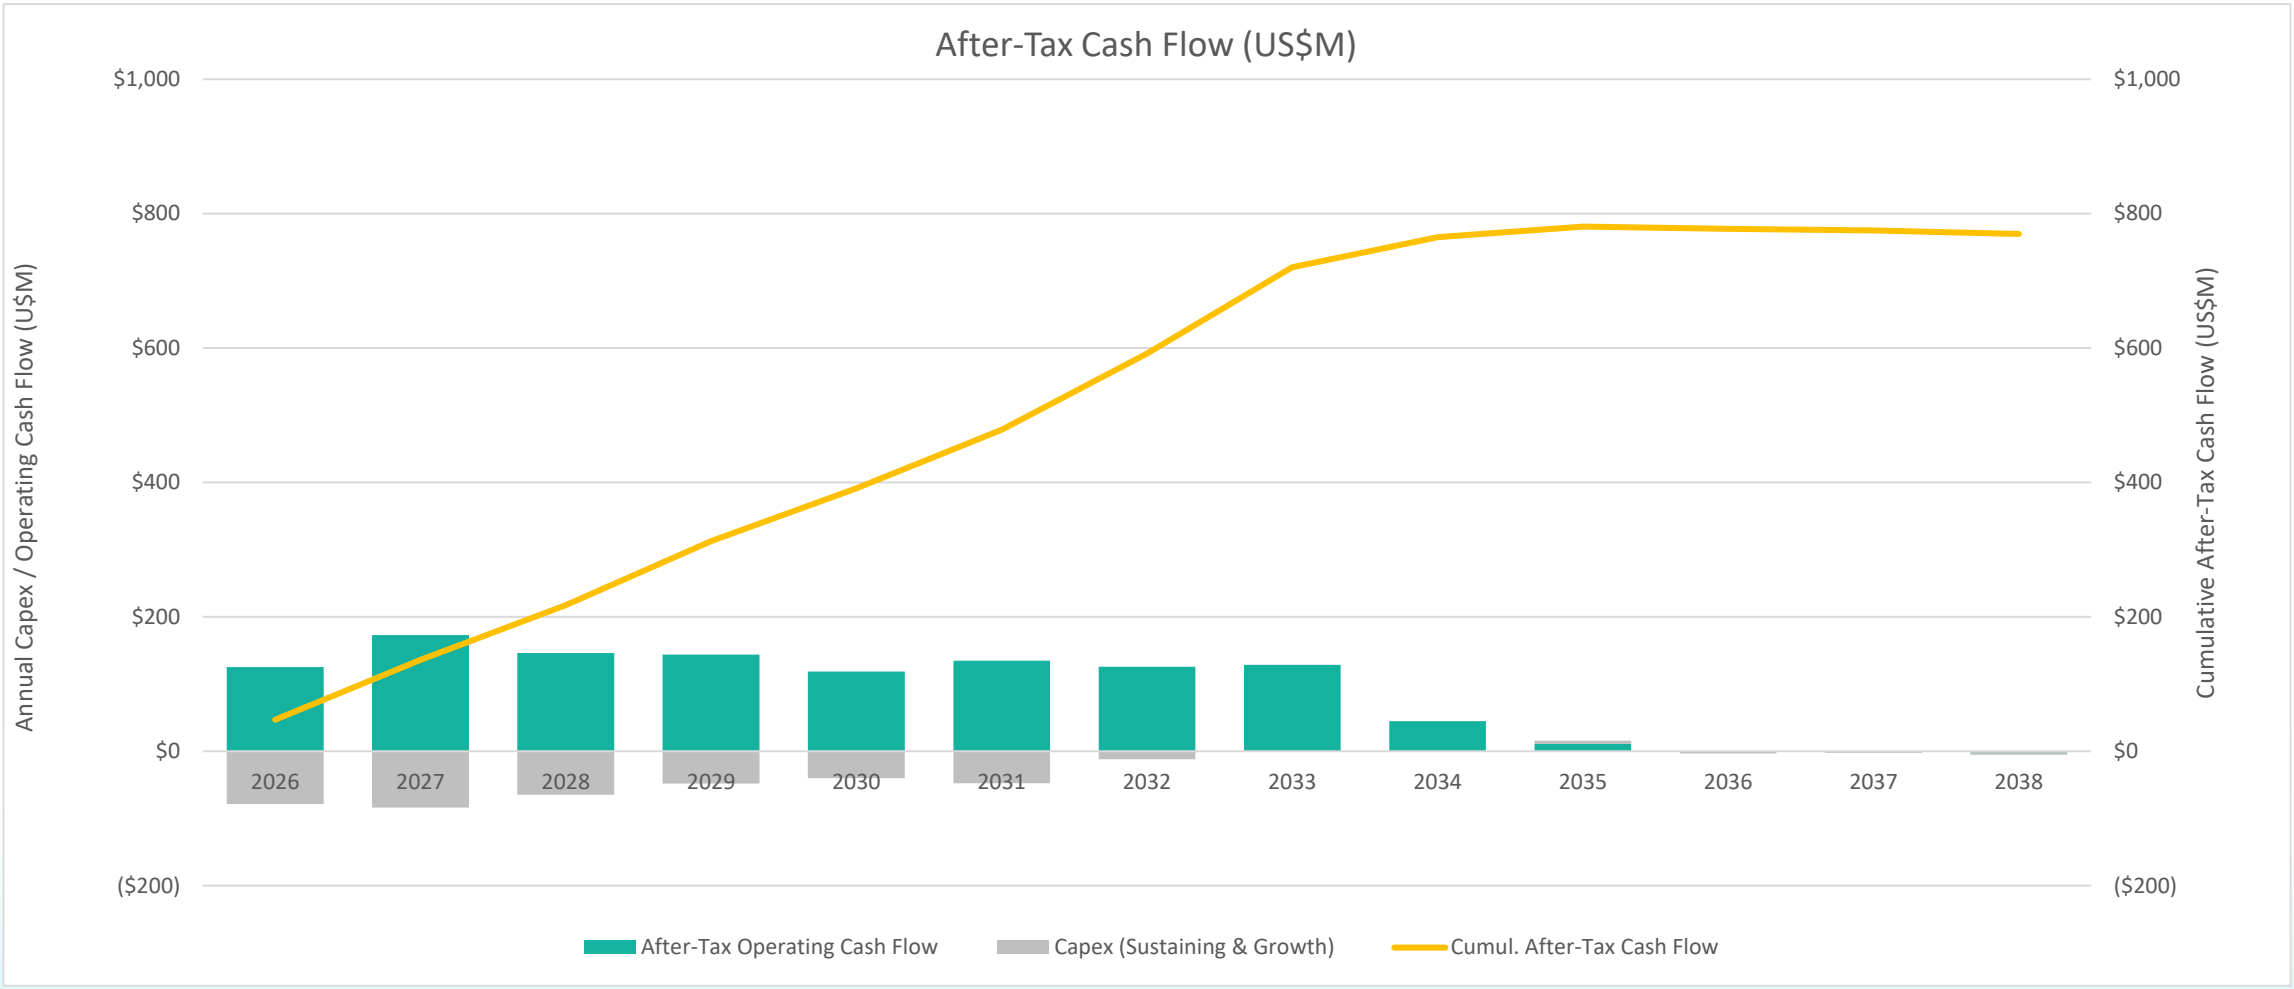
$0.8B (LOM)

LOM Mine-Site AISC[2]
$2,331

Source: "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026. Note: 1. Project economics using base case metal price assumptions of Base case gold prices: 2026 ($4,344/oz), 2027 ($4,414/oz), 2028 ($4,169/oz), 2029 ($3,824), 2030 to 2035 ($3,600/oz) ; spot metal price assumptions of US$4,200/oz Au from mid-2026 to 2035. 2. See Non-GAAP Financial Measures slides in appendix.

Florida Canyon Heap Leach Project: **Cash Flow Profile** (Base Case)

Florida Canyon generates average annual after-tax free cash flow[1] of $90M, self funding increased production profile and longer mine life



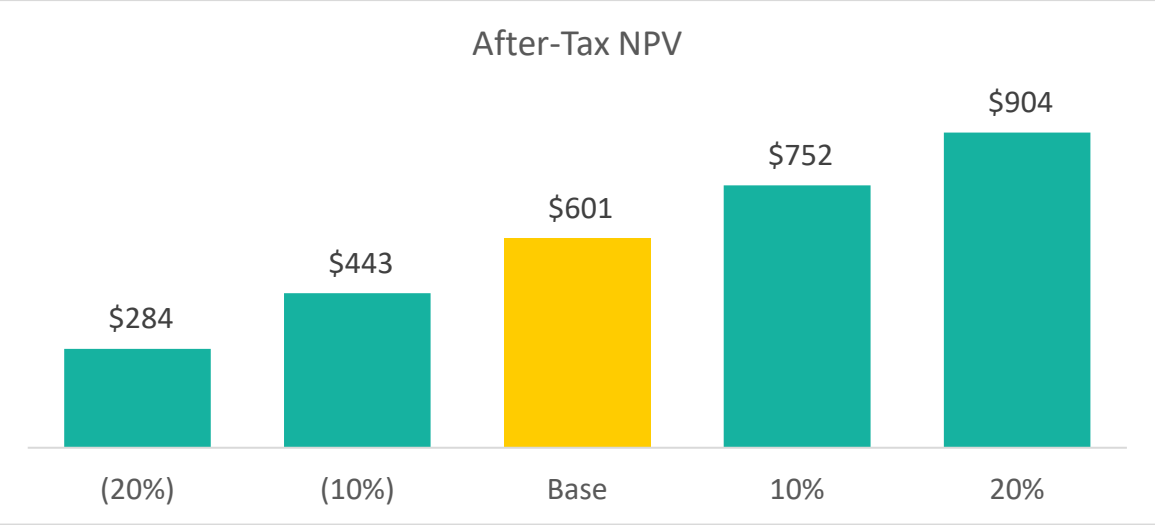
Source: "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026. Note: Project economics using base case metal price assumptions of Base case gold prices: 2026 ($4,344/oz), 2027 ($4,414/oz), 2028 ($4,169/oz), 2029 ($3,824), 2030 to 2035 ($3,600/oz); 1. See Non-GAAP Financial Measures slides in appendix

Florida Canyon: Project Economics

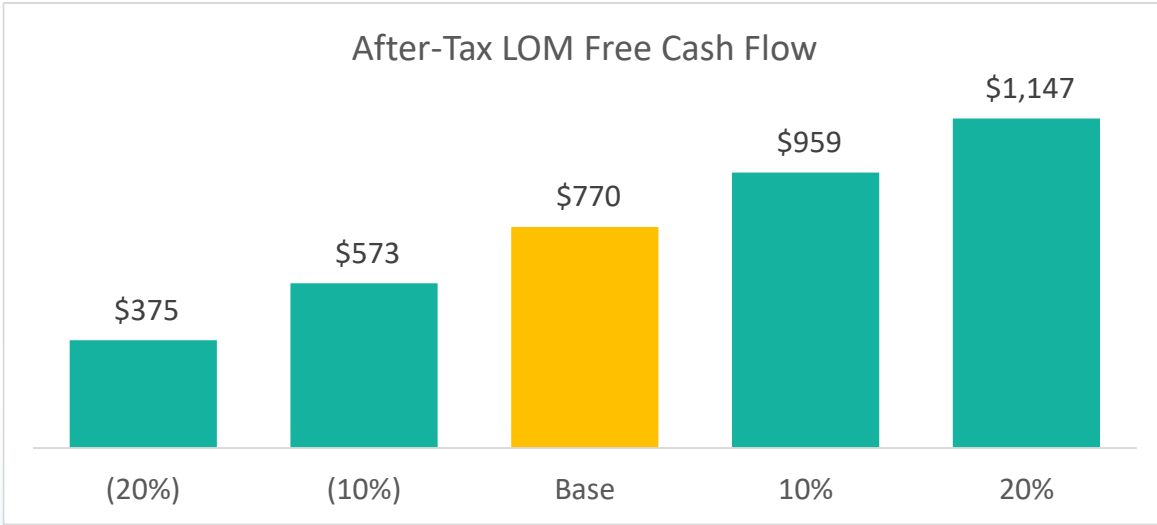
Economics remain robust across a range of metal price assumptions; economics demonstrate leverage to metal prices

- Base case gold prices represent a ~10% discount to June 2026 consensus pricing from 2026 to 2029, then $3,600/oz thereafter, for a LOM weighted average gold price of $3,873/oz
- **Highly levered to gold price; a 10% increase in gold price increases the NPV and Free Cash Flows by ~25%**

After Tax NPV (5%) $M
Impact of Gold Price Increase / Decrease



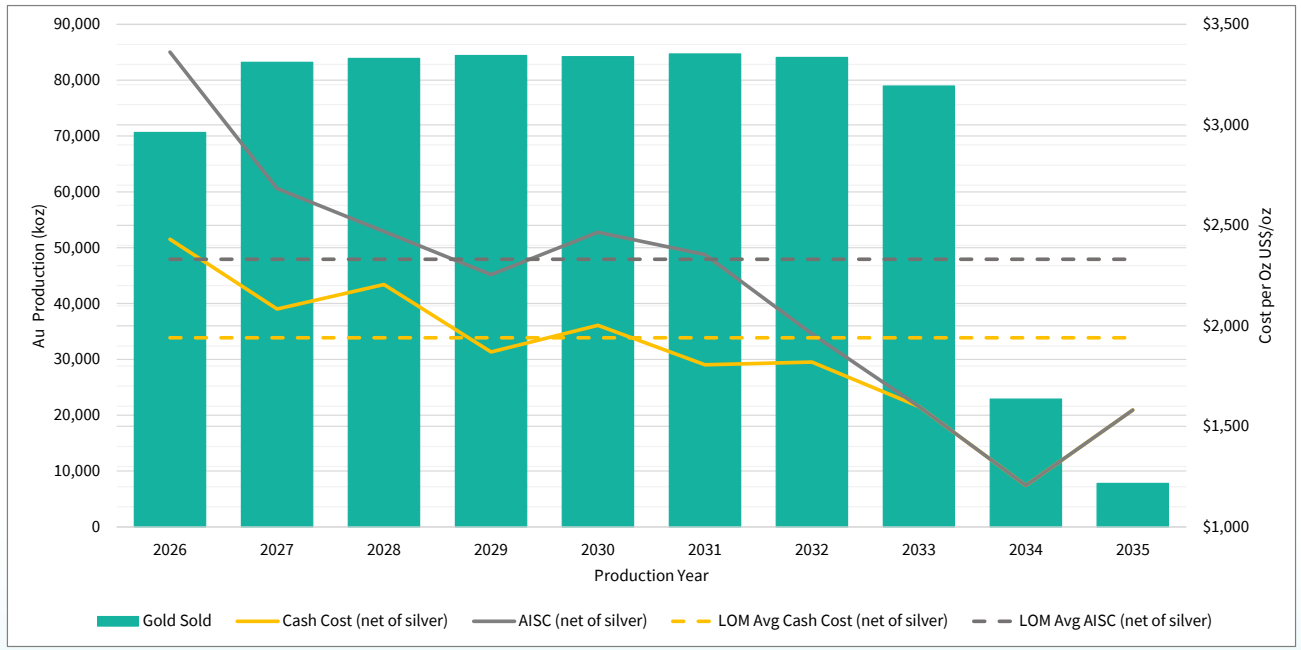
After Tax LOM Free Cash Flow[1] $M
Impact of Gold Price Increase / Decrease



Source: "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026. Note: Project economics using base case metal price assumptions of Base case gold prices: 2026 ($4,344/oz), 2027 ($4,414/oz), 2028 ($4,169/oz), 2029 ($3,824), 2030 to 2035 ($3,600/oz); 1. See Non-GAAP Financial Measures slides in appendix

Florida Canyon Mine: Operations Overview, Consistency & Growth

- Consistent annual gold production of ~82k starting in 2027
- Meaningful decrease in Site Level AISC[1] in 2027 and for LOM as heavy investment in sustaining capital that started in 2025 is completed
- LOM average cash costs of $1,940/oz and AISC[1] of $2,331/oz



Operating Metrics

Operating Metrics	*Unit*	Q2 2026	YTD 2026
Ore	*kt*	4,417	7,425
Waste	*kt*	3,579	7,480
Strip ratio	*waste/ore*	0.81	1.01
Crushed ore to pad	*kt*	1,824	3,609
ROM to pad	*kt*	2,332	3,406
Total to leach pads	*kt*	4,156	7,015
Processed grade	*g/t Au*	0.23	0.22
Gold recovery rate	*%*	57.8	58.5
Gold produced	*oz*	16,379	29,014
Gold sold	*oz*	15,794	28,312
Cash cost[1]	*$/oz sold*	2,495	2,463
Mine-site AISC[1]	*$/oz sold*	3,371	3,344

INTEGRA RESOURCES

Florida Canyon Mine: Growth Outlook

Extended Mine Life, Increase in Annual Production highlighted in Updated Life of Mine Plan at Florida Canyon Mine

Guidance Summary		
2026 Gold production	*ounces*	**70,000 - 75,000**
2026 total Cash Cost[1]	*$/oz sold*	**$2,300 - $2,500**
2026 Mine-site AISC[1]	*$/oz sold*	**$3,300 – $3,500**
2026 Non-Sustaining (Growth) Capital Expenditures	*$m*	**$16.5 - $18.5**

Commentary & Focus Areas

Investing now for future growth – 17% increase in annual production, mine life extended to 2033

- **Sustaining Capital:** Majority of sustaining capital allocated to mobile equipment rebuilds, heap leach pad construction and infrastructure projects; Capital stripping cost for historic catch up and expansion
- **Growth Capital:** Major growth investment in heap leach capacity and mobile fleet modernization to accommodate mine life and annual production growth

INTEGRA RESOURCES

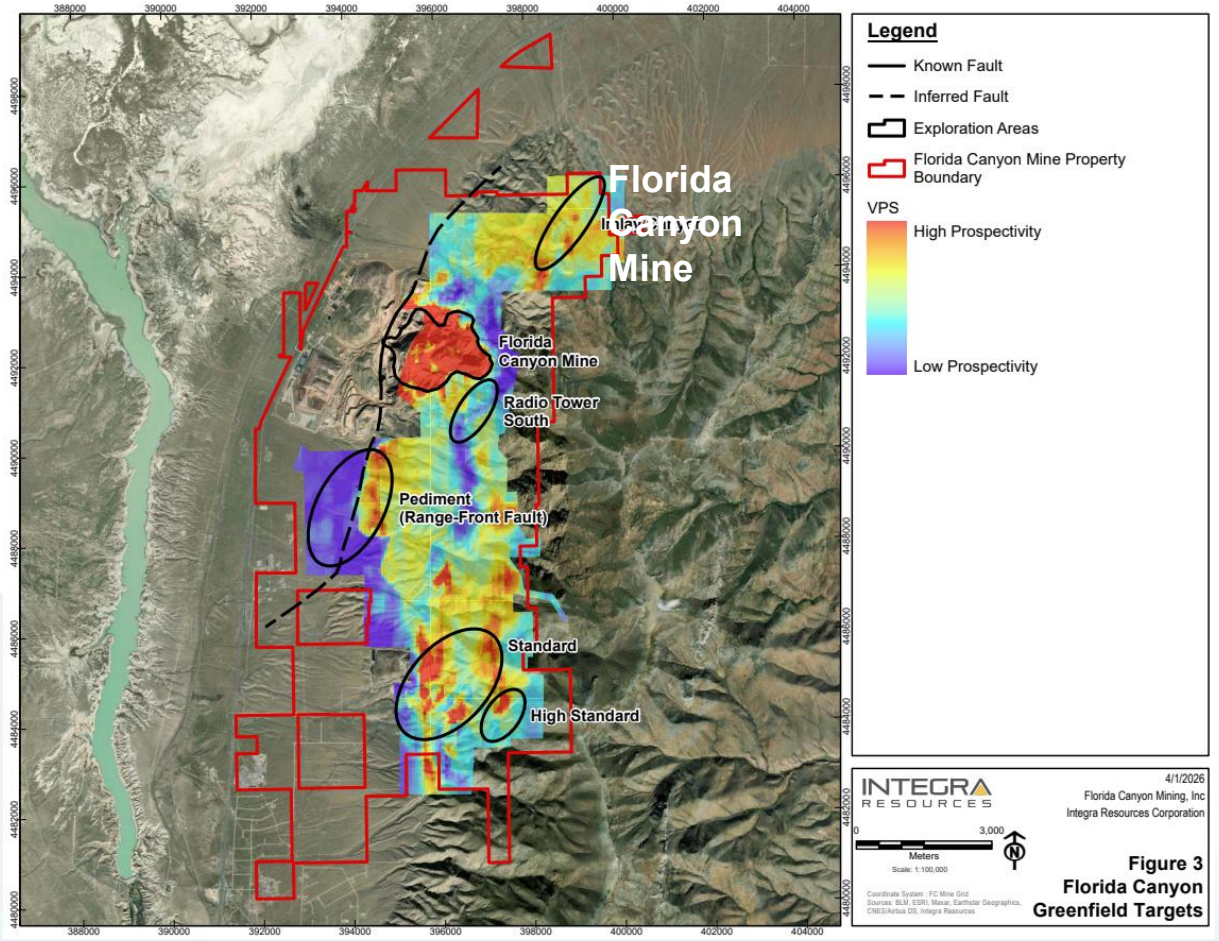
Source: "NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA," dated July 28, 2026, with an effective date of May 31, 2026.; Note 1. See Non-GAAP Financial Measures slide in appendix

2026 Drilling Program: Largest in Company History

50,000 m drill program targeting resource growth, mine life extension and development readiness

Florida Canyon	DeLamar	Nevada North
42,500 m drilling	2,500 m drilling	5,500 m drilling
Target: near-mine oxide growth	**Target:** Pre-construction detailed engineering	**Target:** resource conversion, hydrogeological, met and geotech
Result: Immediate production impact	**Result:** Build construction readiness	**Result:** Updated Technical Report and permitting

- Infrastructure-led drilling → fastest path from discovery to production
- Exploration success converts directly to near-term production and cash flow



Note: See news release from April 9, 2026 for further details on the 2026 drilling program.

Florida Canyon Mine: Meaningful Near-Term Growth

Exploration Proof of Concept: Near-Term Growth Where It Matters Most

The Headline:	What it is:	Why it matters:
Thick, near surface gold intercepts support mine life extension and near-term production growth	Selected intercepts include [1]: • 2025-Met-R02: 138 m @ 0.32 g/t Au (Radio Tower) • FCM25-0617: 128 m @ 0.36 g/t Au (C7) • Multiple >100 m gold intercepts across stockpiles + in-situ[2] • Significant % well above cut-off grade[2]	• Within/adjacent to existing pits → minimal capital • Near infrastructure → immediate mine plan relevance • Low strip, heap leach → high-margin ounces

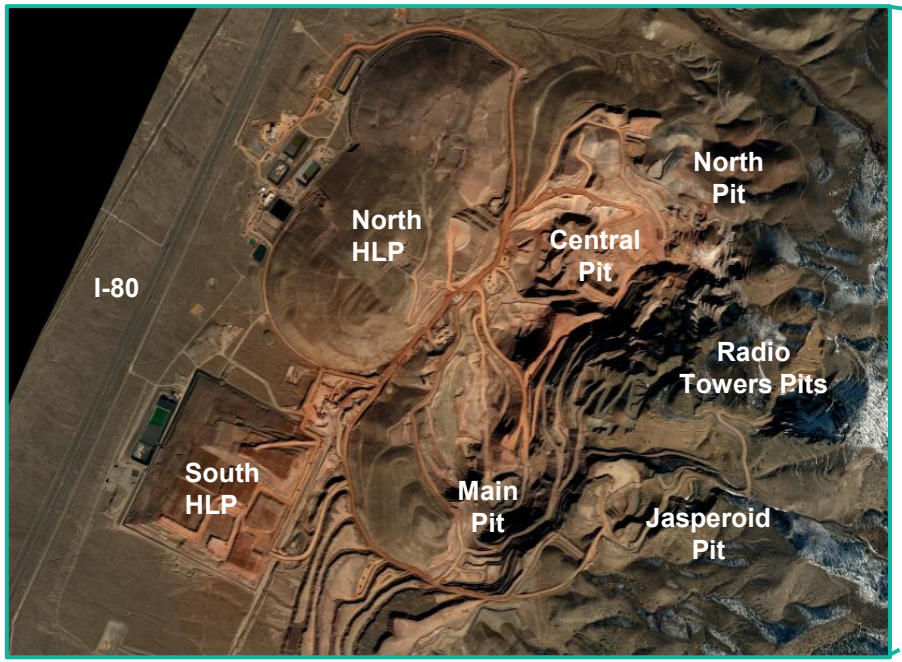
INTEGRA RESOURCES

1- Refer to news releases dated April 13, 2026 available on Integra's corporate website or under Integra's SEDAR+ profile at www.sedarplus.ca
2- Refer to news releases dated May 8, 2025, August 6, 2025, October 9, 2025 and April 13, 2026 available on Integra's corporate website or under Integra's SEDAR+ profile at www.sedarplus.ca.

Florida Canyon Mine: Growth Potential

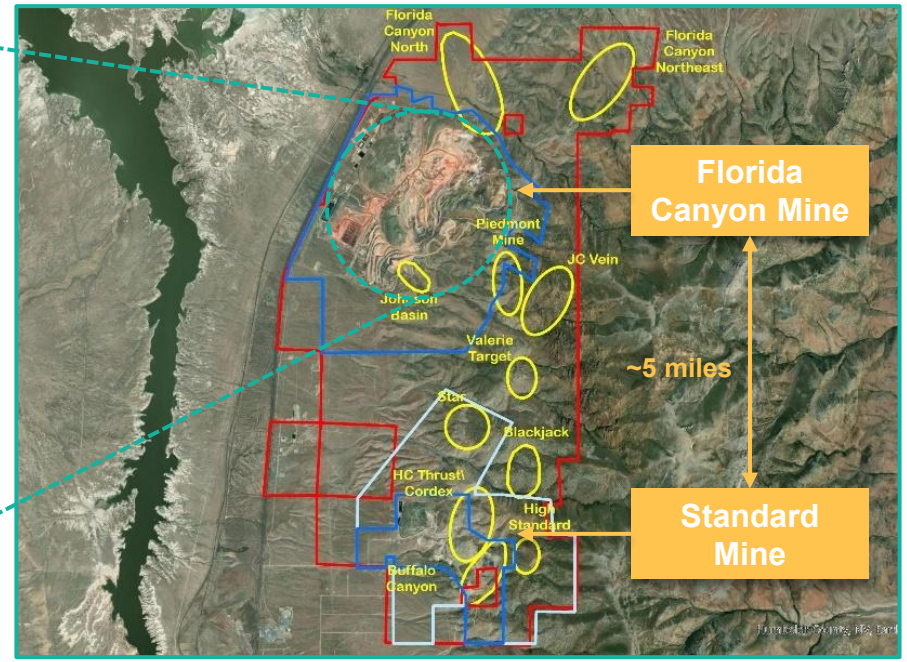
Integra focused on defining additional oxide material to support production growth and mine life extension

Near Mine Growth



Opportunity: Large volumes of historical waste/back fill material; numerous pits, divided by sparsely drilled saddles; Integra to evaluate possibility of processing material previously below cut-off and connecting pits; potential source of oxide material to increase scale and mine life

Regional Growth

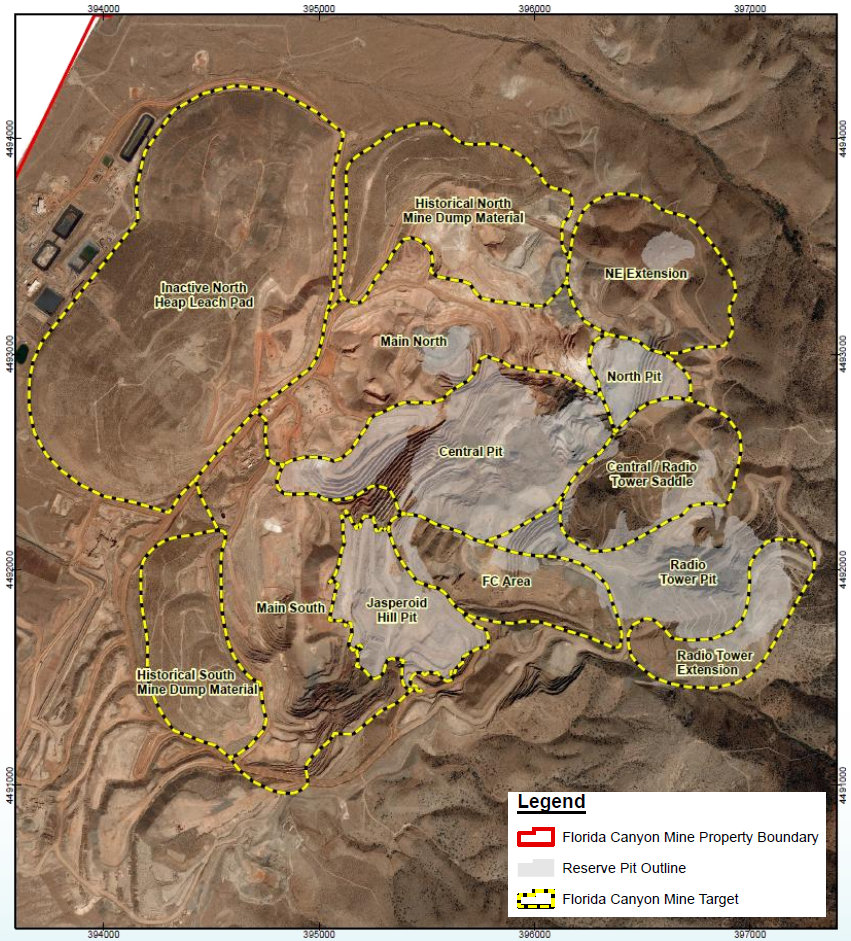


Opportunity: Standard Mine (south of Florida Canyon) produced >220kozs Au between 2004-2015, situated within same productive geological structure; no recent drilling at Standard Mine, limited drilling between Standard Mine and Florida Canyon; drill targets identified

Note: Refer to news release dated June 25, 2026 available on Integra's corporate website or under Integra's SEDAR+ profile at www.sedarplus.ca.

Florida Canyon Mine: Growth Drilling

74% increase in Mineral Reserve contributed in part to exploratory, in-fill and confirmatory drilling in June 2026 updated Technical Report and Life of Mine Plan



Drill Program Highlights

Opportunity 1: Near-surface oxide potential from historical dumps

- Targeting large volumes of historical gold-mineralized backfill and low-grade waste material previously estimated to be below the mining cut-off grade in a significantly lower gold price environment; greatest near-term opportunity to increase mineral resources and potentially extend mine life.

Opportunity 2: Expand in-situ resources between existing mine open pits

- Targeting “saddle/ridge” areas located between active and historical pits. Many of these areas sparsely drilled historically and offer meaningful oxide growth potential directly adjacent to current and future mining phases.

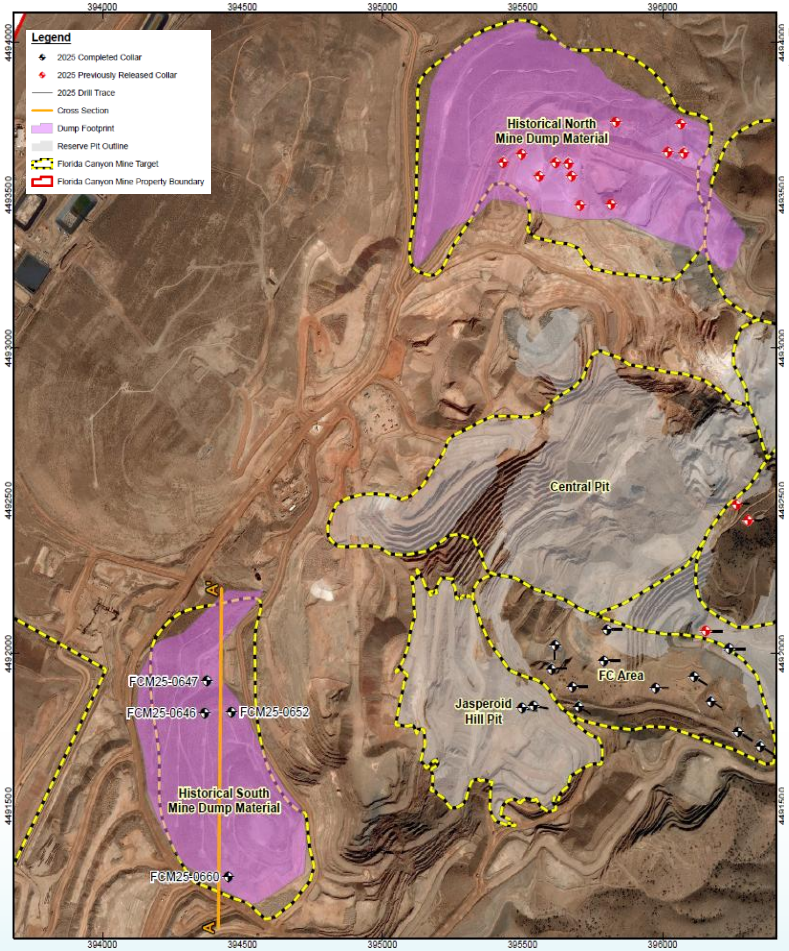
Opportunity 3: Test lateral extensions and in-pit infill

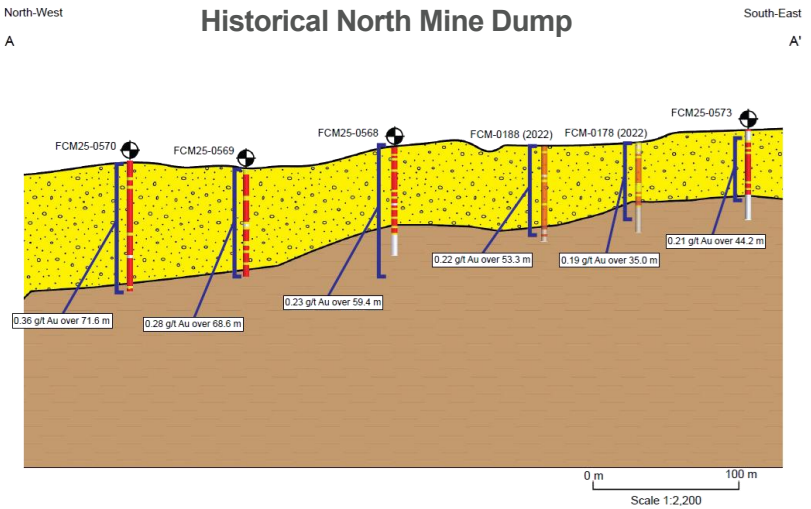
- Targeting lateral extensions of existing pits and infill drilling within areas planned for further pit pushbacks. Potential identified to improve resource classification, optimize mine planning, and increase short-term ore feed.

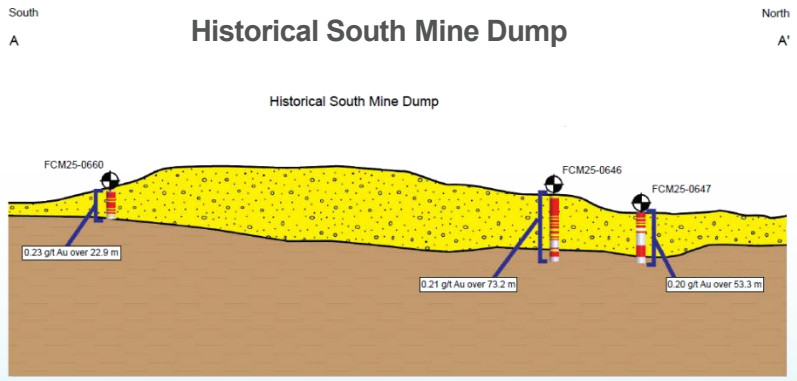
Source: “NI 43-101 Technical Report, Florida Canyon Gold Mine, Pershing County, Nevada, USA,” dated July 28, 2026, with an effective date of May 31, 2026. Refer to news releases dated May 8, 2025, August 6, 2025 and October 9, 2025 available on Integra’s corporate website or under Integra’s SEDAR+ profile at www.sedarplus.ca

Florida Canyon Mine: North & South Dump Results

Drilling results and preliminary volume / grade estimates underscore near-term growth potential[1]







Conceptual Estimates[1]	Volume (Mt)	Grade (g/t Au)
North Dump	~19 - 32	~0.11 - 0.25
South Dump	~15 - 24	~0.11 - 0.25
Combined	**~34 - 56**	**~0.11 - 0.25**

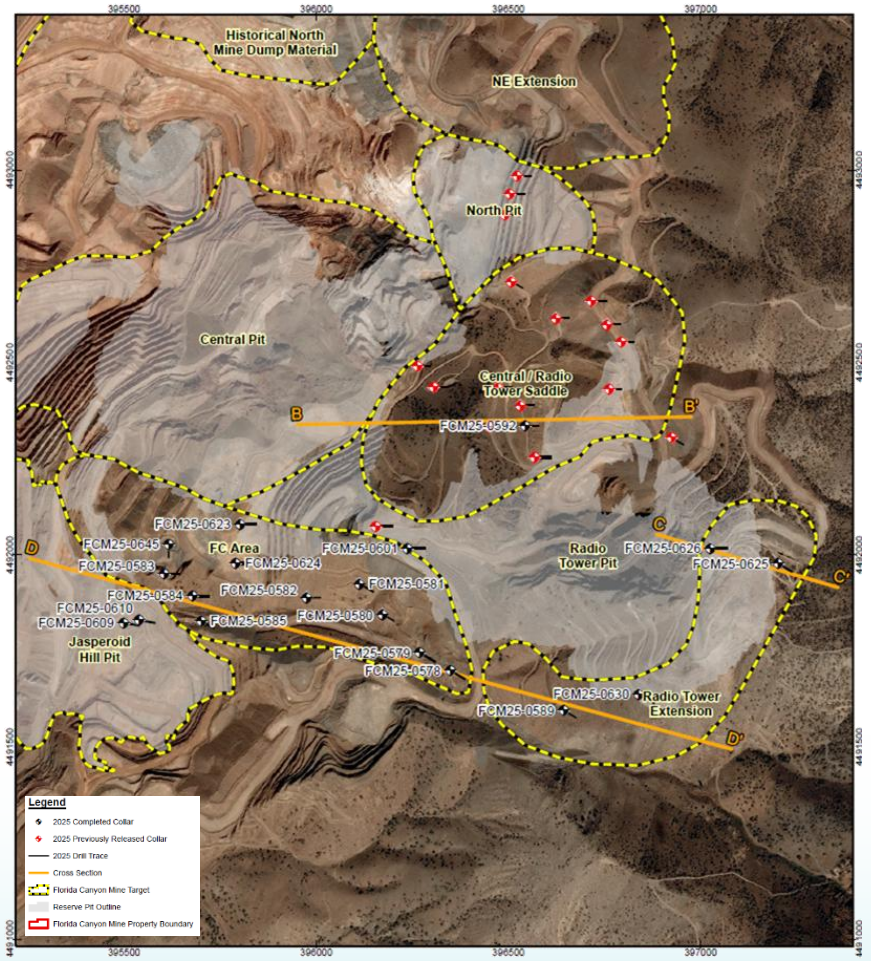
Commentary[1]

- Material originally mined from the late-1980s to mid-1990s when gold prices were US$325 - $450/oz and cut-off grades were 0.28 - 0.34 g/t Au
- Tonnage ranges derived from an estimated mineable percentage of the total volume calculated from 3D surfaces and an approximation of the volume of material exceeding the current mining cut-off grade

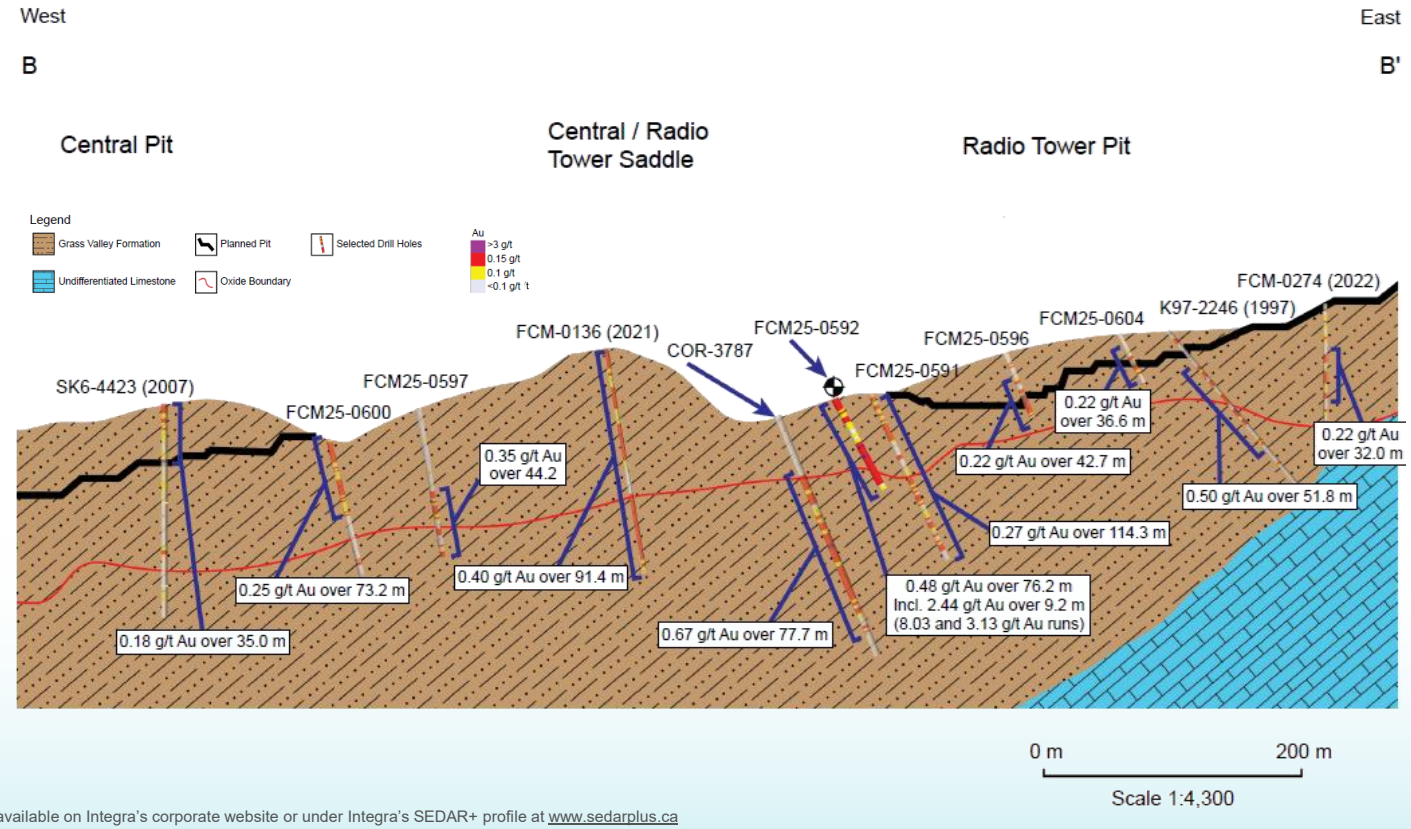
1. The potential quantity and grade of the North and South Dumps are conceptual in nature. There has been insufficient exploration, drilling, and metallurgical heap leach recovery testing to estimate and define a Mineral Resource, as defined by NI 43-101 – Standards of Disclosure for Mineral Projects, and it is uncertain if further exploration will result in the target being delineated as a Mineral Resource. Exploration targets such as the North and South Dumps are used to provide a conceptual estimate of the potential quantity and grade of a mineral deposit, based on known and additional limited geological evidence. It is an early-stage assessment that will help to guide further exploration, but it is not a mineral resource or mineral reserve and should not be treated as such. Note: Refer to news releases dated May 8, 2025, August 6, 2025 and October 9, 2025 available on Integra's corporate website or under Integra's SEDAR+ profile at www.sedarplus.ca

Florida Canyon Mine: Inter-Pit Results

Inter-Pit areas between active and historical pits offer meaningful growth potential adjacent to current mining area



Results confirm broad, near-surface intervals of gold mineralization with consistent gold grades and heap leach potential; Central/Radio Tower Saddle areas show best potential



Note: Refer to news releases dated May 8, 2025, August 6, 2025 and October 9, 2025 available on Integra's corporate website or under Integra's SEDAR+ profile at www.sedarplus.ca

DeLamar Project

Idaho, USA

INTEGRA RESOURCES

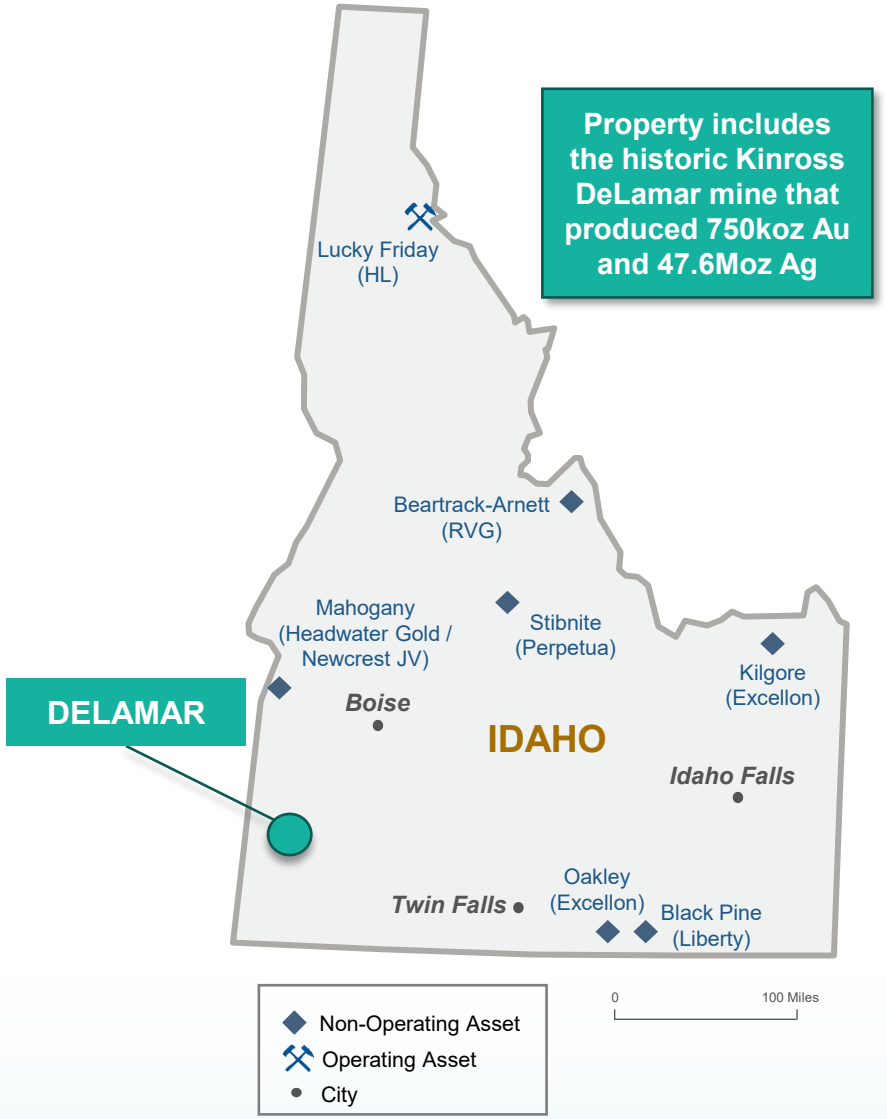
DeLamar Heap Leach Project: Overview

Summary[1]

- 100% owned gold-silver project in southwestern Idaho, 80 km southwest of the city of Boise; consists of DeLamar and Florida Mountain deposits
- Project was acquired from Kinross in 2017 (operated in the late 1990s); since acquisition Integra has completed a numerous mineral resource and reserve updates, a PEA in 2019, a PFS in 2022 and a Feasibility Study in 2025
- **Total defined resource of 1.9Mozs AuEq Proven & Probable, 4.6Mozs AuEq Measured & Indicated and 0.6Mozs AuEq Inferred**
- DeLamar is one of the most advanced heap-leach development projects in the United States; Notice of Intent published in Federal Register on May 29, 2026, starting the NEPA process. Record of Decision expected in 2027.

Mineral Reserves & Resources[1]

Category	Tonnes (Mt)	Gold Grade (g/t)	Silver Grade (g/t)	Gold Ounces (koz)	Silver Ounces (Moz)
P&P	120.0	0.33	13.56	1,259	52.3
M&I	245.8	0.37	18.20	2,945	144.2
Inferred	39.6	0.31	11.70	398	14.9



Note: Gold equivalent calculated using $3,000/oz Au and $35/oz Ag Au/Ag ratio; map not to scale; Source: Refer to NI 43-101 technical report titled “Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA”, dated February 2, 2026, with an effective date of December 8, 2025

DeLamar Heap Leach Project: 2025 Feasibility Study Highlights

Large-scale, conventional open pit oxide heap leach operation, with competitive cost profile and excellent economics

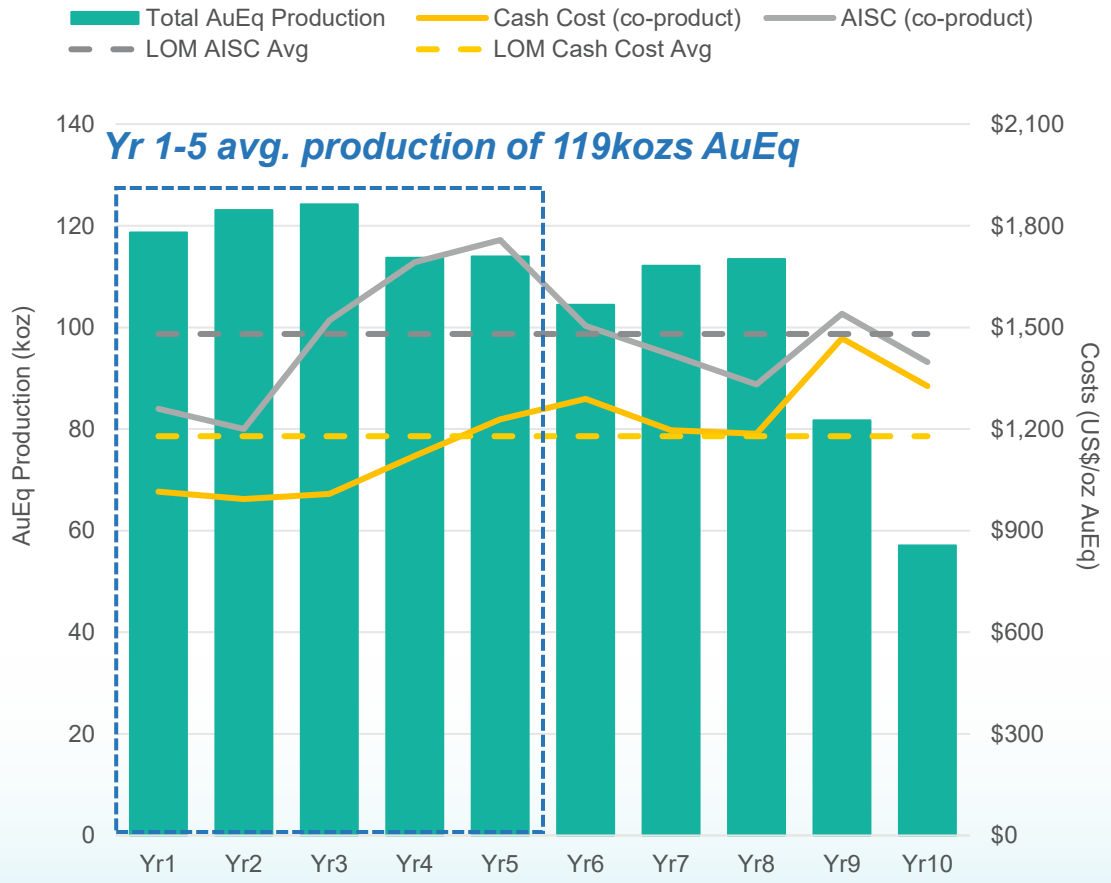
After-Tax NPV5% **$774M** (Base Case) **$1.9B** (Current)	**Initial Capital[1]** **$389M**	**AuEq Production** **106koz** (LOM Avg.) **119koz** (Yr 1-5 Avg.)
After-Tax IRR **46%** (Base Case) **97%** (Current)	**Mine Life** **10 years**	**Total AuEq Payable[1]** **1.1Moz**
Payback **1.8 yrs** (Base Case) **1.0 yrs** (Current)	**NPV-to-Capex[2]** **2.0** (Base Case) **4.9** (Current)	**LOM AuEq Costs[3]** **$1,179** (Cash Costs) **$1,480** (AISC)

Source: Refer to NI 43-101 technical report titled "Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025. Note: 1. Project economics using base case metal price assumptions of US$3,000/oz Au and US$35/oz Ag; current metal price assumptions of US$4,500/oz Au and US$65/oz Ag. Gold equivalent calculated using base case metal price: $3,000/oz Au and $35/oz Ag. Initial capex includes $42M for Owners' cost and bonding cash collateral; 2. NPV-to-capex ratio calculated as after-tax Project NPV5% divided by total initial capital cost 3. See Non-GAAP Financial Measures slides in appendix.

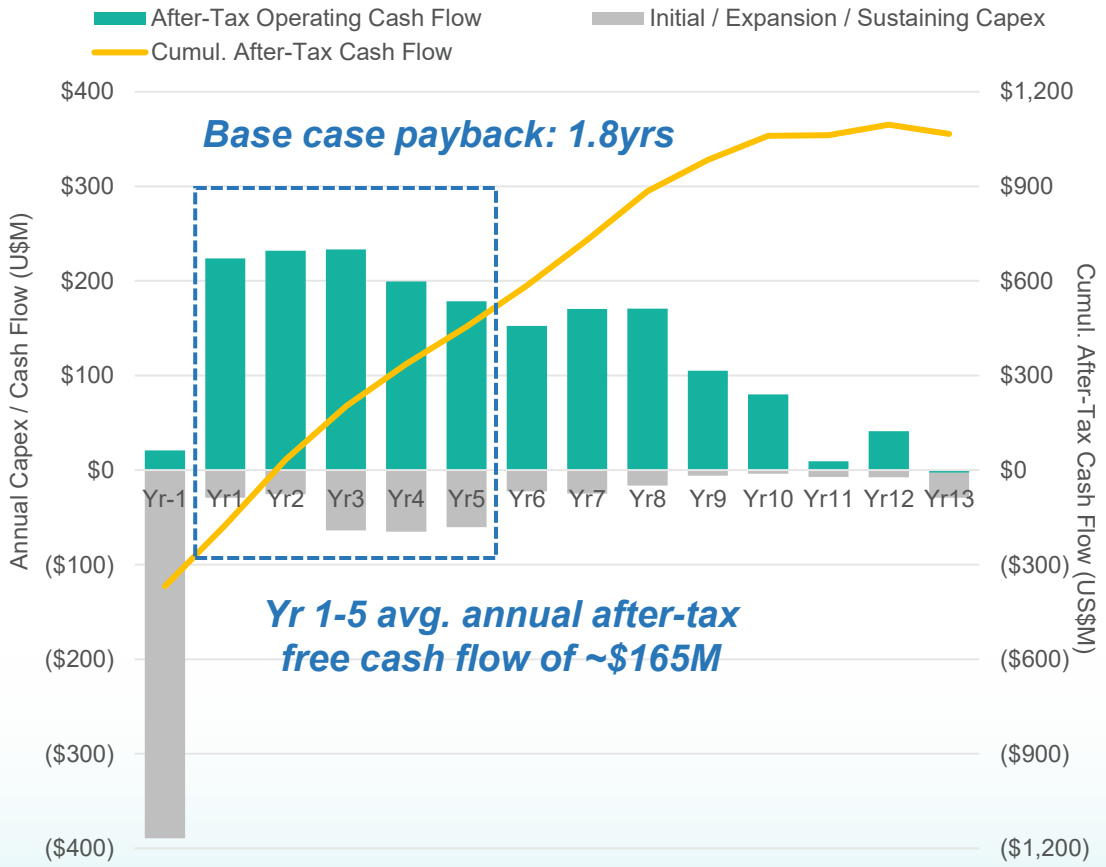
DeLamar Heap Leach Project: 2025 Feasibility Study Highlights

10 year mine life delivers avg. production of 106kozs AuEq at competitive site AISC (co-prod) of $1,480/oz AuEq[1]

Production & Cost Profile[1]



Cash Flow Profile[1]



Source: Refer to NI 43-101 technical report titled "Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025; Gold equivalent calculated using base case metal price: $3,000/oz Au and $35/oz Ag; 1. See Non-GAAP Financial Measures slides in appendix

DeLamar Heap Leach Project: Next Steps

Early works underway to fund procurement, land acquisition, and other low-risk activities to reduce execution risk at DeLamar

Next Steps

- **Permitting:** NEPA process began on May 29, 2026, with the publication of the NOI in the Federal Register
- **Pre-production capital investment:** begin pre-production projects including procurement work, early works, and strategic land purchase
- **Project financing preparation:** kick-off discussions and analysis in 2026
- **Engineering and optimization:** advancing detailed engineering and execution planning

February 2026 Financing Overview

US$61M Bought Deal Financing – Use of Proceeds Breakdown	
2026 Early Works Program	~$16.0M
2026 Procurement Works	~$12.0M
Land Acquisition	~$12.5M
2027 Early Works Program	~$4.5M
2027 Procurement Works	~$12.5M

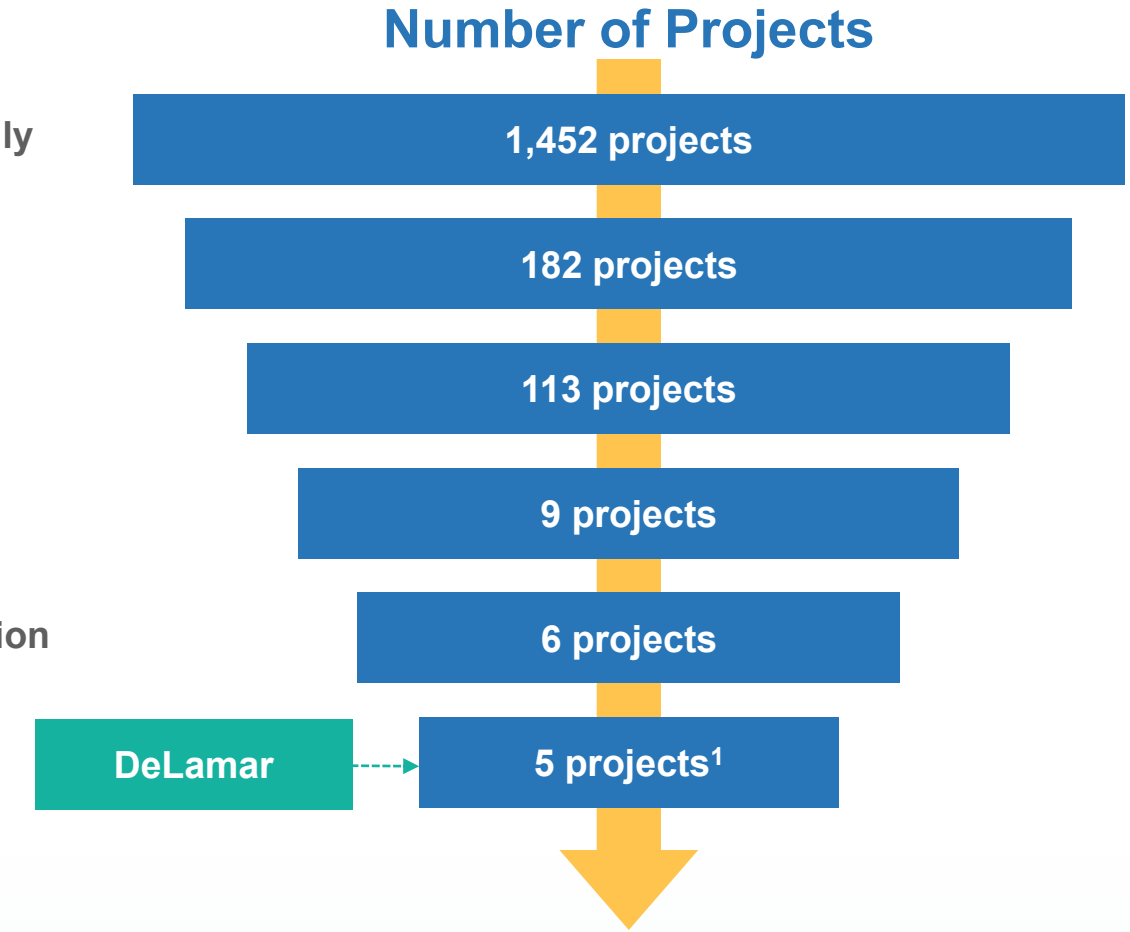
February 2026 financing enhances project readiness, lowers future financing risk, and supports a more efficient path toward a construction decision

INTEGRA RESOURCES

Source: Refer to NI 43-101 technical report titled "Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025; Gold equivalent calculated using base case metal price: $3,000/oz Au and $35/oz Ag; 1. See Non-GAAP Financial Measures slides in appendix

DeLamar Heap Leach Project: Significant Scarcity Value

1) Primary Au/Ag development projects resource estimate, globally
2) Remove projects located outside United States
3) Remove primary underground mining projects
4) Remove projects without a valid PFS or FS since 2023
5) Remove projects with <100koz AuEq LOM avg. annual production
6) Remove projects with >US$500M initial capital expenditure



DeLamar stands among a select group of U.S. gold-silver projects in advanced development and permitting

Source: S&P Market Intelligence and specific company disclosure; Note: Market data as at December 15, 2025; 1. Projects include DeLamar (Integra), Black Pine (Liberty Gold), CK (U.S. Gold Corp.), Goldfield (Centerra Gold), and South Railroad (Orla Mining); gold equivalent based on US$3,000/oz Au and US$35/oz Ag

DeLamar Heap Leach Project: NEPA Permitting Schedule

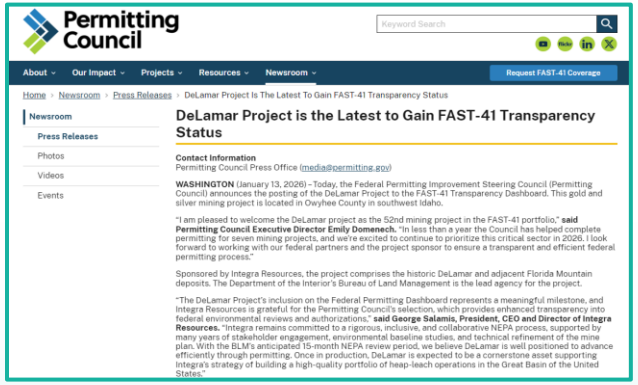
USA Project Advancement: The Right Time

DeLamar selected for FAST-41 Transparency Projects Program in January 2026

Immediate Measures to Increase American Mineral Production Executive Order:

- Executive Order signed by President Donald Trump in March 2025
- Aimed at boosting domestic critical mineral production (including gold), reducing reliance on foreign adversaries, and solidifying pathway toward mineral independence
- Specific initiatives include fast-tracking permits, expanding land access, clarifying the Mining Act, mobilizing capital and strategic stockpiling and procurement for domestic minerals



Fast-41 Transparency Projects Program:

- DeLamar selected for in January 2026 for FAST-41 Transparency Projects Program
- Dashboard is designed to enhance federal permitting transparency, coordination, and accountability through the U.S. Federal Permitting Improvement Steering Council
- Key benefits for DeLamar: accelerated decision making, enhanced process certainty and predictability, and improved federal support and oversight.

Note: For additional details on initiatives, please refer to official White House website: https://www.whitehouse.gov/presidential-actions/2025/03/immediate-measures-to-increase-american-mineral-production/ and Permitting Dashboard: https://www.permits.performance.gov/

Integra & Shoshone-Paiute: DeLamar Relationship Agreement

Relationship Agreement aligns interests of Integra and a federally recognized Tribal Nation to develop DeLamar Project

Agreement Overview

- **Business-driven:** mutually beneficial arrangement to advance DeLamar operating as a partnership.
- **Established framework:** key components: Stewardship, Economic Participation, Governance, Life-of-Mine Commitment.
- **5+ years in the making:** extensive in-person engagement, site visits, consultation on mine design/baseline studies, and community meetings.

Benefits to Integra

- **Enhanced position:** Agreement driven by predictability, efficiency, and partnership for the development of DeLamar.
- **Interest alignment:** incorporates key Tribal cultural, environmental and economic interests into mine plan; increased predictability for DeLamar milestones.
- **Reputation & brand building:** ability to successfully mitigate project risks and foster reputation for respectful business practices benefits current/future operations.

Note: Refer to news release dated August 15, 2025 available on Integra's corporate website or under Integra's SEDAR+ profile at www.sedarplus.ca

Nevada North Project

Nevada, USA

INTEGRA RESOURCES

Nevada North Heap Leach Project: Overview

Summary[1]

Wildcat Deposit:

- PEA stage, low-sulphidation epithermal gold-silver deposit located in the Farrell Mining District, Nevada, ~56km from the town of Lovelock; 17,612-acre land package including 916 unpatented and 4 patented claims
- **Total defined resource of 829kozs AuEq M&I and 235kozs AuEq Inferred**

Mountain View Deposit:

- PEA stage, low-sulphidation epithermal gold-silver project located in the Deephole Mining District, Nevada, ~24km from the town of Gerlach; 5,476-acre land package, consisting of 284 unpatented claims
- **Total defined resource of 622kozs AuEq M&I and 63kozs AuEq Inferred**

Combined Mineral Resources[1]

Category	Tonnes (Mt)	Gold Grade (g/t)	Silver Grade (g/t)	Gold Ounces (koz)	Silver Ounces (Moz)
Measured	-	-	-	-	-
Indicated	88.6	0.46	3.45	1,324	9.8
M&I	88.6	0.46	3.45	1,324	9.8
Inferred	26.6	0.32	2.60	270	2.2

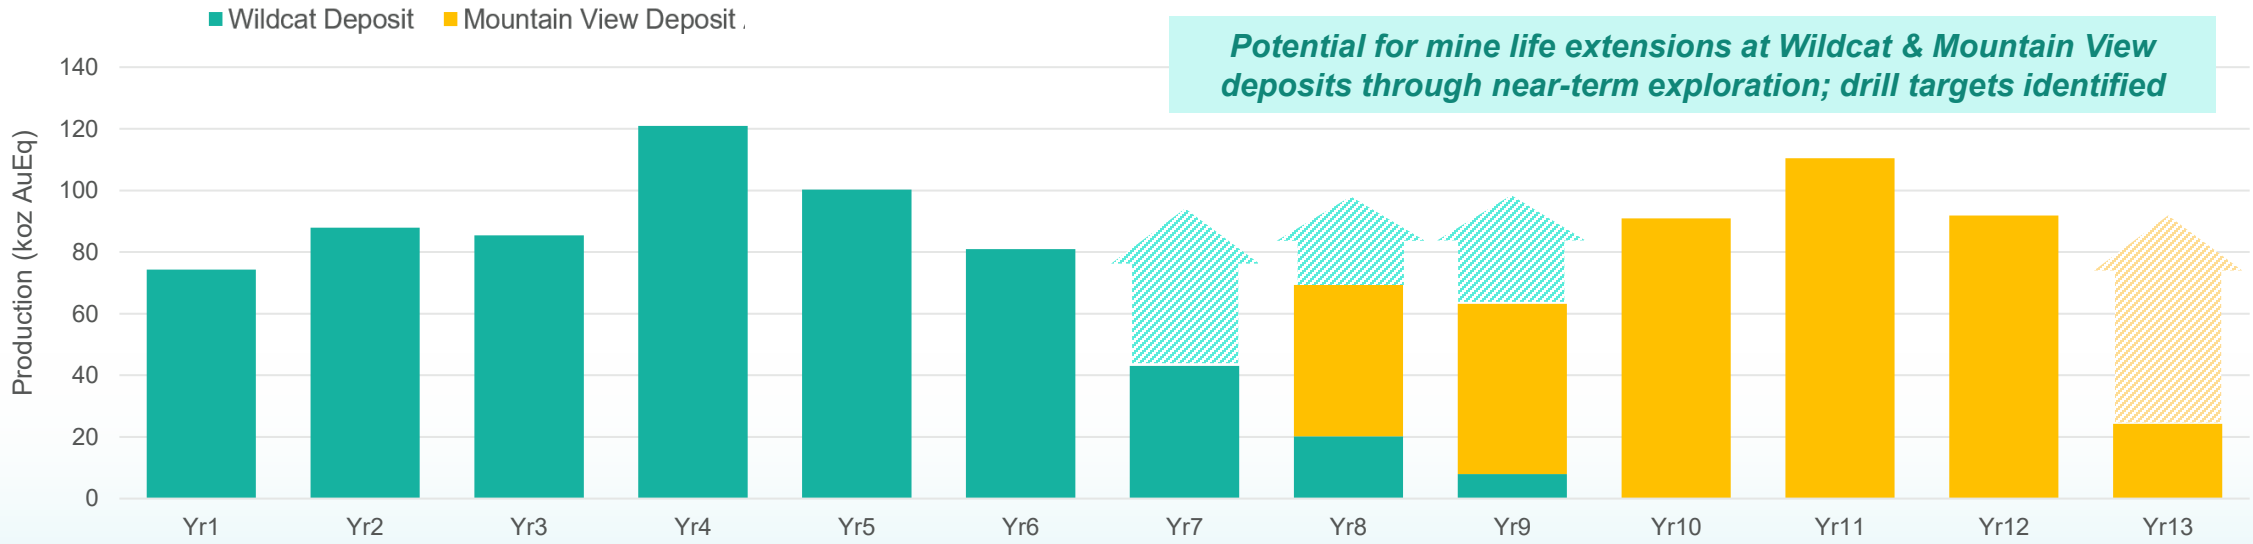
Note: Gold equivalent using 77.7:1 Au/Ag ratio; map not to scale; 1. Refer to NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023, available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov; see detailed mineral reserves & mineral resources tables and notes in the appendix of this presentation and available on Integra's corporate website

Nevada North Heap Leach Project: Simple, High-Margin Operation

2023 PEA outlined a simple, low-cost, high margin operation with significant exploration upside

13-year LOM	1Moz / ~80koz AuEq	US$973/oz	US$310M NPV5% 37% IRR	3-year Payback
100Mt of Ore Mined	Total / Avg. LOM Production	LOM AISC (co-product)[1]	After-Tax (US$1,700/oz Au)[2]	After-tax

Production Profile



Note: Gold equivalent using 77.7:1 Au/Ag ratio; Refer to NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023, available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov - PEA is preliminary in nature; it includes inferred mineral resources that are considered too speculative geologically to have the economic considerations applied to them that would enable them to be categorized as mineral reserves, and there is no certainty that the PEA will be realized; detailed mineral reserves & rmmineral resources tables and notes in the appendix of this presentation and available on Integra's corporate website; 1. See Non-GAAP Financial Measures slides in appendix; 2. Base case prices of US$1,700/oz Au, US$21.50/oz Ag

Wildcat Heap Leach Deposit: Exploration Potential

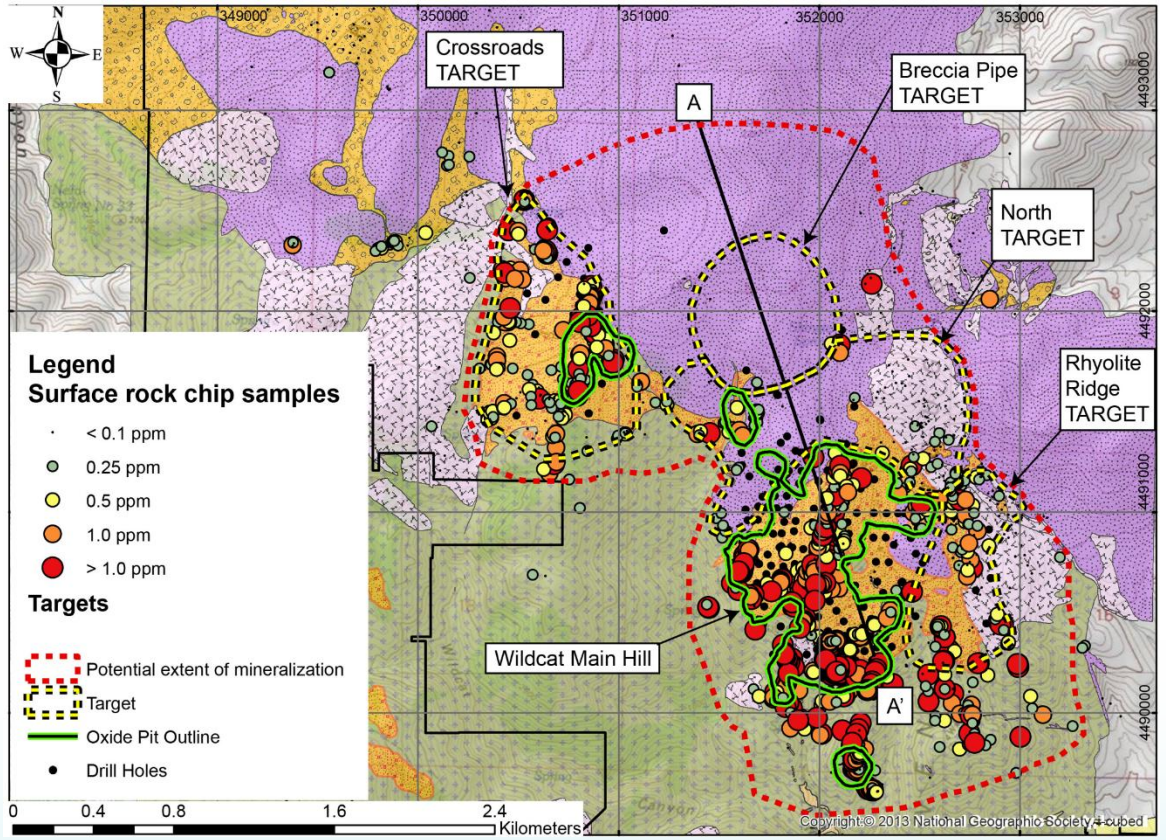
Wildcat is located ~30 miles away from currently operating Florida Canyon mine and demonstrates solid growth potential

Commentary

- Mineralized targets discovered at surface outside the current pit; surface samples collected in 2022 returned grades up to 30 g/t oxide Au
- Mineralized footprint at Wildcat was significantly expanded in 2022 to ~3.0km x 2.0km (previously 1.5km x 1.5km)
- Wildcat has only been drilled on ~5-acres of total +17,000-acre land package
- EPO (submitted to BLM) to allow for 400 acres of surface disturbance vs. 5-acre disturbance limit under current Notice of Operation (NOO)

Mineralized tuff breccia (orange) wraps beneath post-mineral basalts (purple) demonstrating exploration upside to adjacent to 2023 PEA pit

Wildcat Surface Samples



Note: Refer to NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023, available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov

Integra's Value Proposition

2026-2027: Multiple Near-Term Catalysts Driving Growth, De-Risking & Re-Rating

2026: Execution & Resource Growth

- Ongoing 50,000 m drill program across project portfolio
- Gold production guidance of 70–75 koz in 2026
- Optimization initiatives driving efficiency & cost improvements
- Advancing DeLamar permitting (FAST-41) and early works
- DeLamar early work programs underway: test-mining, crushing optimization.

2027: De-Risking & Growth Visibility

- Florida Canyon production growth to 80–85 koz
- DeLamar Record of Decision (permit) expected in H2 2027
- Nevada North updated Technical Report
- Project financing initiatives at DeLamar leveraged by built up cash-flow
- Continued exploration success feeding pipeline

Why it matters:

- ✓ **Near-term:** Consistent production + cash flow supports growth
- ✓ **Medium-term:** Resource growth & mine life extension at Florida Canyon
- ✓ **Long-term:** Transition toward a **250 to 300 koz AuEq multi-asset platform**
- ✓ **Cash flow today funds the next mine and the next re-rating**

Multiple catalysts expected to drive valuation re-rating vs peers

Next Steps & Corporate Timeline

Near term success through profitability, rapid project advancement, disciplined capital allocation, and strategic M&A

Key Objectives

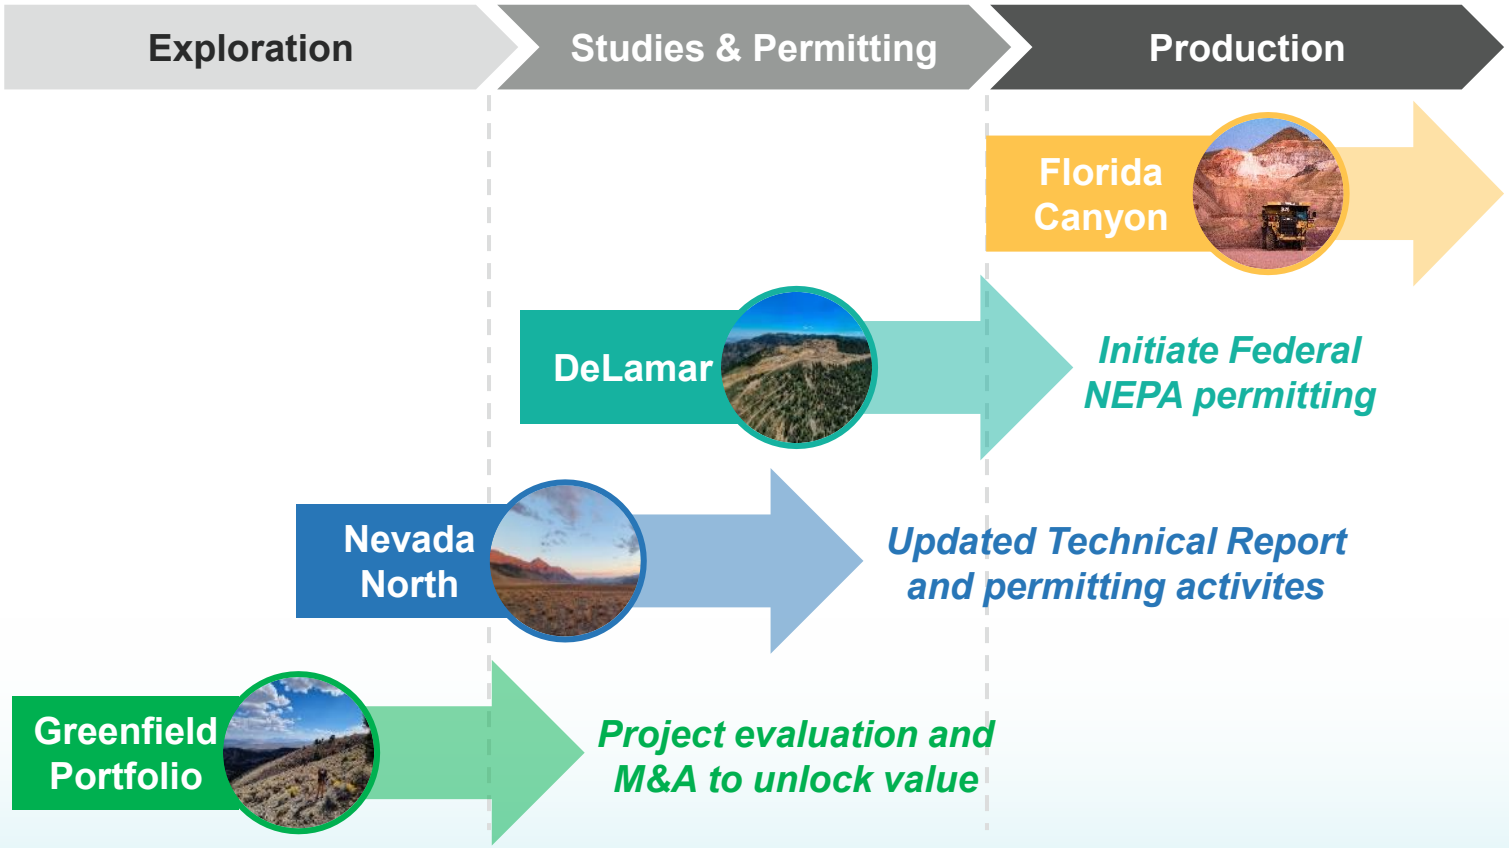
Florida Canyon: consistent operations, significant re-investment, growth

DeLamar: permit progression, early works and long-leads, advanced engineering, build readiness

Nevada North: technical de-risking and permitting, growth

Corporate: capital allocation, index inclusion (GDXJ), strategic M&A

Integra Corporate Timeline



Notes: Based on internal estimates as of February 2026; subject to change.

Building a Mid-tier Precious Metals Producer

Production & Cash Flow	**Florida Canyon delivers consistent production and cash flow delivering exposure to the strong gold price environment; excellent potential for mine life extension**
Growth Pipeline	**Cash flow from Florida Canyon supports built-in growth pipeline via DeLamar and Nevada North; clear pathway to significantly growing annual production profile**
Resource Scale	**Peer leading resource inventory with 7.7Moz AuEq M&I and 4.3Moz AuEq Inf.[1] across three high-quality assets, each with untapped exploration potential**
Jurisdiction	**Scarcity of advanced assets in the USA; portfolio creates potential 20+ year mining platform within Great Basin; opportune time to be advancing projects in USA**
Team	**Strengthened leadership well positioned to optimize Florida Canyon and advance DeLamar, Nevada North; support from large institutions and strategic investors**
Attractive Valuation	**Integra trades at a discount to junior producer peers; unique value proposition driven by combination of production and development focused within Great Basin of the USA**

Note: Gold equivalent using US$3,000/oz Au and US$35/oz Ag; 1. Refer to detailed mineral reserves & mineral resources tables and notes in the appendix of this presentation and available on Integra's corporate website

INTEGRA RESOURCES

Board of Directors & Advisors

Board of Directors with deep industry knowledge and strong governance to support the execution of Integra's strategy

Anna Ladd-Kruger
Chair of Board
- +25 years of experience
- Recent board experience with SilverCrest Metals and 1911 Gold; former CFO at McEwen Mining

Ian Atkinson
Director
- +50 years of experience
- Former CEO at Centerra; experience with Hecla, Kinross, Noranda; involved in several major discoveries

Carolyn Clark Loder
Director
- +30 years of experience
- U.S. National Mining Hall of Fame; led mineral rights and tribal relations for Freeport McMoRan

Timo Jauristo
Director
- +35 years of experience
- CEO of South Pacific Metals; previously EVP of Corporate Development at Goldcorp

C.L. "Butch" Otter
Director
- Served as the 32nd Governor of Idaho from 2007 to 2019
- Pre-politics: 30+ years as a business leader including President of Simplot

Janet Yang
Director
- +20 years of experience
- Current CFO at Reveam; previously with GMT Capital and served on Board of Argonaut Gold

Chantal Lavoie
Director
- +40 years of experience
- Served as COO of Rio Tinto Iron Ore Co. of Canada, COO of Dominion Diamond Corp and President & CEO of Crocodile Gold Corp.

Leonard Kosinski
Advisor
- +30 years of experience
- Retired 3-star U.S. Air Force General; recently worked with Department of Defense and the Pentagon

Non-GAAP Financial Measures

Cautionary Note Regarding Non-GAAP Financial Measures

The Company has included herein certain performance measures ("**non-GAAP measures**") which are not specified, defined, or determined under generally accepted accounting principles (in our case, International Financial Reporting Standards, or "**IFRS**"). These are common performance measures in the gold mining industry, but because they do not have any mandated standardized definitions, they may not be comparable to similar measures presented by other issuers. Accordingly, we use such measures to provide additional information and you should not consider them in isolation or as a substitute for measures of performance prepared in accordance with generally accepted accounting principles ("**GAAP**").

Please see the information under the heading "Non-GAAP Financial Measures" in the Company's management's discussion and analysis for the financial period ended March 31, 2026, which section is incorporated by reference in this presentation, for a description of non-GAAP measures related to the Company's Florida Canyon mine. The Company's management's discussion and analysis may be found on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.

Florida Canyon

Cash Cost

Cash costs include site operating costs (mining, processing, site G&A), refinery costs and royalties, but excludes head office G&A and exploration expenses. While there is no standardized meaning of the measure across the industry, the Company believes that this measure is useful to external users in assessing operating performance.

All-In Sustaining Cost ("AISC")

Site-level AISC includes cash costs and sustaining capital, but excludes head office G&A and exploration expenses. The Company believes that this measure is useful to external users in assessing operating performance and the Company's ability to generate free cash flow from potential operations.

Free Cash Flow

Free cash flows are revenues net of operating costs, royalties, capital expenditures and cash taxes. The Company believes that this measure is useful to the external users in assessing the Company's ability to generate cash flows from the Project.

DeLamar & Nevada North

Cash Cost

Cash costs include site operating costs (mining, processing, site G&A), refinery costs and royalties, but excludes head office G&A and exploration expenses. While there is no standardized meaning of the measure across the industry, the Company believes that this measure is useful to external users in assessing operating performance.

AISC

Site-level AISC includes cash costs and sustaining capital, but excludes head office G&A and exploration expenses. The Company believes that this measure is useful to external users in assessing operating performance and the Company's ability to generate free cash flow from potential operations.

INTEGRA RESOURCES

Abbreviations & Conversions: koz = 1,000 troy ounces, t = tonne (1,000 kilograms), kt = 1,000 tonnes, ton = short tons (0.9072 tonnes = 1 ton), ktons = 1,000 tons, Au = gold, Ag = silver, AuEq = gold equivalent, g/t = grams per tonne, oz/ton = ounces per ton.
Note: Mineral reserve and resource estimate for Florida Canyon has been converted into metric tonnes from short tons using a factor of 0.9072; 1. Refer to detailed mineral reserves & mineral resources tables and notes available on Integra's corporate website

Florida Canyon Mine: Notes to Mineral Reserve & Resource Estimate

Notes to Mineral Reserves:

1. Mineral reserves are reported at the point of delivery to the process plant, using the 2014 CIM Definition Standards, with an effective date of May 31, 2026. The qualified personas defined under NI 43-101 for the estimate is Ms. Terre Lane, MMSA QP, a Global Resource Engineering, Ltd. employee.
2. Mineral reserves are constrained within an open pit design that uses the following assumptions: gold price of $2,400/oz considering only oxide material; gold recoveries varied by deposit and ore type, ranging from 43% to 67%; reference mining cost of $3.24/t mined in-situ and $2.93/t mined fill; processing cost of $6.51/t processed for oxide crushed material and $4.23/t for oxide run-of-mine (“ROM”) material; G&A costs of $1.14/t ore processed; treatment and refining costs of $38.73/oz gold recoverable; royalty costs of$132.00/oz gold recoverable; and pit slope inter-ramp angles ranged from 36–42° for rock and 36° for alluvium / fill.
3. Mineral reserves are reported at a cut-off grade ranging from 0.14 g/t to 0.15 g/t.
4. Mineral Reserves include a stockpile of 1,094 kt at an average grade of 0.21 g/t and total contained gold of 6.78 Koz.
5. Mineral Reserves include Heap Leach Inventory of 6,648 kt at an average grade of 0.29 g/t and total contained gold of 56.5 Koz.
6. Numbers have been rounded and may not sum.

Notes to Mineral Resources:

1. Mineral resources are reported, using the 2014 CIM Definition Standards, with an effective date of May 31, 2026. The qualified person as defined under NI 43-101 for the estimate is Ms. Terre Lane, MMSA QP, a Global Resource Engineering, Ltd. employee.
2. Mineral resources are reported inclusive of those mineral resources converted to mineral reserves. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
3. Mineral resources are constrained within a conceptual open pit shell that uses the following assumptions: gold price of $2,650/oz; gold recoveries ranging from 43% to 67%for oxides and 80% for sulfides; reference mining cost of $2.79/t mined in-situ and $2.47/t mined fill; processing cost of $6.51/t processed for oxide crushed material and $4.23/t processed for oxide ROM material; processing cost of $26.30/t processed for sulfide material; general and administrative costs of $1.14/t processed; treatment and refining costs of 38.73/oz Au recoverable; royalty of $132.00/oz Au recoverable, and pit slope overall angles ranging from 30–36°.
4. Mineral resources are reported at a cut-off grade ranging from 0.13 g/t to 0.14 g/t for oxides and is 0.46 g/t for sulfides.
5. Mineral Resources include a stockpile of 1,094 kt at an average grade of 0.21 g/t and total contained gold of 6.78 Koz.
6. Mineral Resources include Heap Leach Inventory of 6,648 kt at an average grade of 0.29 g/t and total contained gold of 56.5 Koz.
7. Numbers have been rounded and may not sum

To the best of Integra Resources Corp.’s knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resources or mineral reserves included in the Florida Canyon Report inaccurate or misleading.

Standard Mine: Notes to Mineral Resource Estimate

Notes to Mineral Resources:

1. Mineral Resources are reported, using the 2014 CIM Definition Standards, with an effective date of May 31, 2026. The Qualified Person for the estimate is Mr. Antoine Teixeira de Carvalho, P.Geo., an employee of BT Africa Mining Services. Mr. Antoine Teixeira de Carvalho is independent of the Company.
2. Mineral Resources are reported inclusive of those Mineral Resources converted to Mineral Reserves. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. Mineral Resources are constrained within a conceptual open pit shell that uses the following assumptions: gold price of US$2,650/oz; gold recoveries ranging from 43% to 66.7% for oxides and 80% for sulfides; reference mining cost of $2.79/ton mined in-situ and $2.47/ton mined fill; processing cost of $5.37/ton processed for oxide crushed material and $3.09/ton processed for oxide ROM material; processing cost of $25.16/ton processed for sulfide material; general and administrative costs of $1.14/ton processed; treatment and refining costs of $38.73/oz Au recoverable; royalty of $145.75/oz Au recoverable, and pit slope overall angles ranging from 30–43°.
4. Mineral Resources are reported at a cut-off grade ranging from 0.0038 oz/ton to 0.0071 oz/ton for oxides and is 0.0133 oz/ton for sulfides.
5. Numbers have been rounded and may not sum.
6. The estimate of mineral resources may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.

To the best of Integra Resources Corp.’s knowledge, information and belief, there is no new material scientific or technical information that would make the disclosure of the mineral resources or mineral reserves included in the Florida Canyon Report inaccurate or misleading.

DeLamar Project: Notes to Mineral Reserve & Resource Estimate

Notes to Mineral Reserves:

1. All Mineral Resource estimates have been prepared in accordance with NI 43-101 standards.
2. Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability.
3. Jeffrey Bickel, of RESPEC Company LLC of Reno, Nevada, is a Qualified Person as defined in NI 43-101, and is responsible for reporting Mineral Resources for the DeLamar Project. Mr. Bickel is independent of the Company.
4. “Oxide”, as listed above, is an aggregate category inclusive of all material types amenable to heap-leaching, including In-Situ Oxide, Stockpiles, and In-Situ Mixed material.
5. In-Situ Oxide/Mixed and Stockpile Mineral Resources are reported at a 0.17 and 0.1 g/t AuEq cut-off, respectively, in consideration of potential open-pit mining and heap leach processing.
6. Sulphide Mineral Resources are reported at a 0.3 g/t AuEq cut-off at DeLamar and 0.2 g/t AuEq at Florida Mountain in consideration of potential open pit mining and grinding, flotation, ultra-fine regrind of concentrates, and either Albion or agitated cyanide-leaching of the reground concentrates.
7. AuEq was calculated using a price of $2,650/oz Au and a price of $30/oz Ag, as well as metallurgical recoveries which were variable based on spatial area and each respective oxidation zone of the deposit.
8. The Mineral Resources are constrained by pit optimizations using a price of $2,650/oz Au, a price of $30/oz Ag, mining cost of $2.50/tonne, variable processing costs ranging from $3.26-$5.30/tonne, and metallurgical recoveries ranging from 45%-95% for Au and 15%-92% for Ag. Variable metallurgical recoveries and processing costs correspond to various material types including Oxide, Transition, Sulphide, and Stockpile materials, as well as spatial zones of the deposit with defined metallurgical characteristics. The pit optimizations also used a G&A cost of $0.65/tonne, pad replacement cost of $1.00/tonne for heap leach material, and refining costs of $0.00/oz and $0.50/oz for Au and Ag, respectively.
9. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
10. The estimate of Mineral Resources may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
11. Mineral Resources reported are inclusive of Mineral Reserves.
12. The Effective Date of the Mineral Resource Estimate is December 8, 2025

Notes to Mineral Resources:

1. All estimates of Mineral Reserves have been prepared in accordance with NI 43-101 standards and are included within the current Measured and Indicated Mineral Resources.
2. Sterling K, Watson, P.Eng., of RESPEC Company LLC of Reno, Nevada, is a Qualified Person as defined in NI 43-101, and is responsible for reporting Mineral Reserves for the DeLamar Project. Mr. Watson is independent of the Company.
3. Mineral Reserves are based on prices of $2,000/oz Au and $25/oz Ag. The Mineral Reserves were defined based on pit designs that were created to follow optimized pit shells created in Whittle. Pit designs followed pit slope recommendations provided by RESPEC.
4. Mineral Reserves are reported using block value cutoff grades representing the cost of processing.
5. The Mineral Reserves are constrained by pit optimizations using a price of $2,000/oz Au, a price of $25/oz Ag, mining cost of $2.50/tonne, variable processing costs ranging from $3.26-$5.30/tonne, and metallurgical recoveries ranging from 45%-95% for Au and 15%-92% for Ag. The pit optimizations also used a G&A cost of $0.65/tonne, pad replacement cost of $1.00/tonne for heap-leach material, and refining costs of $0.00/oz and $0.50 for Au and Ag, respectively.
6. Energy prices of US$3.50 per gallon of diesel.
7. Pit optimizations were run on a range of prices from $500/oz Au to $3,000/oz Au.
8. The cut-off grade for Mineral Reserves is based on economics at a “Break-Even Internal” cut-off grade for the deposits.
9. The Mineral Reserves purposes of reference is the point where material is fed into the crusher.
10. All ounces reported herein represent troy ounces, “g/t Au” represents grams per tonne gold and “g/t Ag” represents grams per tonne silver.
11. Mineral Resources reported are inclusive of Mineral Reserves
12. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
13. The estimate of Mineral Reserves may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
14. The Effective Date of the Mineral Reserves Estimate is December 8, 2025.

Nevada North Project: Notes to Mineral Resource Estimate

Notes to Mineral Resources:

1. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
2. William Lewis, P.Geo, and Alan S J San Martin, AusIMM(CP), of Micon International Limited have reviewed and validated the mineral resource estimate for Wildcat & Mountain View, respectively. Both are independent qualified persons as defined in NI 43-101.
3. The Wildcat Deposit estimate is reported for an open-pit mining scenario, based upon reasonable assumptions. The cut-off grade of 0.15 g/t Au was calculated using a gold price of US$1,800/oz, mining costs of US$2.4/t, processing cost of US$3.7/t, G&A costs of US$0.5/t, and metallurgical gold recoveries varying from 73.0% to 52.0% and silver recoveries of 18%. An average bulk density of 2.6 g/cm3 was assigned to all mineralized rock types. The Inverse Distance cubed interpolation was used with a parent block size of 15.24 m x 15.24 m x 9.144 m.
4. The Mountain View Deposit estimate is reported for an open-pit mining scenario, based upon reasonable assumptions. The cut-off grade of 0.15 g/t Au was calculated using a gold price of US$1,800/oz, mining costs of US$1.67/t to US$2.27/t, processing cost of US$3.1/t, G&A costs of US$0.4/t, and metallurgical gold recoveries varying from 30.0% to 86.0% with a silver recovery of 20%. An average bulk density of 2.6 g/cm³ was assigned to all mineralized rock types. Inverse Distance cubed interpolation was used with a parent block size of 7.62 m x 7.62 m x 6.10 m. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
5. Rounding as required by reporting guidelines may result in apparent discrepancies between tonnes, grades, and contained metal content.
6. The estimate of mineral resources may be materially affected by geology, environment, permitting, legal, title, taxation, sociopolitical, marketing, or other relevant issues.
7. Neither Integra Resources Corp.'s nor Micon's qualified person is aware of any known environmental, permitting, legal, title-related, taxation, socio-political, marketing, or other relevant issue that could materially affect the mineral resource estimate other than any information already disclosed in the Nevada North Report.
8. See NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023 ("Nevada North Report"), available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov

DeLamar Project: Untapped Exploration Potential

~28km² of highly prospective exploration ground along strike from current ~4.8Moz AuEq M&I resource; significant non-oxide potential underlying the oxide-mixed resource at DeLamar and Florida Mountain[1]

BlackSheep Target

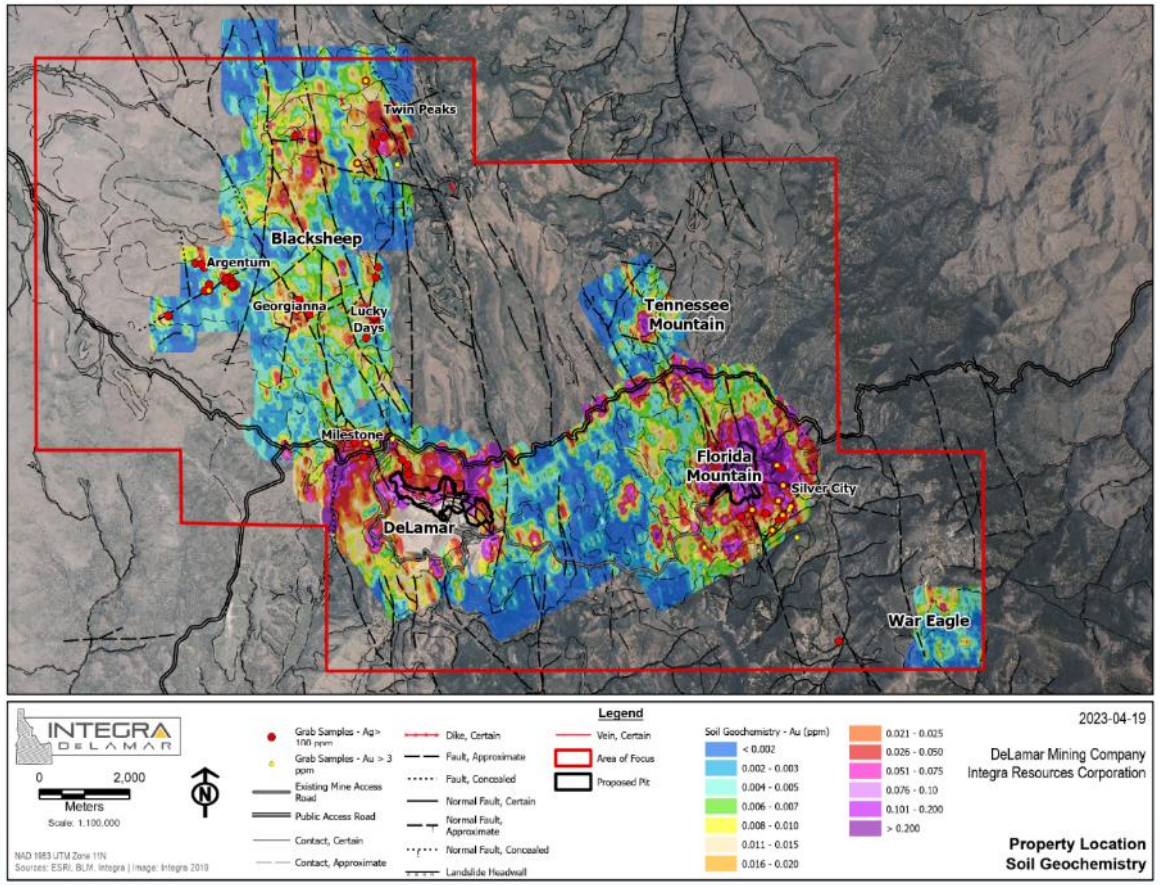
- ~25km² of exploration ground on strike to the northwest of the main DeLamar Deposit
- Past Integra work includes 4,222m of drilling over 13 holes, 50km of geophysics, and ~22km of surface mapping

DeLamar Non-Oxide

- Significant non-oxide AuEq growth potential below the existing heap leachable resource at DeLamar
- Sullivan Gulch non-oxide drill results (IDE-22-228): **0.76 g/t Au** and **69.50 g/t Ag** (1.66 g/t AuEq) over 397m[3,4]

War Eagle Target

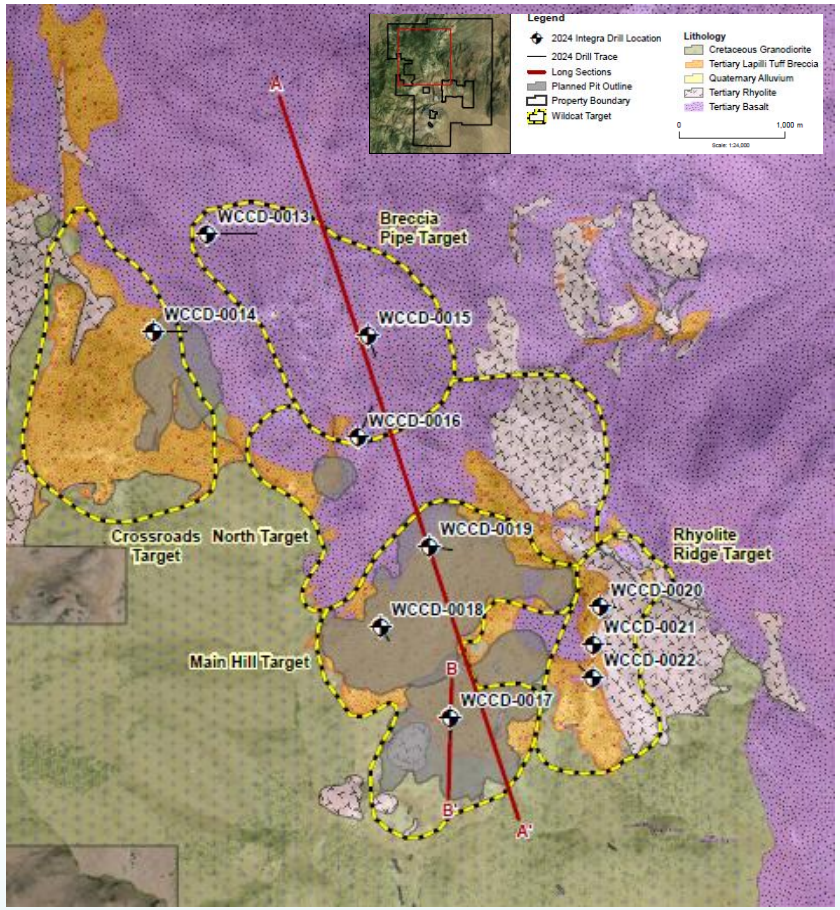
- Located ~5km from Florida Mountain; Integra work includes 9,075m of drilling over 25 holes with detailed geophysics plan in place
- Integra drill results (IWE-19-01): **10.88 g/t Au** and **115.31 g/t Ag** (12.37 g/t AuEq) over 34m[2,3]

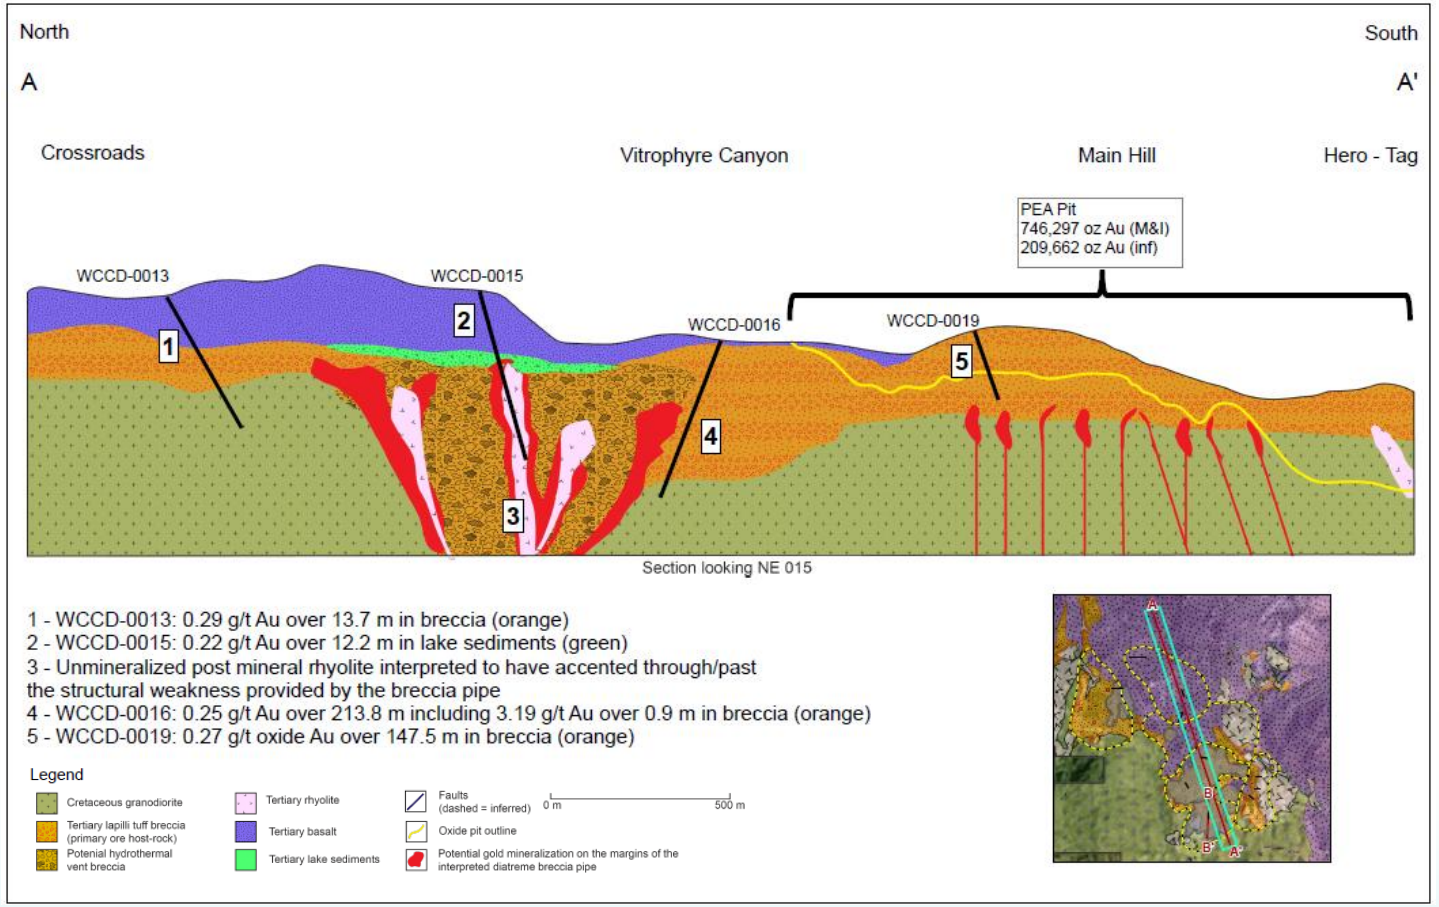


Note: Gold equivalent using 77.7:1 Au/Ag ratio; map not to scale; 1. Refer to NI 43-101 technical report titled "Feasibility Study and Technical Report on the DeLamar Project, Owyhee County, Idaho, USA", dated February 2, 2026, with an effective date of December 8, 2025, available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov; 2. Refer to news release dated December 10, 2019; 3. Refer to news release dated June 13, 2022; 4. Downhole thickness: true width varies depending on drill hole dip; most drill holes are aimed at intersecting the vein structures close to perpendicular therefore true widths are close to downhole widths (~70% conversion ratio); intervals reported are uncapped

Wildcat Heap Leach Deposit: Drilling Overview

Drilling confirmed continuity of mineralization and gathered important technical data; critical markers for working exploration hypothesis remain intact for Breccia Pipe target





Note: Refer to news release dated December 12, 2024; NI 43-101 technical report titled: "Technical Report Preliminary Economic Assessment for the Wildcat & Mountain View Projects, Pershing and Washoe Counties, Nevada, USA", dated July 30, 2023, with an effective date of June 28, 2023, available under Integra's SEDAR+ profile at www.sedarplus.ca and EDGAR profile at https://www.sec.gov
